The Cooper Bussmann fuse upgrade offers superior performance while reducing the number of SKU's that need to be in stock. Low-Peak® fuses feature a high degree of current limitation, which will provide the best component protection and may reduce the arc-flash hazard. Listings are numerical-alpha by fuse class and fuse catalog symbol. Do you have a part that does not appear in the list? This list is only a consolidated cross-reference to some of our most common products. For a much more extensive database please consult the competitor cross-reference on www.cooperbussmann.com or contact Customer Satisfaction at (636) 527-3877

The comparative catalog numbers shown were derived from the latest available published information from various manufacturers. Because competitors' products may differ from Cooper Bussmann products, it is recommended that each application be checked for required electrical and mechanical characteristics before substitutions are made. Cooper Bussmann is not responsible for misapplications of our products.

Overcurrent protection is application dependent. Consult latest catalogs and application literature, or contact our Application Engineering Department at (636) 527-1270.
