Pictured on the front:

- 1 Custom 4-cavity receptacle shell
- 2 GPRB2 vertical shell & strain relief assembly
- 3 GPRB2 GAIN shell - with spring-loaded, float-mounting design
- 4 GPRB1 plug shell w/F12 LuxCis® insert and termini installed
- 5 F12 LuxCis® sleeve holder
- 6 Size 22 posted PC tail pin, Size 20 crimp pin, Size 5 Coax contacts
- 7 GPRB2 receptacle shell, with 30 & 40 position inserts installed
- 8 30 position insert with terminated Size 20 Pin contacts installed
- 9 Custom 40 position pin insert with PC tail contacts installed
- 10 GPRA plug shell assembly and 14M socket insert assembly
- 11 GPRA 14M pin insert assembly

Introduction

Product Facts

- A high density solution compared to circular connectors
 - Slim shell design with high contact density
 - Stackable shells that do not require additional space for locking and unlocking the connectors
 - Uses two to three times less space
- A versatile solution suitable for disconnect panels or equipment with three mounting styles:
 - Rack
 - Cable to cable
 - Panel mounting
- A modular concept with a large variety of options
 - Shell can accommodate a wide variety of inserts for signal, power, coax, data bus and fiber optic contacts
 - Optional grounding blocks (to meet FAA HIRF requirements)
 - Pin and socket inserts can be mounted on either plug or receptacle shells
- A cost savings and user friendly solution
 - Inserts can be wired in the shop and later installed in the shells
 - A common panel cut out eases the connector installation and reduces cost
 - Inserts can be easily installed and removed from the shell
 - Inserts and shells are keyed to prevent mismatching
 - Standard MIL tools for contact crimping and contact insertion/extraction
 - Field replaceable sub assemblies
 - Vibration resistant self-locking threads

A Smart Connector

Tyco Electronics is recognized in the Aerospace and Defense industry for its global offering in interconnect solutions. The General Purpose Rectangular A & B Series connectors complement our ARINC connector line and provide additional flexibility with improved performance in a smaller mating area compared to standard circular MIL-Spec connectors.

The GPRA and GPRB series offer a wide range of solutions based on two insert sizes, a large variety of shells and contacts. The GPRA and GPRB series provides an excellent trade-off between the number of available contacts and the space actually used. GPRA inserts are a good option for low density applications whereas GPRB inserts offer twice the density of GPRA inserts. In addition, the concept is completely modular and expandable.

They can also be easily tailored for custom requirements, such as shell modifications for additional inserts.

New Features

Connector Interface

Connectors for Gallery Insert (GAIN) Equipment:

- Page 25 lists the GPRB2 shells, insert arrangements, contacts, seal plugs, strain reliefs and cable that will be used, per ARINC 810. This is the standard connector interface for new gallery equipment such as ovens and beverage makers for new commercial aircraft. This includes the twin-axial cable and contacts needed for the CANBUS data bus system used for GAIN.

Shells

GPRB1

- Shells have been improved to a greater level of performance under vibration. Also EMI performance has been maintained while eliminating the need for separate EMI springs.

GPRB2

- A new GPRB2 shell with mounting holes of 4.3 mm as been added (PN 1877335-1)
- A new 90° exit, low-profile metal backshell has been added (PN 1877338-1)
- Two vertical (square) shell configurations added, along with a strain relief (see page 12)

Insert Arrangements

- New insert configurations for high speed data transmission - both fiber and quadrax
- GPRB - Fiber Optics
 - F12 - holds up to 12 LuxCis® fiber optic termini (see page 20)
 - M2 - holds two 4-channel Mini-Expanded Beam inserts (see page 21)
- GPRB - Quadrax
 - Size 8 quadrax contacts can be used in three insert arrangements - 10Q2, 25Q1 and 3Q3
 - Quadrax contacts available for use are listed in our Quadrax catalog #1654012. These feature the exclusive Tyco Electronics one-piece dielectric that makes our quadrax contacts the easiest to install. If sealing is required with quadrax or twinax contacts, there is a size 8 seal boot assembly (PN 1877626-1) that is available. Use of this seal boot provides 50,000 foot altitude immersion protection as tested per Boeing Spec BPS-C-179.

GPRB2 fitted with 80x size 22 contacts

MIL-C-38999 21-35 fitted with 79x size 22 contacts

LuxCis is a trademark of Radiall S.A. Product is manufactured under license from Radiall S.A.

Introduction (Continued)

GPR A1

2 quarter-turn fasteners
 16 keying positions
 Max. density:
 20 x #22 contacts

GPR B1

2 quarter-turn fasteners
 16 keying positions
 Max. density:
 40 x #22 contacts

GPR B2

1 central jackscrew/jacknut
 12 keying positions
 Max. density:
 80 x #22 contacts

Contacts

Electrical characteristics conform to MIL-C-39029 Type A

Electrical Characteristics

Grounding Block Contact

	Contact with Wire Size	Current Amps
Contact to Contact	Contact + 20 AWG	7.5
Contact to Mounting Surface	Contact + 20 AWG	7.5

Contacts

Contact Size	Wire Size	Current Amps
22	26 AWG	2
	24 AWG	3
	22 AWG	5
20	20 AWG	7.5
16	16 AWG	13
12	12 AWG	23
5	8 AWG	80 ¹

¹ Size 5 contacts are not part of MIL-C-39029 type A.

EMI Shielding Effectiveness

Frequency (MHz)	Leakage Attenuation (dB)
100	65
200	63
300	63
400	62
500	60
600	60

Mechanical Characteristics

Mating/Unmating Durability — 100 cycles

Mating Torque for GPRB2 Jackscrew — 1.2 Nm [11 in. lbs.]

Random Vibration —

GPRB1/GPRB1 — 20g (MIL-STD-1344/Method 2005.1, test condition 4)

GPRB2 — 41.7g (MIL-STD-1344/Method 2005.1, test condition 6)

Shock — 50g (MIL-STD-1344/Method 2004.1, test condition A)

Environmental Characteristics

Temperature Range — -65°C to +155°C [-85°F to +311°F]

Temperature Life — 1000 h @ 155°C [311°F]

Salt Spray — 96 hours (Nickel plating) (MIL-STD-1344/Method 1001.1, test condition A)

Humidity — 10 days

Altitude Immersion — 3 cycles at 15,240 m [50,000 ft.] (MIL-STD-1344/Method 1004.1)

Fluid Immersion — (MIL-STD-1344/Method 1016)

Dielectric Withstanding Voltage (MIL-STD-1344/Method 3001.1.1 with Leakage Current < 1 mΩ)

Level	Voltage (VRMS)
Sea level	1500
15,240 m [50,000 feet]	800

Insulation Resistance (MIL-STD-1344/Method 3003.1)

Ambient Temperature	
	> 5,000 MΩ
175°C [347°F]	> 200 MΩ

Other Characteristics

Shell to Shell Conductivity — < 2.5 mΩ

Operating Voltage — 400 Vrms or 500 Vdc at sea level

Voltage Stability (Ground Block) — Maximum variation 4mV (MIL-T-81714)

Magnetic Permeability — < 2

Comparative Tracking Index — 250 V

Contact Retention — (MIL-STD-1344/Method 2007.1 on terminated connectors)

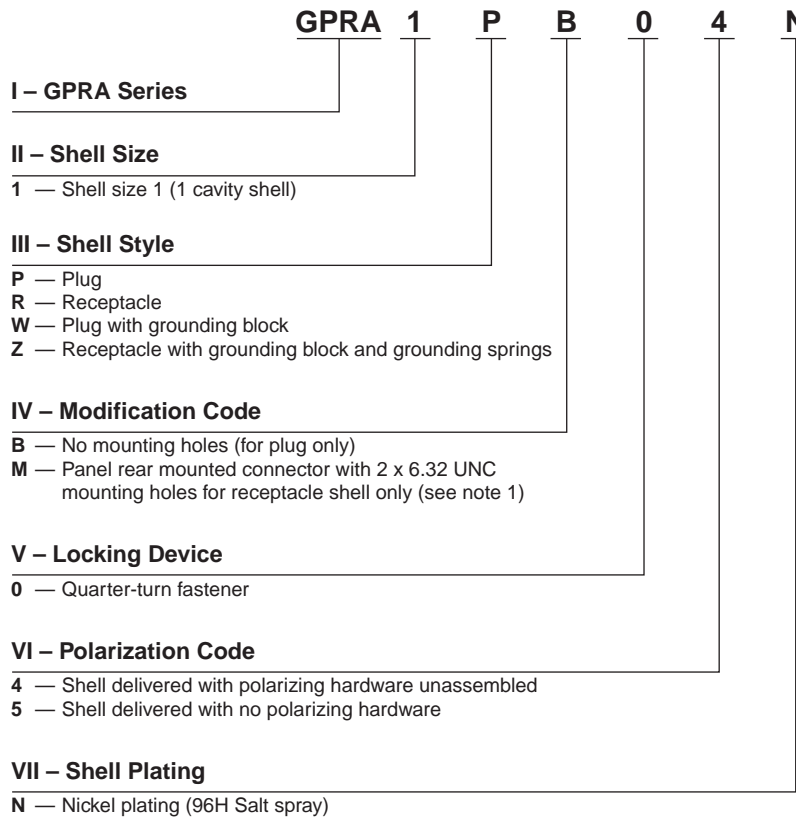

Contact Size	Retention Force	Max. Displacement
Ground Block	88 N [20 lbs.]	0.3 mm [.012 in.]
22	53.4 N [12 lbs.]	0.38 mm [.015 in.]
20	89 N [20 lbs.]	0.38 mm [.015 in.]
16	111.2 N [25 lbs.]	0.38 mm [.015 in.]
12	133.45 N [30 lbs.]	0.38 mm [.015 in.]

Insert Retention — 500 N [112 lbs.] (MIL-STD-1344/Method 2010.1)

GPRA1 Shell Descriptive Part Number Format

Descriptive Part Numbering System

Use this guide to construct descriptive part numbers for GPRA1 shells. Refer to table below for the corresponding Tyco Electronics Part Number.

Note 1: Self-locking mounting holes are designed for rear panel mounting.

Size	Style	Modification	Locking Device	Polarization Hardware	Plating	Descriptive Part Number	Tyco Electronics Part Number
1	Plug	No mounting holes	1/4-Turn Fastener	Kit: Shell & Hardware Unassembled	Nickel	GPRA1PB04N	1738228-1
				No Hardware		GPRA1PB05N	1738229-1
	Plug, with Grounding Block	Rear Panel Mount, with two 6-32 UNC holes		Kit: Shell & Hardware Unassembled		GPRA1WB04N	1738230-1
				No Hardware		GPRA1WB05N	1738231-1
	Receptacle			Kit: Shell & Hardware Unassembled		GPRA1RM04N	1738232-1
				No Hardware		GPRA1RM05N	1738233-1
Receptacle, with Grounding Block & Grounding Springs		Kit: Shell & Hardware Unassembled	GPRA1ZM04N	1738234-1			
		No Hardware	GPRA1ZM05N	1738235-1			

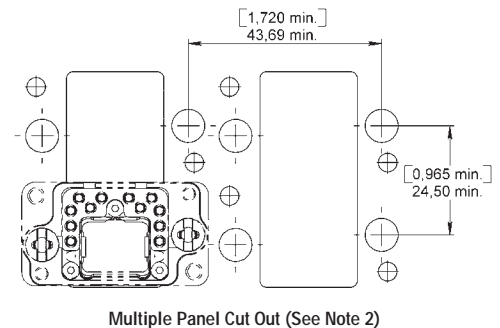

GPRA1WB05N

GPRA1ZM05N
Panel Rear Mounted Connector

GPRA1 Shell Dimensions

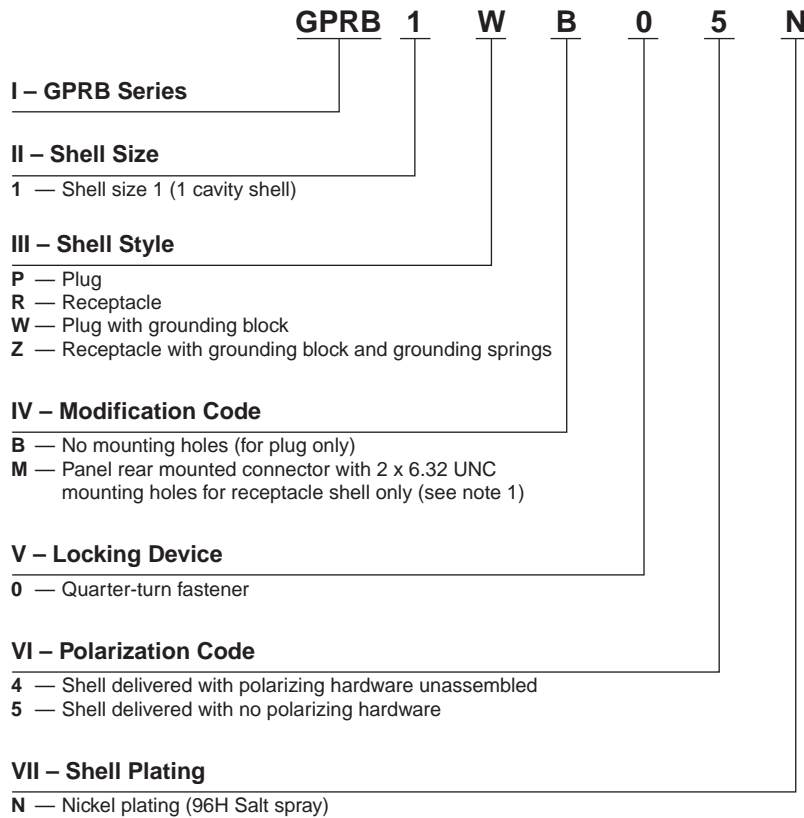

Note 1: Maximum dimension for inserts with grommets (Part Number GPRAE and GPRAH)
Note 2: Rear mounting side view with key post oriented to the upper side (receptacle only)

GPRB1 Shell Descriptive Part Number Format

Descriptive Part Numbering System

Use this guide to construct descriptive part numbers for GPRB1 shells. Refer to table below for the corresponding Tyco Electronics Part Number.

Note 1: Self-locking mounting holes are designed for rear panel mounting.

Size	Style	Modification	Locking Device	Polarization Hardware	Plating	Descriptive Part Number	Tyco Electronics Part Number
1	Plug	No mounting holes	1/4-Turn Fastener	Kit: Shell & Hardware Unassembled	Nickel	GPRB1PB04N	1738236-1
				No Hardware		GPRB1PB05N	1738237-1
	Kit: Shell & Hardware Unassembled			GPRB1WB04N		1738238-1	
	No Hardware			GPRB1WB05N		1738239-1	
	Receptacle	Rear Panel Mount, with two 6-32 UNC holes		Kit: Shell & Hardware Unassembled		GPRB1RM04N	1738240-1
				No Hardware		GPRB1RM05N	1738241-1
	Kit: Shell & Hardware Unassembled			GPRB1ZM04N		1738242-1	
	No Hardware			GPRB1ZM05N		1738243-1	

GPRB1WB05N

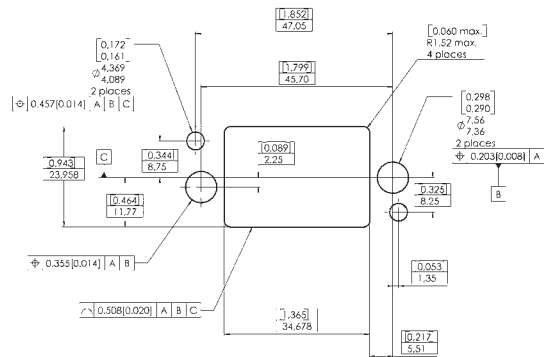

GPRB1 Shell Dimensions

**Receptacle Without Grounding Block
GPRB1RM05N**

**Plug Without Grounding Block
GPRB1PB05N**

**Single Panel Cut Out
(See Note 2)**

**Receptacle With Grounding Block
GPRB1ZM05N**

**Plug With Grounding Block
GPRB1WB05N**

**Multiple Panel Cut Out
(See Note 2)**

Note 1: Maximum dimension for inserts with grommets (Part Number GPRBE and GPRBH)
 Note 2: Rear mounting side view with key post oriented to the upper side (receptacle only)
 Note 3: Only insert with keying A can be used with GPRB1 shells

GPRB2 (Horizontal) Shell Descriptive Part Number Format

Descriptive Part Numbering System

Use this guide to construct descriptive part numbers for GPRB2 shells. Refer to page 11 for the corresponding Tyco Electronics Part Number.

- Notes: 1. The standard modification codes for these shells are B, D or L.
 2. With modification codes A or B only.
 3. Self-locking mounting holes are designed for rear panel mounting.
 4. Jackscrew/Jacknut can be mounted on either plug or receptacle shell. However, the standard options are:
 —Jackscrew for plug shells
 —Jacknut for receptacle shells
 5. Option 3 in paragraph V cancels the polarization code paragraph IV, i.e. the shell is delivered with no polarizing device.
 6. Pin/Socket polarization guides can be mounted on either plug or receptacle shells. However, the standard options are:
 —Pin polarization guide for plug shells
 —Socket polarization guide for receptacle shells
 7. Polarizing device is delivered unassembled, it must be locked with resin by the user (LOCTITE™ 272 must be used).
 —if no polarizing device is required, omit this step and go to VII.

Descriptive Part Numbering System

Use this guide to construct descriptive part numbers for GPR & B inserts. Refer to pages 15–18 for the corresponding Tyco Electronics Part Number.

Insert Descriptive Part Number Format

- Notes: 1. Inserts are designed for rear release contacts.
 2. For GPRB2 shells, use one insert keyed A and one insert keyed B.
 For GPRB1 shells, use one insert keyed A only.
 3. Pin and socket inserts can be installed in either plug or receptacle shell.

GPRA Insert Part Numbers

Series	Contact Arrangement	Contact Type	Classification	Keying	Descriptive Part Number	Tyco Electronics Part Number	
A	00	N/A	Dummy Insert	N/A	GPRAN00	1738049-1	
			Environmental, with Rear Grommet & Interfacial Seal		GPRAE1C1PA	1738050-1

Note

¹ Pin inserts: Mating faces shown above.

² In a GPRB2 shell, one insert must be "A" keyed and the other one must be "B" keyed (See at right).

³ Size 8 cavity applicable for use with ARINC 600 Quadrax or Twinax contacts.

Insert Assemblies for High Speed Applications

F12 LuxCis® Insert Assemblies

Product Facts

- ARINC 801 approved
- Optical termini for use with GPR, ARINC 600, circular MIL-DTL-38999 connectors.
- Industry Standard 1.25mm ceramic ferrule
- Compatible with 1.5-2.2mm tight jacket and loose tube cable construction:
 - MT - Tight jacket cable
 - ML – Loose tube cable
- SingleMode (SM) and MultiMode (MM) versions
- LuxCis® termini part numbers:
 - 1828199-1 MM/ML Version
 - 1828200-1 MM/MT Version
 - 1918614-1 SM/ML Version
 - 1918616-1 SM/ML Version-APC
 - 1918615-1 SM/MT Version
 - 1918617-1 SM/MT Version - APC

Materials:

- Housings – Nickel Plated Copper
- Ferrule – Zirconia
- Spring – Stainless Steel
- Crimp Sleeve – Nickel Plated Copper
- Protective Cover – Silicone

Optical Performance

- Single mode, 1310nm/1550nm (UPC)
 - Attenuation, Mean – 0.15dB
 - Return Loss - >50dB
- Multimode, 850nm,1310nm
 - Attenuation, Mean – 0.10dB
 - Return Loss - >20dB

Assembly Capabilities

Tyco Electronics has extensive Rugged Optic Harness capabilities. Please consult your local Tyco Electronics Sales Representative for assistance.

Insert Assemblies for High Speed Applications (Continued)

M2 Mini-Expanded Beam Insert Holders

Product Facts

- No wear on fiber optic interface; Very vibration resistant
- Easy to handle, easy to clean. Durable connection that is highly resistant to dirt/debris.
- Singlemode or multimode
- Common 850/1300 Dual Wavelength, 1310, or 1550 nm wavelengths
- Easy alignment for low-loss repeatable performance
- Consistent overall optical "link budget" assured
- Low sensitivity to thermal fluctuations and interface contamination
- Repeatable low-loss performance in harsh environments.

Expanded Beam Products

- Ball lens expands cross-sectional area of light over 200 times for multimode and over 2000 times for singlemode
- Rugged hermaphroditic construction (i.e., same insert mates to each other)
- Physically non-contacting mating conditions; no wear, installed fiber ferrule protected by ball lens
- PRO BEAM Mini Connector field deployable interconnects
- Insert/holder blocks designed for Mini-Expanded Beam
- Common insert for 1- through 4-channels
- Unique Modular Design, for use with multimode and singlemode fiber.
- Cable assembly and termination services

Expanded Beam Insert

- Mini-Expanded Beam insert for multi-channel small form factor – the smallest expanded beam multi-channel insert in the industry a Tyco Electronics exclusive.

Expanded Beam Principle

Fiber Optic interconnect/cable system using Expanded Beam technology, which physically expands and collimates the transmission signal into an optical beam over 14 times its original diameter (the cross sectional area of the light beam increases over 200 times for multimode optical signals). For single-mode signals, the collimated beam is over 45 times its original diameter (the cross-

sectional area of the light beam increases over 2,000 times). It is then refocused back down onto the core of the receiving fiber. This approach provides ease of alignment and low sensitivity to thermal changes and contamination. High strength, precision connector housings enhance a durable connection, optimizing low loss and repeatable performance.

Expanded Beam Inserts

Suitable for aerospace, avionics, field-deployable communications, marine ship-to-shore applications, security systems, mobile diagnostic units, oil and gas exploration and other harsh environment applications demanding strength, durability and reliable performance in conditions of multiple couplings/decouplings, blindmate situations, and high vibration.

1738207-1	Socket Polarization Guide – A/B/C/D/E/F	GPRB2 Rack & Panel application
1738208-1	Socket Polarization Guide – N/R/W/X/Y/Z	GPRB2 Rack & Panel application
1738209-1	Pin Polarization Guide – A/B/C/D/E/F	GPRB2 Rack & Panel application
1738210-1	Pin Polarization Guide – N/R/W/X/Y/Z	GPRB2 Rack & Panel application
1738213-1	Dust Cap – Plug Shell	GPRB1
1738214-1	Dust Cap – Receptacle Shell	GPRB1
1738211-1	Dust Cap – Plug Shell	GPRB2
1738212-1	Dust Cap – Receptacle Shell	GPRB2
1877328-1	Anti-Static Dust Cap – Plug Shell	GPRB2
1877329-1	Anti-Static Dust Cap – Receptacle Shell	GPRB2
1738400-1	Grounding Spring	GPRB1 & B2
1738428-1	Polarization Key, Male	GPRA & GPRB1
1738429-1	Polarization Key, Female	GPRA & GPRB1
1738440-1	Key Retention Plate Assembly	GPRA & GPRB1

Tools

GPRA and GPRB Series

Part Number	Description	To Be Used With
1738215-1	Insert extraction tool	GPRA
1738216-1	Allen wrench locking system	GPRA, GPRB1
1738217-1	Insert handling case	GPRA, GPRB1 & B2
1738218-1	Insert extraction tool	GPRB1 & B2
1738219-1	Right-angle insert extraction tool	GPRB1 & B2
1738220-1	Spigot wrench for locking device w/1/4 inch adapter	GPRB2
1738221-1	Spigot wrench for locking device w/handle	GPRB2

Insert Handling Case
Part Number 1738217-1

Spigot Wrench for Locking Device with
Handle
Part Number 1738221-1

Right-Angle Insert Extraction Tool
Part Number 1738219-1

Insert Extraction Tool
Part Number 1738218-1

Stainless steel testing tools are available to check the wiring of the inserts without the shell — Consult Tyco Electronics.

EMI Backshells and Strain Reliefs

GPRB Series

Part Number	Description	Used With
1738310-1	Straight strain relief	GPRB1
1738311-1	45° strain relief	GPRB1
1738312-1	Straight backshell	GPRB1
1738313-1	Straight strain relief	GPRB2
1738314-1	Backshell for shielded termination	GPRB2
1738315-1	Backshell for screened twisted-pair cables	GPRB2
1738316-1	Backshell for large sized wire harnesses	GPRB2
1811650-1	Straight Strain Relief	GPRB2-Vertical
1877338-1	90° Exit Backshell	GPRB2

GPRA Series

Part Number	Description
1738317-1	Straight strain relief
1738318-1	45° strain relief
1738319-1	Straight backshell

Backshell Kit, 90° Exit
Part Number 1877338-1

Straight Backshell
Part Number 1738312-1

Backshell for
Shielded Termination
Part Number 1738314-1

Straight Strain Relief
Part Number 1738310-1

Vertical Strain Relief Kit, Fiber Optic
Part Number 1877736-1

Straight Backshell
Part Number 1738319-1

Backshell for Screened
Twisted Pair Cables
Part Number 1738315-1

45° Strain Relief
Part Number 1738318-1

Horizontal Strain Relief Kit, Fiber Optic
Part Number 1877888-1

Straight Strain Relief
Part Number 1738313-1

Backshell for Large Sized
Wire Harnesses
Part Number 1738316-1

GPRB2 Vertical Strain Relief
Part Number 1811650-1

Galley Insert (GAIN) Connectors

Product Facts

- Designed for ARINC 810 – standard interfaces for Galley Insert (GAIN) Equipment
- Spring-Loaded, float-mounting plug shell design allows ±1mm variation in the mating direction
- Blind mating guide pin & socket accept ±2mm/ 2° lateral misalignment
- Product incorporates:
 - size 22 signal contacts
 - size 12 power contacts
 - size 8 twinax contacts
- 500 mating cycles durability

**Receptacle Shell, Front Panel Mount, with Guide Socket
GPRB2
1811119-1**

The GPRA & B Connector Series offers a comprehensive range of standard components that allows the user to build a connector to meet his requirements. However, standard shells might not be compatible with the user's application; alternate solutions are available to meet the customer's

specific requirements with limited investment by using standard inserts and contacts. Some of these are shown below.

Multicavity Racked Shells

GPRB shells can be built in any format from 4 to 20 cavities for either panel or rack applications and with or without grounding blocks. These shells accommodate standard inserts.

Solution for IMA (Integrated Modular Avionics)

A right-angle contact printed circuit board connector which allows direct mating with an airframe connector has been developed. It is fitted with special rack features: spring loaded shell, EMI shield frame and 4 polarization posts with 256 combinations.

Composite Shells (in development)

Low weight, Skydrol® resistant composite shells have been developed.

Solutions for Data Bus

Tyco Electronics is at the leading edge of providing solutions for high-speed data transmission such as size 8 quadrx contacts for Ethernet.

Connectors for Size 3 Coaxial Contacts

A high-reliability design for high specification RF requirements.

Solutions for Wiring

Inserts may be fitted with internal bussed bars. This solution replaces junction blocks and simplifies the connector cabling.

Custom Shells

This custom 4-cavity receptacle shell was developed and serves as the rear panel of the customer's enclosure.

Custom Inserts

Inserts are available with PC Tail contacts pre-assembled, such as this 40-position pin assembly.
