## 1/2" (12.7 mm) Conductive Plastic and Cermet Potentiometers

## FEATURES

- Robust construction
- High rotational life (50 000 cycles)

RoHS COMPLIANT

- Up to three sections PC support plates
- Rotary switches and solder lugs terminals available
- Compliant to RoHS directive 2002/95/EC since date code 0414

## 148 FEATURES

- Conductive plastic element
- Quiet electrical output

149 FEATURES

- Cermet element
- Low temperature coefficient ( $\pm 150 \mathrm{ppm} /{ }^{\circ} \mathrm{C}$ )

## LOCATING PEGS (Anti-Rotation Lug)

The locating peg is provided by a plate mounted on the bushing and positioned by the module sides. Four set positions are available, clock face orientation: 12, 3, 6, 9.

All 148, 149 bushings have a double flat. When panel mounting holes have been punched accordingly, an anti-rotation lug is not necessary.

| CODE | VERSION | BUSHING <br> A, B | BUSHING <br> F | EFFECTIVE <br> HIGH PEG |

Locating pegs are supplied in separate bags with nuts and washers

## RSID OPTION: ROTARY SWITCH MODULES

- Rotary switches
- Current up to 2 A
- SPDT: Single pole, changeover switch in CCW position - 3 pins

## MODULES: RS ON/OFF SWITCH RSI CHANGEOVER SWITCH

The position of each module is free.
RS and RSI rotary switches are housed in a standard 148, 149 module size $12.7 \mathrm{~mm} \times 12.7 \mathrm{~mm} \times 5.08 \mathrm{~mm}\left(0.5^{\prime \prime} \times 0.5^{\prime \prime} \times 0.2^{\prime \prime}\right)$. They have the same terminal styles as the assembled electrical modules.

An assembly can comprise 1 or more switch modules.
Switch actuation is described as seen from the shaft end.
D:means actuation in maximum CCW position
The switch actuation travel is $25^{\circ}$ with a total mechanical travel of $300^{\circ} \pm 5^{\circ}$ and electrical travel of electrical module is $238^{\circ} \pm 10^{\circ}$.

## RSID SINGLE POLE CHANGEOVER

In full CCW position, the contact is made between 3 and 2 and open between 3 and 1. Switch actuation (CW direction) reverses these positions.
