MATERIALS

- 1. INSULATION SLEEVE: Heat-shrinkable, radiation cross-linked polyethylene with a polyethylene-based hot-melt adhesive liner. Color per table.
- 2. CRIMP SPLICE: Tin-plated copper alloy.

BASE METAL: Copper Alloy C110 or better. PLATING: Tin plated per MIL-T-10727, Type 1.

APPLICATION

- 1. These parts may be used to obtain a one-to-one in-line (butt) splice in wires meeting the size range and diameter restraints specified herein and having a temperature rating of not less than 85°C.
- 2. *øA: (a) Minimum diameter as received: Wire insulation diameter must be less than this value.
 - (b) Maximum diameter after recovery: Wire insulation diameter must be larger than this value to obtain an environment resistant splice.
- 3. Wires are to be stripped per table, inserted into opposite ends of the crimp barrel, crimped with a Raychem AD-1522 tool (or equivalent). The sleeve must be heated along its whole length until the crimp marks are gone and the ends of the sleeve recover onto the wires.
- 4. Spliced assemblies will meet the requirements of Raychem Specification D-5203.
