v. 070207

3M™ Fiber Connectors

Drawing on 70 years of adhesive expertise and 40 years of experience in ceramic technology, 3M provides convenient, reliable, and easy-to-install connectors for both fiber and copper networks.

3M™ Hot Melt Fiber Optic Connectors have a proven record of high yield and reliable performance in both indoor and outdoor local area networks around the world. 3M™ Crimplok™ Fiber Optic Connectors are ideal where there is no electricity or in difficult locations. 3M™ Volition™ VF-45™ Connectors offer unprecedented simplicity. 3M™ No Polish Connectors help enable a fast, on-site installation that eliminates field polishing.

All 3M fiber connectors meet ANSI/TIA/EIA-568B.3.

3M™ FIBER CONNECTORS

Hot Melt LC Connector

The only LC connector with hot melt adhesive. The LC connector offers all the advantages of the 3M hot melt technology, including fast installation, ease of termination, reliability, low insertion loss and very high yield. These singlemode and multimode connectors meet and exceed TIA 568B.3 requirements for both indoor and outdoor LAN applications. As with the 3M SC and FC hot melt connectors, there is no need for a syringe, applicator or mixing of epoxy with the LC connector.

FEATURES

BENEFITS

Hot melt factory injected adhesive	No epoxy mixing, no pot life, ready to install
Fast termination time	Can help reduce labor in field
Precisely engineered polishing fixture	Provides exacting fiber finish for low loss and reflection performance
Meets and exceeds TIA-568B.3 performance	Helps provide user reliability
Typically <0.2 dB in field insertion loss	Network optical budget headroom
Consistent quality and application process	Reliable termination, minimal call backs
Compatible with industry standard LC form	Intermateable with installed base
Utilizes current hot melt kit with additional LC expansion kit	Minimal new tool purchase for existing hot melt users

3M™ FIBER CONNECTORS

SC (Epoxy, Hot Melt, Crimplok™ and No Polish) Connector

3M has simplified the SC connector to enhance performance and cable retention and provide a readily field mountable connector. The SC epoxy connector complies with the NTT, JIS, ISO/IEC and TIA/EIA component and ISO/IEC, CENELEC, ANSI, TIA/EIA-568B.3 and cabling level standards. It features a rectangular push-pull coupling mechanism for easy insertion and high repeatability. The epoxy SC connector is available in singlemode and multimode.

3M Hot Melt SC connectors, available in singlemode and multimode, are preloaded with hot melt adhesive, enabling a field termination in less than two minutes. The SC connector is also available as the 3M™ Crimplok™ Connector, combining the speed of non-adhesive connectors with the performance characteristics of epoxy and hot melt connectors. Crimplok connectors are the ideal solution for emergency restoration work or where there is no power.

3M No Polish Connector (NPC) SCs utilize a one-piece, pre-assembled design that eliminates field polishing and loose parts. With a factory-polished ferrule assembly and a mechanical splice, the connector can be quickly installed – without electrical power – using a simple field tool. NPC is available in singlemode and multimode.

FEATURES

BENEFITS

FEATURES	BENEFITS
3M™ SC CONNECTOR (EPOXY)	
Intermateable within NTT specifications	No retrofit, compatibility issues
Push-pull mating	High density, repeatable connections
Pull-proof (independent) ferrule	Maintains optical contact
3M PC finish	Excellent transmission performance
Zirconia ceramic ferrule	Reduces reflection problems; Field polish \leq -45 dB reflection (singlemode only)
Thermoplastic shell	Corrosion resistant
Fewer parts	Fast, simple termination
Meets Telcordia (SM) and EIA/TIA (MM)	Reliable long-term performance
3M™ HOT MELT SC CONNECTOR	
Pre-loaded hot melt adhesive	Extended shelf life, fewer consumables (can save money)
No waiting for epoxy to cure	Termination in two minutes (productivity)
Single-step polish for multimode	Only one abrasive to buy; faster polishing (reduces cost)
Meets EIA/TIA-568B.3	Rugged, reliable performance
3M™ CRIMPLOK™ SC CONNECTOR	
Non-adhesive design	Clean and simple terminations
No set-up required	Helps save time and money
No waiting for epoxy to cure	Termination in less than one minute with fully prepared fiber
No power required	Installation anywhere
Meets EIA/TIA-568B.3	Rugged, reliable performance

3M™ FIBER CONNECTORS

ST (Epoxy, Hot Melt and Crimplok™) Connector

3M has simplified the ST connector to help enhance performance and cable retention and provide a readily field mountable connector. The ST epoxy connector complies with the NTT, JIS, ISO/IEC and TIA/EIA component and ISO/IEC, CENELEC, ANSI, TIA/EIA-568B.3 and cabling level standards. The epoxy ST connector is available in singlemode and multimode.

3M Hot Melt ST connectors, available in singlemode and multimode, are preloaded with hot melt adhesive, enabling a field termination in less than two minutes. The ST connector is also available as the 3M™ Crimplok™ Connector, combining the speed of non-adhesive connectors with the performance characteristics of epoxy and hot melt connectors. Crimplok connectors are the ideal solution for emergency restoration work or where there is no power.

FEATURES

BENEFITS

FEATURES	BENEFITS
3M™ EPOXY BAYONET ST CONNECTOR	
Bayonet design	Quick interconnect
Keyed connector	Provides high repeatability
Pre-radiused PC ferrule	Provides contact of fibers; low reflection, consistent performance
Zirconia ceramic ferrule	Durability; stability through temperature change; quality performance
Meets TIA/EIA 568B.3	Rugged, reliable performance
3M™ HOT MELT BAYONET ST CONNECTOR	
Pre-loaded hot melt adhesive	No epoxy to mix; no syringe needed; shorter set-up time; fewer consumables; no shelf life; no mess; no waste
Fast cure time	Short heat and cool cycle; can save time
Unlimited adhesive shelf life	Virtually eliminates outdated epoxy inventory and stock rotation requirements
No crimping required	Fewer tools; saves time
Pre-radiused PC ferrule	Provides contact of fibers; consistent performance
Zirconia ceramic ferrule	Durability; stability through temperature change; quality performance
Meets TIA/EIA 568B.3	Rugged, reliable performance
3M™ CRIMPLOK™ ST CONNECTOR	
Non-adhesive design	Clean and simple terminations
No set-up required	Helps save time and money
No electricity required	Installation anywhere
Meets TIA-568B.3 specifications	Rugged, reliable performance

3M™ FIBER CONNECTORS

FC/PC (Epoxy/Hot Melt) Connector

The FC connector is a field mountable, pull-proof connector that is designed to be fully compatible with all FC connectors adhering to the NTT specification. The FC connector will help maximize termination yield through ease of mounting and a high performance polishing procedure.

The three-piece connector design (connector, crimp ring, and boot) is mounted using the same simple process used for other 3M connectors. The FC connector is available in singlemode and multimode utilizing epoxy adhesive. It is also available in singlemode and multimode preloaded with 3M's hot melt adhesive, enabling a field termination in less than two minutes for multiple terminations.

All 3M FC connectors meet the requirements of TIA/EIA-568B.3 (including composite ferrules). Singlemode epoxy connectors are compliant with Telcordia GR-326-CORE.

FEATURES

BENEFITS

FC CONNECTOR

Pull-proof (independent) ferrule	Maintains optical contact
Compatible with FC NTT specifications	Versatility; convenient global source
Pre-radiused PC ferrule	Fiber centered in radius, improved performance
Zirconia ceramic ferrule	Helps reduce reflection problems; Field polish ≤-45 dB reflection (singlemode epoxy only*)
High strength thermoplastic housing	Virtually eliminates flaking of metal plating
Keyed threaded connector	High repeatability, can improve stability of system

HOT MELT VERSION ONLY (IN ADDITION TO ABOVE)

Pre-loaded hot melt adhesive	Extended shelf life, fewer consumables (can save money)
No waiting for epoxy cure	Termination in two minutes
Single-step polish for multimode	Only one abrasive to buy; faster polishing (can reduce cost)

*When mated with another connector with the same polish

3M™ VOLITION™ VF-45™ FIELD MOUNT PLUG

Facilitates the use of consolidation point designs, helps enable emergency link creation through field-made cable assemblies, and allows custom length cable assemblies to be made on site. It is terminated onto Volition two-fiber cable with the quick install kit, the same kit used for the VF-45 socket. An additional plug actuation tool is required and ordered separately.

SPECIFICATIONS

VF-45 field mount plug interconnected with VF-45 sockets conform to the following combination of TIA and 3M performance specifications:

TEST	TEST CONDITION/REQUIREMENTS	TYPICAL RESULTS 50	TYPICAL RESULTS 62.5
Attenuation	< 0.75 dB max	850 nm Avg. = -0.35, Std. Dev. = 0.11, 1310 nm Avg. = -0.31, Std. Dev. = 0.10 dB	850 nm Avg. = 0.34, Std. Dev. = 0.10, 1310 nm Avg. = 0.26, Std. Dev. = 0.09 dB
Reflection	> 20 dB max	850 nm Avg. = -34.31, Std. Dev. = 1.21, 1310 nm Avg. = -35.91, Std. Dev. = 1.46 dB	850 nm Avg. = 27.8, Std. Dev. = 1.27 dB, 1310 nm Avg. = 29.3, Std. Dev. = 1.55 dB
Mating durability	500 cycles, < 0.75 dB max	Pass	Pass
Strength of coupling	> 33 N, < 0.75 dB max	Pass	Pass
Plug flex	100 cycles, ± 90 degrees, 0.5 kg, < 0.75 dB max	Pass	Pass
Plug twist	10 cycles, ± 2.5 revolutions, 15 N, < 0.75 dB max	Pass	Pass
Cold	-0°C for 96 hours, < 0.3 dB increase	Pass	Pass
Heat	+60°C for 4 days, < 0.3 dB increase	Pass	Pass

To order, call 800/426 8688. For more information, please contact your local 3M representative.				

3M™ Fiber Optic Termination Kits and Accessories

3M fiber optic termination kits and accessories provide tools and materials necessary to terminate the major fiber optic connectors found in the industry today.

Conversion kits make it easy to incorporate both an epoxy process and a hot melt process into one kit. Most kit parts are available separately to supplement existing kits and replenish consumables.

Videos, training classes and detailed manuals are available to assure the best results.

3M™ FIBER OPTIC TERMINATION KITS AND ACCESSORIES

Hot Melt Kits

Hot Melt Kit (120V)
PRODUCT NUMBER: 6365 PKG: 1 KIT MIN. ORDER: 1 KIT UPC: 051115-16146

Hot Melt Kit (230V)
PRODUCT NUMBER: 6361 PKG: 1 KIT MIN. ORDER: 1 KIT UPC: 051115-16146

The 6365 and 6361 hot melt termination kits contain all materials necessary to terminate hot melt SC, ST and FC Connectors.

3M™ FIBER OPTIC TERMINATION KITS AND ACCESSORIES

Hot Melt Auto Polisher 6850A

The 6850A hot melt polishing machine features a single-paper technology for polishing the ferrule of a single hot melt ST connector. It has a 12-volt DC unit that provides hands-free operation and is designed to deliver consistent performance. Adapters for polishing ferrules of FC and SC connectors are available.

Auto Polisher 120v

PRODUCT NUMBER: **6850A** PKG (LBS.): 1 KIT (8.90) MIN. ORDER: 1 KIT UPC: 051138-11516

3M™ FIBER OPTIC TERMINATION KITS AND ACCESSORIES

Volition™ VF-45™ Reference Test Cable Set

Reference cable kits enable connections to test equipment with the ST, SC or FC connector interface. Essential for creating a reference reading prior to link testing, they can be used with other manufacturers' test equipment.

The transmit cable consists of a VF-45 plug on one end and a choice of either 2 ST, SC or FC connectors on the other end. The receive cable has a VF-45 socket housed in a protective casing on one end and at the other end there are either 2 ST, SC or FC connectors.

3M™ FIBER OPTIC TERMINATION KITS AND ACCESSORIES

Epoxy Termination Accessories

The following accessory items may be added to enhance typical epoxy termination kits available from a number of fiber optic distributors in the industry. These 3M items are designed to optimize the termination of 3M epoxy connectors to meet Telcordia TR-326-CORE specifications.

The soft polishing pad, polishing jig and 3M lapping films optimize the fiber end face finish for low light loss and low reflection in high speed laser systems.

The 8692 epoxy has been tested to Telcordia specifications to assure 3M connectors meet the most stringent environmental requirements.

The syringe with the proper FP-25DT epoxy dispensing tip is important to deliver epoxy into the connector ceramic ferrule without epoxy bleed back that might foul the coupling mechanism.

The 8366 and 8367 conversion kits include an angle polishing jig and additional 3M lapping film to complete the 3M SC and FC / APC angle connectors to meet -65 dB reflection with a field hand polish.

3M™ COPPER CONNECTORS, RJ45 JACKS

3M™ Volition™ Cat. 5e and Cat. 6 RJ45 Keystone Jacks

Cat. 5e and Cat. 6 RJ45 keystone jack design provides consistent and repeatable results. The jack offers tool-less installation, optimized for maximum system performance and reliability; they can be reused many times. The integral shutter protects the contacts from dirt and dust and provides reliability.

FEATURES

BENEFITS

Tool-less installation	No punch down tool, saves time
Keystone dimensions	Compatible with common face plates
Integral dust protection	Protects contacts

3M™ FIBRLOK™ SPLICES

Fibrlok II Universal Optical Fiber Splice 2529

The Fibrlok II 2529 optical fiber splice provides a precise, simple and low cost method of splicing optical fiber. The splice design utilizes an articulated metallic splicing element held inside a molded plastic body and cap to provide a fast, permanent, low-loss splice.

Assembly of the inexpensive Fibrlok II splice requires only removal of the fiber coating, and cleaning and cleaving of the fiber. Whether your application is aerial, buried, underground or pedestal; outside plant or inside building; the Fibrlok II 2529 universal optical fiber splice is the ideal solution for all your splicing needs.

Fibrlok Multi-Fiber Optical Splicing System 2600 Series

The Fibrlok multi-fiber splicing system uses field proven splice technology to provide fast, efficient and permanent splicing of multiple fibers, designed to minimize training, specialized skills or experience.

The system consists of a consumable splice “module” and associated tools. Splices are available in 4-, 8- and 12-fiber versions.

The Fibrlok multi-fiber splice uses the same easy strip, clean, cleave and splice procedure as the Fibrlok II optical fiber splice. A complete splice can be assembled in less than five minutes, ideal for new construction and cable restoration.

The Fibrlok 2600 series multi-fiber optical splice accommodates singlemode or multimode fibers with a nominal cladding diameter of 125 microns. Splices accommodate both ribbon cable construction and individual 250 micron plastic-coated fibers. Color-coded versions are available.

Please refer to the Fiber Outside Plant Products section of the catalog for additional information. See pg. 217.
