Adapters for DIN and American Rails

- Buss DIN-Rail Adapters permit secure, positive snap-on mounting of Buss 0 to 30 ampere fuseblocks (one, two, or three pole) on the various size rails. (Rail mounting eliminates costly and time consuming drilling, tapping, and screw mounting.)
- Molded from "Lexan™ 141"...a very high strength but flexible material.
- Adapter mechanically locks into mounting hole of fuseblock in seconds to become an integral part of the block.
- One adapter is required for Buss one and two pole blocks. Two adapters are required for three pole blocks.
- With the exception of the 32mm DIN-rail, all blocks with adapters can be removed from a rail simply by pulling up its release tab.
- Use of rail end-stops on both sides of adapters is recommended.

Package Quantities: standard—10; bulk—100 (Cat. No. BK/DRA-1 or BK/DRA-2.)

*Mounting on 15mm rails is not recommended.

NOTE—New model Buss fuseblocks have elongated block-to-adapter mounting holes (old style fuseblocks will not accept the rail adapters).
