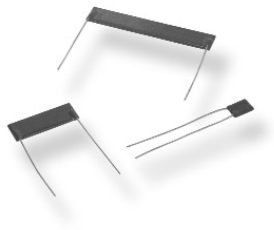
High Value / High Voltage Resistors

Type HB Series

Type HB Series



Tyco Electronics is a leading European supplier of standard and custom designed high value/high voltage resistors for high voltage, industrial, control, medical and general-purpose use.
The HB is a tough epoxy coated high voltage resistor, with axial or radial leads, values up to 1G Ohm and an operational voltage to 20kV as standard and 30kV to order.
The resistors are made from quality materials for optimum reliability and stability. Tyco Electronics can test resistors to conform to relevant international, MIL or customer specifications.
Tyco Electronics is happy to advise on the use of resistors for high frequency applications and to supply information for high voltage use.
