Product Facts

 Single-pole and 2-pole (battery) quick connect/disconnect connectors

 Eight Series, based on approximate currentcarrying capability:
 Series 15/30/45 (Single-Pole)
 Series 50 (2-Pole Battery)

 Series 50 Finger Probe Resistant (FPR)
 Series 75 (Single-Pole)

(Single- and 2-Pole)

Series 120

Series 175 (2-Pole Battery)
Series 180 (Single-Pole)

 Series 350 (2-Pole Battery)
 Voltage rating: 600 V AC/DC
 Color-coded housings, UL

94V-0

# Power Connectors for Industrial and Commercial Applications

# AMP Power Series Connectors

- Hermaphroditic (genderless) housings reduce inventory
- Modular, single-pole housings are stackable in four directions
- Polarity (+ and -) molded into 2-pole housings promotes proper wiring
- Mechanical keys help prevent two different colorcoded housings from mating
- Stainless steel retaining springs secure contacts in housings
- Stamped and formed, open barrel contacts (6-20 AWG) on reels for automatic and semiautomatic machine termination
- Loose piece, cold-headed contacts (6 AWG – 300 MCM) for manual and hydraulic hand tools; reducing bushings accommodate smaller wire sizes
- Compatible with industry standard crimp tooling from PICO Corporation (http://www.picotools.com)
- Connectors intermateable with similar connectors from other manufacturers

- Series 15/30/45, single-pole connectors designed to meet Amateur Radio Emergency Service (ARES)/Radio Amateur Civil Emergency Service (RACES) Standard Power Connector requirements
- Accessories available for mounting, vibration protection, and strain relief
- Component Recognized by Underwriters Laboratories Inc. to US and Canadian Standards, File No. E28476
  - c **FN**us

AMP Power Series Connectors provide a durable, quick connect/disconnect means to transmit "power" levels of current and voltage (15-275 A, 600 V AC/DC).

This product family is primarily comprised of single-pole and 2-pole (battery) connector housings, crimp snap-in contacts, and accessories. Housings are offered in various colors. Two-pole housings have different polarization configurations; with the exception of black housings, each color identifies a different keying configuration. In general, only like color housings will mate. Contacts are either cold-headed or stamped and formed, depending upon the connector Series.

AMP Power Series Connectors are divided into eight Series, based on approximate current-carrying capability.

# Applications

AC/DC Power Supplies and Charging Systems, Rechargeable Batteries, Material Handling Equipment (e.g. forklift trucks), Electric Vehicles (e.g., golf carts, sweepers, wheelchairs), Office Furniture/Panels, Amateur Emergency Radios, and Industrial Equipment

# Electronics

# AMP Power Series Connectors (Continued)

# AMP Power Series 15/30/45

Single-pole connector housings are stackable side-to-side and top-to-bottom. For example, Series 30 red and black housings joined side-to-side, are commonly used as standard power connec-

tors for handheld, mobile, or base amateur radio equipment.

Modular housings can also be grouped into plug frames with or without latches, which mate with receptacle housings. Typically, these are used as quick disconnects for electrical power distribution in office furniture and panels.

# AMP Power Series 50

Two-pole (battery) housings are available in bulk quantities or in kit form (i.e., 1 housing and 2 contacts). These high durability connectors are designed for repeated mating and unmating.

# **AMP Power Series 50** Finger Probe Resistant (FPR)

This new, 2-pole, FPR version helps prevent finger access, which allows it to be more safely used at elevated voltages and in user access areas.

# **AMP Power Series 75**

Single-pole, stackable housings, in locking and non-locking versions, are available in a variety of colors. Housings accept stamped and formed or cold-headed contacts. Bulk quantities and connector kits (1 housing and

1 contact) can be ordered. Accessories include: mounting wings for through-panel or surface mounting and mounting clamp sets for ganging housings.

### Selection Guide

# accept cold-headed contacts (4-1/0 AWG). Most features are similar to the smaller, single-pole, Series 120 connectors.

# AMP Power Series 350

AMP Power Series 180

Rugged, 2-pole housings accept only loose piece, cold-headed contacts (1/0-300 MCM). Rated at 275 A, these connectors have been tested up to 275 A, with 4/0 AWG wire.

**Product Facts** 

- Color-coded modular housings: blue, black, white, green and red
- Genderless housings reduce inventory
- Cold-headed contact wire range: 2, 4, and 6 AWG
- Built-in interlocking features (dovetails) allow stacking and wire routing
- Self-wiping contacts increase product life and improve conductivity
- Integral stainless steel locking spring in housing for contact retention
- Rugged design

**Product Facts** 

- Color-coded UL 94V-0 housings: gray and blue
- Keying feature helps prevent two different voltage color-coded housings from mating
- Genderless housings reduce inventory
- Contact wire range: 2, 4, 6 and 8 AWG
- Molded-in panel mount grooves
- Integral stainless steel locking spring in housing for contact retention
- Rugged design
- File No. E28476 ເ 🕰 us

# Material and Finish

Housing—Polycarbonate, UL 94V-0 Retaining Spring—Stainless Steel Contacts-Copper with silver plating Reducing Bushings-Copper with silver plating

# **Electrical Characteristics**

Current Carrying Capability-115 A with 2 AWG Voltage Rating-600 V (both AC and DC) Dielectric Withstanding Voltage-2200 VDC Avg. Initial Contact Resistance-136 micro-ohms

# Mechanical Characteristics

Contact Retention-100 lbs. [444.8 N] Average Mating/Unmating Force—18 lbs. [80.1 N] Temperature Rating- -4°F to 221°F [-20°C to 105°C] Max. Wire Insulation Diameter-.6 [15.24] Wire Size Range-2-8 AWG

AMP-O-LECTRIC Model "G" Terminating Machines, Part Nos. 354500-1, -9, -11 (409-5842)

# AMP Power Series Tooling

Semiautomatic bench machines for crimping reeled terminals and contacts, featuring a quiet and reliable direct motor drive, microprocessor controls for ease of setup and operation, and guarding and lighting designed for operator convenience and safety. All models are equipped with either manual or automatic precision adjustment of crimp height. Machinemounted sensors are available for crimp quality monitoring using conventional miniature-style applicators. For more information, request Catalog 65828, Video 198116, Catalog 82275 [Crimp Quality Monitor (CQM)], Video 198094.

AMP 3K/40 and AMP 5K/40 Terminating Machines (409-10047)

The AMP 3K/40 and AMP 5K/40 Terminators are designed for customers that require the increased output and quality of a semiautomatic machine at a competitive price. By incorporating the most commonly requested features as standard and offering a long list of optional equipment, these terminators offer flexibility to meet the specific needs of various applications at the lowest possible cost.

- 3,000 lb [1361 kg] max. crimp force (AMP 3K/40); 5,000 lb [2268 kg] max. crimp force (AMP 5K/40)
- Toolless removal of applicators and guards
- Jog capability
- Quiet, fast operation 80/76 dBA and cycle time less than 0.400 seconds
- Accepts Heavy Duty Mini stye applicators
- Wide range of optional equipment such as toolless precision crimp height adjust, batch counter, CQM capability and work light

For more information, request Catalog 1654856.

# AMP-O-LECTRIC Model "K" **Terminating Machine** Part No. 1-471273-3 (409-5128)

AMP-O-LECTRIC Model "K" Terminating Machine with a permanently-mounted applicator that accepts interchangeable die sets to apply a variety of tapemounted terminals and splices. Many of the die sets can also be used in AMP-O-LECTRIC Terminating Machines with a tape applicator.

For more information, contact Tyco Electronics.

Stripping Module (for the AMP 3K/40 and AMP 5K/40 Terminating Machines and AMP-O-LECTRIC Model "G" Terminator)

The combination of the Stripping Module with the AMP 3K/40 and AMP 5K/40 Terminating Machines or the AMP-O-LECTRIC Model "G" Terminator provides an economic and proficient method of stripping the wire and crimping terminals on the same machine. The module accepts Endand Side-Feed HDM Applicators (32-14 AWG) and operates in three modes: crimp only, strip only, or strip and crimp. It can be installed on existing machines in the field or purchased as one unit from the factory.

For more information, request Catalog 1309085.

Power Applicator Part Number 68296-1 (Customer Manual 409-2661)

# AMP Power Series Tooling (Continued)

The Semiautomatic Power Applicator is designed to produce a carefully controlled uniform pressure crimp while providing a high rate of production. The applicator features matching dies that fully bottom at the completion of the crimp to provide proper crimp height. The one die set is fully adjustable to provide the full range of crimp heights for all wire sizes. 500 MCM Heavy Duty Cable Cutter Part No. 605742-1 (408-4557)

- Designed to cut aluminum or copper cable up to 500 MCM.
- Light weight tubular steel handles with hand grips
- 21" overall length

Cable Insulation Stripper/Slitter Part No. 606700-1 (408-9688)

• Used on single or multiple conductor cable up to 1.75" in diameter

Contact Extraction Tool Part No. 68265-1 or standard insulated screwdriver

# Product Facts

- Rated to 600 VAC (RMS)
- Flame retardant housings 94V-0
- Housings, adapters, and power terminals keyed for proper assembly
- Stackable housings provide easy wire routing and neat wire dressing
- Built-in interlocking features better resist shock and vibration
- Usable as in-line connector, or as panel and surface mount connector
- Available in six different colors for circuit coding and identification
- Choice of two power terminals accommodates 10-12 AWG and 14-16-18 AWG conductors
- Recognized 91 under the Component Program of **Underwriters Laboratories** Inc., File No. E28476

(SP̃∘

- CSA Certified, File No. LR7189
- VDE Registered #5133

Wire (WTW) Connectors provide a reliable and efficient means of interconemployed to carry up to

or networks. The WTW Connectors consist of mating hermaphroditic, flame retardant polycarbonate housings into which customer terminated power contacts are inserted. Stackable in four directions through the use of molded interlocking keyways, the connectors make wire routing and dressing orderly and easy to accomplish. More importantly, the built-in interlocking features on the connectors and the accessory mounting adapters provide better resistance to the effects of shock and vibration, keeping the interconnect more stable and secure.

The design features of the WTW Connector make it easily applicable to free hanging, surface mounted or panel mounted applications. By simply sliding the accessory mounting adapters into the molded keyways of the connector housing, a free hanging

connector can be transformed into a surface mount connector or a panel mount connector. Customer supplied 8-32 screws and nuts may be used to secure the connectors configured with the mounting adapters to printed circuit boards or distribution panels. The same hardware may be used to secure the connectors to pre-cut openings in the panels.

Furthermore, WTW Connector housings, mounting adapters and power terminals are all provided with alignment or keying features that make it difficult to improperly assemble and apply the connector. Alignment slots and tabs on the plastic connector housings provide for easy mating of the housings, even in the dark! Mounting adapters have a keyway on one side and a key on the other side providing for easy assembly to the connector by touch alone if necessary. And the power terminals have a side tab that helps prevent the incorrect insertion of the terminated conductor into the housing

Once inserted, the contacts firmly latch within the connector housing.

The WTW Connector system is available in six different and distinctive colors which makes circuit differentiation and identification possible. The crimped power terminals will accommodate either 10-12 AWG or 14-16-18 AWG stranded conductors. Depending upon the conductor size and the number of conductors in the connector configuration, the current rating ranges from 10 amperes to 55 amperes.

# Power Connectors for Industrial and Commercial Applications

AMP

# AMPINNERGY Wire-To-Board Connectors

#### AMPINNERGY Wire-To-Board (WTB) Connectors

Connectors provide a convenient and efficient means of delivering up to 600 VAC to component printed circuit boards and other power distribution devices in computers and peripherals, telephone systems and appliances. The WTB connectors also have automotive and industrial applications.

# Receptacles

The AMPINNERGY WTB connector receptacles can be installed on pc boards varying in thickness from .062 inch to .125 inch. A polarizing pin is provided on the vertical receptacle assembly to aid in proper positioning on the pc board. Both the vertical and right-angle assemblies are polarized for accurate mating to the plug assemblies. The receptacle assemblies are available in contact configurations ranging from two to eight positions.

# Plugs

The single piece plug housings are available in contact configurations to mate with the receptacles. The plug is equipped with positive latches to allow full and more secure mating to the respective receptacle.

A make-first/break-last feature is designed into position 1 of the plug assemblies to provide grounding protection.

### Contacts

The crimp contacts will accommodate either 10-12 AWG or 14-16-18 AWG conductors. The contacts latch firmly within the plug housing.

Right-Angle PCB Receptacles

# **Product Facts**

- Withstands vapor phase, infrared and wave soldering processes
- .040 minimum standoff to PCB
- Receptacles polarized to plug
- Contact centerline spacing: .440
- Overall height on PCB: .600
- Fits PCB thickness .062 through .125
- Contacts have dual solder posts for efficient heat dissipation, low millivolt drop and mechanical strength
- Positive latching to mating plug

# Material and Finish

Housing — Polyphenylene Sulfide, Black, 94V-0 Contacts — Tin Plated Copper Alloy

Catalog 1308885 Issued 3-05

# **Plug Housings**

# **Product Facts**

- One-piece housing
- Polarized to mating receptacles
- Positive latching to mating receptacles
- Accepts crimp contacts P/N 556880-2 and 556883-1
- Internal latching of crimp contact

# Material

Housing — Polycarbonate, Black, 94V-0

# **Technical Documents**

Various technical documents are available for your use:

**Product Specifications** describe technical performance characteristics and verification tests. They are intended for the Design, Component and Quality Engineer.

| 108-1349 | AMPINNERGY WTB Connectors |
|----------|---------------------------|
| 108-1373 | AMPINNERGY WTW Connectors |

**Application Specifications** describe requirements for using the product in its intended application and/or crimping information. They are intended for the Packaging and Design Engineer and the Machine Setup Person.

| 114-6044  | AMPINNERGY WTB Connectors   |
|-----------|---|
| 114-6051  | AMPINNERGY WTW Connectors   |
| 114-13071 | AMP Power Series 50 (Double-Pole) and 75 (Single Pole) Connector Assemblies   |
| 114-13107 | AMP Power Series 120 (Single- and Double-Pole) Connector Assemblies           |
| 114-13118 | AMP Power Series 175 (Double-Pole) and 180 (Single-Pole) Connector Assemblies |
| 114-13119 | AMP Power Series 350 (Double-Pole) Connector Assemblies                       |
| 114-13127 | AMP Power Series 15, 30 and 45 (Single-Pole) Connector Assemblies             |
| 114-13149 | AMP Power Series 180 (Single-Pole) Connector Assemblies                       |
|           |   |

**Instruction Sheets** provide instructions for assembling or applying the product. They are intended for the Manufacturing Assembler or Operator.

- 408-3198 Inspection of AMPINNERGY System Power Contacts
- 408-3236 Installation of AMPINNERGY WTB Connectors
- 408-3277 AMPINNERGY Wire-To-Wire Stackable Connectors
- 408-8636 AMP Power Series 50 Connector Assemblies
- 408-8868 AMP Power Series 175 and 350 Connector Assemblies with Cable Clamp Kits
- 408-4557 Heavy Duty Cable Cutter Hand Tool 605743-1
- 408-4559 Heavy Duty Cable Cutter Hand Tool 605744-1

# Related Product Catalogs

# Heavy Duty Seamless Terminals and Splices Catalog 1308674

The Heavy Duty Seamless and Copper Compression Lug and Splice line provides a robust terminal line for applications in the many industries. The product is used in applications including industrial and welding equipment, transportation/ marine cable harness, and general-purpose harnesses. The Heavy Duty Seamless line utilizes deep-draw stamping technology to create a robust terminal without butted seams along the wire barrel or along the outer edge of the ring tongue. The Heavy Duty Splice line offers butt splice versions with either flared or chamfered wire barrels for ease of wire entry and dimpled wire stops to assist in proper wire placement.

The Copper Compression Lug and Splice line is a formed tubular line for use on cable assemblies in Commercial equipment and Industrial machinery. The thicker tongue and wire barrel of this line provide added strength and rigidity for more challenging applications.

The Battery Lug and Splice line offers the thickest material and strength for your industrial equipment and

transportation harness applications.

Tyco Electronics has extensive drawn sleeve capabilities to help meet your customized electrical sleeve needs. The company manufactures specialized sleeves used in general electrical application and electrical components. Tyco Electronics has the capability to manufacture sleeves in a range of copper alloys and has extensive post electroplating capabilities. Contact us to review your application and discuss the benefits we can provide.

# Standard Terminals and Splices Catalog 82042

AMP solderless terminals and splices meet or exceed today's standards for reliable termination in applications ranging from control circuits to heavy duty power wiring.

The catalog describes only standard terminals and splices accommodating wire sizes from 26 AWG through 4/0 AWG

The terminals are pre-insulated and color coded by wire size for easy identification.

Funnel entry on many terminals allows for easy wire insertion for high speed production

Nylon or vinyl insulation provides high dielectric strength

The serration or dimple feature inside the terminal barrel provides maximum barrel contact and tensile strength

AMP's special plating process creates a high resistance to corrosion

Use of AMP application tooling is designed for uniform high quality terminations

UL, CSA, Military Approved

# AMPOWER Terminals and Splices Catalog 82025

The AMPOWER product line is available in a variety of terminal and splice styles to suit your design requirements.

AMPOWER terminals and splices are ideally suited for power generation and distribution. This makes electrical equipment subject to continuous operation, such as generators, motors and welders,

a perfect application for AMPOWER products. In addition, other applications include interconnections of power supplies to computers and peripheral equipment.

# Related Product Catalogs (Continued)

# SOLISTRAND, Budget and **DIAMOND GRIP Uninsulated Terminals and Splices** Catalog 65505

SOLISTRAND and Budget terminals and splices are specially designed to terminate solid and stranded wire, irregular shaped conductors, and combinations of these retaining the superior performance characteristics of single-purpose terminals and splices.

Corrosion resistance, vibration resistance and tensile strength of these terminals and splices are well within the limits of commercial and military specifications.

The Budget terminal is primarily the same as the SOLISTRAND terminals without the brazed seam in the wire barrel. These terminals and splices fulfill the need for an economical and electrically superior

termination where extreme vibration and tension on the wires are not present.

DIAMOND GRIP utilizes a tin plated copper insulation support sleeve with "V" notches. The sleeve eliminates fraying of the insulation or breaking of the conductor. The "V" notches lock the wire insulation against vibration and pullout.

# Tyco Electronics Power **Connectors and Interconnection** Systems Catalog 1773096

Tyco Electronics Power Connectors and Interconnection Systems Catalog 1773096 features the largest grouping of high performance power connectors from Tyco Electronics. Most of the products are geared specifically for the high-end

computer and telecommunications equipment markets, however, products for Industrial applications are included as well. The catalog includes power connectors mounted to printed circuit boards, discrete wires/cable assemblies and bus-bars. The "applications served" includes bulk power distribution from modular power supplies, low inductance connectors designed for microprocessor power delivery, backplane power interconnects meeting today's latest industry standards, and more. The newest products sold under the AMP and ELCON brands are now combined into a single comprehensive catalog.
