

**D-3000 Series (Wire-to-Board, Wire-to-Panel and Wire-to-Wire)**

**List of Products by Application**

Used for both signal circuit and power/power supply circuit applications.

Able to carry 15A max. of current per position and are available in a full range of connector configurations including wire-to-wire, panel-mounting, free hanging, and horizontal and vertical wire-to-board mounting.

D-3000 Series

**D-3100S**  
**Standard 1-Row Type**

D-3100S Free-Hanging Type

**D-3100M**  
**Standard Modular Type**

All connector configurations available as with the standard one-row type line.

**Performance Specifications**

Item	Pitch	150mil (3.81mm)	200mil (5.08mm)
	Voltage Rating		250 V
Current Rating		1-position : 15A 3-position : 12A 6-position : 10A 16-position : 8A (when using #16 AWG wire)	
Contact Resistance		10mΩ max.	
Dielectric Withstanding Voltage		1,500 V	2,200 V (1 minute)
Operating Temperature		-55°~+105°C	

Generally, the current value of connector is shown as per position. The current rating of this product is 15A as shown in the table. Note that in all circumstances it is the value per position. As the number of positions increases, this value decreases. This decrease can be calculated from the table and the current curve shown in the graph below.

Example:

- With a 6-position connector, 10A of current per position or a total of 60A (max) can be carried as shown in the table.
- With a 10-position connector, 8.5A of current per position or a total of 85A (max) can be carried as indicated by dotted lines in the graph below.

\*When connectors are used singly.

**Number of Positions vs Current Curve (reference)**

**Material and Finish**

Description	Material	Finish
Receptacle contact Tab contact	Copper alloy	Bright tin plating and gold plating with underplated nickel (1.27μm)
Tab post	Copper alloy	Tin plating and gold plating with underplated nickel (1.27μm)
Housing	UL94V-0 rated glass filled polyester (PBT) and PPS (SMT Type), black color.

<sup>1</sup> Enter the following plating code in Part Number suffix-□ :

- 2 = 0.38µm thick gold plating
- 3 = 0.76µm thick gold plating
- 5 = Tin plating

Note: Solder-type Contact: We do not manufacture solder-type contacts for this specific application.

\* Strip Form contacts are for use with Mini-Applicators (automachines) and Loose-Piece contacts are for Hand Tools.

\*\* Mini-Applicators are for use with automachines. (See page 40. For Part Numbers, contact Technical Support.)

**Hand Tools**

Standard Type

Uses	For General Production
Can it be used for repairing?	Yes
Approximately how many cycles of crimping can be performed?	50,000
What is Minimum Order Quantity?	1

**D-3000 Series** (Continued)

**Application Tooling**

(Continued)

**Hand Tool**

This hand tool is designed to be capable of handling most Factory Automation (FA) related crimping operations by a single tool in order to simplify harness fabrications suited to the specific needs of FA market. The equipment forming the nucleus of the FA system includes PCs, CNCs, servodrivers and servomotors. And the wire used in connecting this equipment ranges in wire size from #26-20 AWG which applies to signal circuits to #18-16 AWG which is for power circuits (See Sketch below).

Crimping Range A, B, and C are for explanation purposes only and are not marked on the tool body.

**For right-handed use**  
**Hand Tool P/N : 58571-1**  
**Die Set P/N : 58571-2**

The frame of right-handed tool has the same configuration as that of Economy Type (II) and PRO-CRIMPER II Hand Tool (See PRO-CRIMPER Hand Tool Catalog). So die sets are interchangeable.

**AMP-3K/40 and AMP-5K/40 Terminating Machines**

Mini-Applicator  
Minimum Quantity : 1

Contact Technical Support for  
Mini-Applicator Part Number

The AMP-3K/40 and AMP-5K/40 Terminators are designed for customers that require the increased output and quality of a semi-automatic machine at a competitive price. By incorporating the most commonly requested features as standard and offering a long list of optional equipment, these terminators offer flexibility to meet the specific needs of various applications at the lowest possible cost.

- 3,000 lb. [1361 kg] max. crimp force (AMP-3K/40)
- 5,000 lb. [2268 kg] max. crimp force (AMP-5K/40)
- Toolless removal of applicators and guards
- Jog capability
- Quiet, fast operation — 80/76 dBA and cycle time less than 0.400 seconds
- Accepts Heavy Duty Mini style applicators
- Wide range of optional equipment such as toolless precision crimp height adjust, batch counter, CQM capability and work light
- Order Catalog 1654856 for specifications and part numbers

D-3000 Series

**AMP-O-LECTRIC Model G Terminating Machine**

The Model "G" Terminator is the most advanced design in the long-standing series of AMP-O-LECTRIC machines for terminating wire using reeled terminals and contacts. It features a reliable direct motor drive system. Its modular construction enables it to be used either as a bench-top unit, or in combination with fully-automatic lead-making equipment. For operator convenience, access to and lighting in the target area has been improved and the Crimp Quality Monitor (CQM) has been moved to eye level for bench-top use. The Model "G" is also quieter, plus improved guarding meets applicable European and domestic safety requirements.

- Quieter
- Improved guarding and lighting
- Toolless changeover of applicators
- Precision manual- or auto-adjust for crimp height
- Total and batch counter
- Accepts all existing Tyco Electronics miniature applicators, with minor modifications
- Reduced maintenance requirements
- Request Catalog 65828 for specifications and part numbers

**AMP-O-MATIC Side-Feed Stripper/Crimper Machine**

This semiautomatic bench machine strips and terminates wire in a single operation. You simply position the wire against a spot illuminated on the wire stop and cycle the machine. In the automatic mode, the machine cycles when the wire touches the wire stop.

Using interchangeable applicators, this versatile machine is ideal for terminating jacketed cable with a variety of pin and socket contacts. Applicators are also available for non-AMP products.

- Strip and terminate wires 32-14 AWG [0.03-2mm<sup>2</sup>]
- Fast set-up times: 10 minutes or less
- Illuminated target area
- Convenient scrap removal
- Select foot switch or wire-sensor mode of operation
- Request Catalog 65004 for specifications and part numbers

**D-3000 Series** (Continued)

**Application Tooling**

(Continued)

**Extraction Tool**

This tool is used to extract contacts from wire-type tab/receptacle housings.

**Part Number: 234168-1**  
(411-5726)

\*Take care not to insert into the Contact Section.

① Insert Extraction Tool into the narrow section of the upper convex cavity of housing in the direction as shown (Make sure the Tool's top and bottom are in correct position.)

② The Extraction Tool tip lifts up housing lance, making contact free.

③ Contact can now be pulled out.

D-3000 Series

**Keying Plug**

(used to help prevent misinsertion)

Keying plug is used to minimize the possibility of contacts being inserted in wrong directions when using connectors of the same size end-to-end.

**Part Number: 175855-1**

**Tab Contact Cutting Tool**

**Part Number: 919041-1**

**How To Use Plug and Tool**

\*Some of the products in this Series (D-3100S/D-3100M/D-3200S/D-3200M) are preloaded with keying plugs to help prevent misinsertion.

① Insert a keying plug in one position of receptacle Housing.

② Twist off a tab in the corresponding position of mating Tab Header and empty that position. To twist off the tab, insert Cutting Tool into its root and turn Tool as shown.

\* For Tab housing (Panel/Free hanging Types), leave Housing empty by not inserting a contact in one position.

③ This being done, contacts cannot be inserted in wrong direction.

**D-3000 Series** (Continued)

**Connector Mounting Hardware**

**L Fittings**

Used to secure free-hanging type tab housings onto panels. Applicable housings are specified in the table of housings.

Part Number: 900121-2 (S)

**External Dimensions**

Part Number: 900121-2 (S)

The location where housing is attached varies by Series and size. Check with sample.

**Push Rivets**

Used to secure panel-type tab housings onto panels (Use as handy mounting hardware. Cannot be used with larger sized housings or those that are frequently inserted and withdrawn).

Recommended panel hole dimension

Part Number	Panel Thickness	Dimensions					Insertion Force	Retention Force
		A	B	C	D	E

**D-3100M — Modular Type**

**Appearance**

Connectors can be used in modular configurations in combination with D-3100S. Ideally Suited For Allocation of Signal Circuits  
 Board mounting pitch: Horizontal Type 150x150mils (3.81x3.81mm) / Vertical Type 150x300mils (3.81x7.62mm)  
 Dielectric Withstanding Voltage: 1,500V (for one minute)  
 Voltage Rating: 250 V
