

NUF4220MN

4 Line Audio EMI Filter with ESD Protection

NUF4220MN is a 4 line LC EMI filter array designed for audio applications. It offers greater than -30 dB attenuation at frequencies from 800 MHz to 5.0 GHz, with no line loss. This part is a single chip solution for audio interface applications, 2 speaker lines with a microphone line. This device also offers ESD protection—clamping transients from static discharges and ESD protection is provided across all capacitors.
