1. GENERAL DESCRIPTION

The MTF-TQ28NN911-LB is a Color TFT LCD supplied by Microtips. This main Module has a 2.8 inch Diagonally measured active display area with 240 x RGB x 320 Resolution. Each pixel is divided into Red, Green and Blue sub-pixels and dots which are arranged in vertical stripes. LCD color is determined with Dithering 65K/262K Color signal for each pixel. The MTF-TQ28NN911-LB has been designed to apply the interface method that enables low power, high speed, and high contrast. The MTF-TQ28NN911-LB is intended to support Applications where thin thickness, wide viewing angle, low power are critical factors and graphic displays are important.

2. FEATURES

Display Mode	TFT module, Transmissive Type, Positive mode
Display Format	RGB vertical stripe
Color	56K/262K color
Input Data	MCU Mode : 8080 system ; 8/9/16/18 bits interface
Viewing Direction	12 O'clock
Backlight	White LED

Microtips Technology Inc.

			A	Feb.27,09	5 / 27

3. MECHANICAL SPECIFICATION

Item	Specifications	Unit
Dimensional outline	50 (W) × 69.2 (H) × 2.8 (D)	mm
Resolution	240 x RGB x 320	Pixel
Active area	43.2 (W) × 57.6 (H)	mm
Pixel pitch	0.18 (W) × 0.18 (H)	mm
Dots pitch	0.06 (W) × 0.18 (H)	mm

* Not: Include FPC

* 1 Pixel =3 dots = Red dot + Green dot + Blue dot

	By	0.127	0.147	0.167			

- **For LCM**

Note1: Ambient temperature=25°C±2°C.

Note2: To be measured in the dark room.

Note3: To be measured at the center area of panel with a viewing cone of 2° by

Topcon luminance meter BM-7, after 10 minutes operation (module).

Microtips Technology Inc.

Messrs.					
Product Specification	Model:	MTF-TQ28NN911-LB	Rev. No.	Issued Date.	Page.
			A	Feb.27,09	16 / 27

Note4: Definition of response time:

The output signals of photo detector are measured when the input signals are changed from "black" to "white" (falling time) and from "white" to "black" (rising time), respectively. The response time is defined as the time interval between the 10% and 90% of amplitudes.

Refer to figure as below:

Note5: Definition of contrast ratio: **Contrast ratio is calculated with the following formula.**

$$\text{Contrast ratio (CR)} = \frac{\text{Photo detector output when LCD is at "White" state}}{\text{Photo detector output when LCD is at "Black" state}}$$

Note6: Definition of viewing angle (LCD-5200): **Refer to the figure as below**

Microtips Technology Inc.

Messrs.					
Product Specification	Model:	MTF-TQ28NN911-LB	Rev. No.	Issued Date.	Page.
			A	Feb.27,09	17 / 27

6. RELIABILITY

6.1 MTTF

The LCD module shall be designed to meet a minimum MTTF value of 50,000 hours with normal condition. (25°C in the room without sunlight; not include life time of backlight)

6.2 Tests

NO	Item	Condition	Criterion
1	High Temperature Operating	70°C 240hrs	* No defect of Operational function in Room temperature are Allowable.
2	Low Temperature Operating	-20°C 240hrs	
3	High Temperature Non-Operating	80°C 240hrs	
4	Low Temperature Non-Operating	-30°C 240hrs	
5	High Temperature / Humidity Non-Operating	50°C , 90%HR 240hrs	* Leakage current should Be below double of initial value.
6	Temperature Shock Non-Operating	-30°C ↔ 80°C (30min) (5min) (30min) 10 CYCLES	
	Electro-static Discharge	HBM : ±2Kv	

Note1: Test after 24 hours in room temperature.

Note2: The sampling above is Individually for each reliability testing condition.

Note3: The color fading of polarizing filter should not care.

Note4: All of the reliability testing chamber above, is using D.I. water. (Min value: 1.0 MΩ-cm)

Note5: In case of malfunction defect caused by ESD damage, if it would be recovered to Normal state after resetting, it would be judged as a good part.

Microtips Technology Inc.

			A	Feb.27,09	18 / 27

7. INSPECTION CRITERIA

7.1 Inspection Conditions

Environmental conditions

The environmental conditions for inspection shall be as follows

Room temperature: $23\pm 5^{\circ}\text{C}$

Humidity: $50\pm 20\% \text{RH}$

The external visual inspection

With a single 1000 ± 200 lux fluorescent lamp as the light source, the inspection was in the distance of 30cm or more from the LCD to the inspector's eyes.

7.2 Light Method

Environment lamp under 1000 ± 200 lux, Viewing direction for inspection over 30cm. The distance from eye to defect around 300mm, the distance from ND Filter to defect around 25~30mm

7.3 Classification of Defects

Minor defect

A major defect refers to a defect that may substantially degrade usability for product applications.

Minor defect

A minor defect refers to a defect which is not considered to be able substantially degrade the Product application or a defect that deviates from existing standards almost unrelated to the effective use of the product or its operation.

Notes: If the LCD/LCM's cosmetic and display performance do not specify in "inspection criterion", it should be based on these delivered samples.

8. PRECAUTIONS

8.1 Operation

Burn-in sometimes happens when the same character was displayed at along time. Therefore, to prevent Burn-in, it is recommended to set up a Screen-saver function.

8.2 Safety

The liquid crystal in the LCD is poisonous, DO NOT put it in your mouth. If the liquid crystal touches your skin or clothes, wash it off immediately using soap and water.

8.3 Handling

	<p>a. The LCD module shall be installed flat, without twisting or bending. b. COF or FPC has narrow pattern width, so easily become open circuit by external force. DO NOT apply pressure to COF or FPC especially in bending area.</p>
	<p>c. To avoid damage in appearance or malfunction, DO NOT subject the module to mechanical shock or to excessive force on its surface.</p>
	<p>d. The polarizer attached to the display is very easy to be damaged, handle it with care to avoid scratching.</p>
	<p>e. To avoid contamination on the display surface, DO NOT touch the display surface with bare hands. f. Provide a space so that the LCD module does not come into contact with other components.</p>

Microtips Technology Inc.

Messrs.					
Product Specification	Model:	MTF-TQ28NN911-LB	Rev. No.	Issued Date.	Page.
			A	Feb.27,09	24 / 27

	<p>g. To protect the LCD panel from external pressure, put covering glass (acrylic board or similar board) to keep appropriate space between them.</p>
	<p>h. Be careful for condensation at sudden temperature change. Condensation makes damage to polarizer or electrical contacted parts. And after fading condensation, smear or spot will occur.</p>
	<p>i. Property of semiconductor devices may be affected when they are exposed to light possibly resulting in malfunctioning of the ICs. To prevent such malfunctioning of the ICs, your design and mounting layout done are so that the IC is not exposed to light in actual use.</p>
	<p>j. Strong light exposure causes degradation of color filter. It may not recover</p>
	<p>k. DO NOT contact with water to avoid Metal corrosion. l. When it is not in use, the screen must be turned off or the pattern must be frequently changed by a screen saver. If it displays the same pattern for a long period of time, brightness down/image sticking may develop due to the LCD structure.</p>
	<p>m. Never disassemble LCD product under any circumstances. If unqualified operators or users assemble the product after disassembling it, it may not function or its operation may be seriously affected.</p>

Microtips Technology Inc.

Messrs.					
Product Specification	Model:	MTF-TQ28NN911-LB	Rev. No.	Issued Date.	Page.
			A	Feb.27,09	25 / 27

8.4 Static electricity

Since a module is composed of electronic circuits, it is not strong to electrostatic discharge.

	<ol style="list-style-type: none"> The LCD module shall be installed flat, without twisting or bending. Ground soldering iron tips, tools and testers when they operate. Ground your body when handling the products. DO NOT apply voltage to the input terminal without applying power supply. DO NOT apply voltage that exceeds the absolute maximum rating. Store the products in an anti-electrostatic container. Peel off protect tape, attached to polarizer, slowly to minimize ESD damage.
---	--

8.5 Storage

	<p>Store the products in a dark place at +5 ~ +25 degree C, low humidity (50%RH or less). DO NOT store the products in an atmosphere containing organic solvents or corrosive gases.</p>
---	--

8.6 Cleaning

	<ol style="list-style-type: none"> DO NOT wipe the polarizer with dry cloth, as it might cause scratch. Wipe the polarizer with a soft cloth soaked with petroleum IPA, other chemical might damage.
---	--

8.7 Waste

	<p>When dispose of LCD module, manage it at the production waste according to the relevant laws and regulations.</p>
---	--

Microtips Technology Inc.

9. WARRANTY

This product has been manufactured to your company's specifications as a part for use in your company's general electronic products. It is guaranteed to perform according to delivery specifications. For any other use apart from general electronic equipment, we cannot take responsibility if the product is used in medical devices, nuclear power control equipment, aerospace equipment, fire and security systems, or any other applications in which there is a direct risk to human life and where extremely high levels of reliability are required. If the product is to be used in any of the above applications, we will need to enter into a separate product liability agreement.

- 1 13 months guarantee starts from the date code.
- 2 We cannot accept responsibility for any defect, which may arise from additional manufacturing of the product (including disassembly and reassembly), after product delivery.
- 3 We cannot accept responsibility for any defect, which may arise after the application of strong external force to the product.
- 4 We cannot accept responsibility for any defect, which may arise due to the application of static electricity after the product has passed your company's acceptance inspection procedures.
- 5 We cannot accept responsibility for industrial property, which may arise through the use of your product, with exception to those issues relating directly to the structure or method of manufacturing of our product. Microtips-origin longer than one year from Microtips production.
