

# DC-SE Series (General Purpose LVDT)

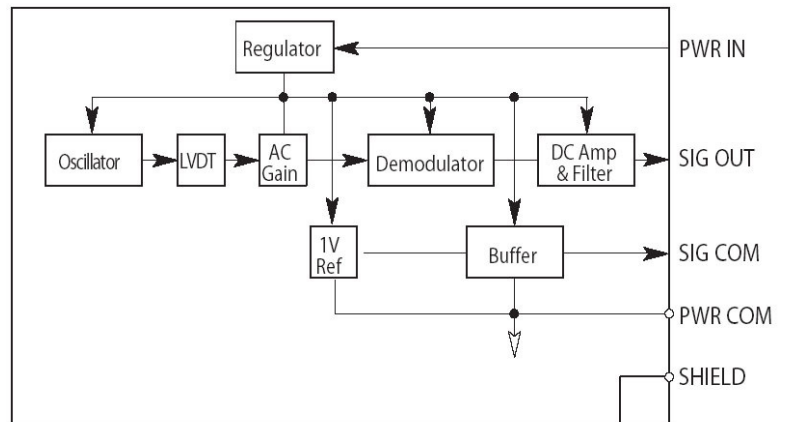

The DC-SE AccuSens Series has been designed to meet today's requirements for operation from a single ended power supply. The output is also single ended over the full range displacement of the LVDT making the unit compatible with unipolar inputs on analog-to-digital converters and programmable logic controllers, etc.

The DC-SE design features internal regulation which provides immunity from line ripple and allows operation from an unregulated 8.5 to 28 VDC supply. The DC-SE current draw is 6 mA (typical), making remote or portable operation from batteries possible. The incorporation of a new high stability oscillator provides improved temperature stability, while the synchronous demodulator insures excellent noise rejection.

The electronics design uses surface mount technology to keep costs and size of the unit to a minimum. Built-in EMI/ESD protection and shielded cable allows operation in industrial environments. The DC-SE meets CE requirements.

## block diagram

Block Diagram

## FEATURES

- CE Certified
- Operates from Single-Ended, unregulated 8.5 – 28 VDC Supply
- 0-5 VDC or 1-6 VDC Output Voltage, depending on Customer Hook Up
- Low Power Consumption
- 200 Hz Frequency Response
- 1 meter shielded cable
- Calibration Certificates Supplied with All Models

## APPLICATIONS

- Positioning Sensing Feedback, Test Labs, Ram Guide and Platen Position Feedback

## OPTIONS

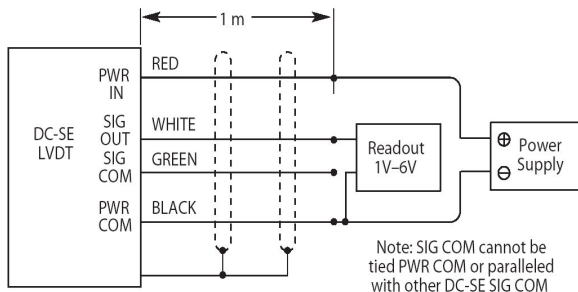

- Metric Thread Core
- Captive Core Option for Convenient Installation
- Guided Core
- Small Diameter, Low Mass Core

# DC-SE Series (General Purpose LVDT)

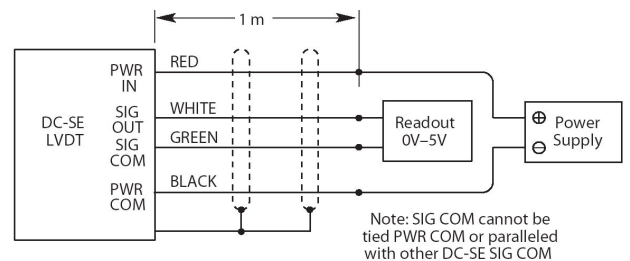

## Specifications

<b>Input Voltage</b>	+8.5 to +28 VDC
<b>Input Current</b>	<10 mA (6 mA typical)
<b>Line Regulation</b>	<1 mV/V (0.2mV/V typical)
<b>Operating Temperature Range</b>	-13°F to 185°F (-25°C to 85°C)
<b>Storage Temperature Range</b>	-65°F to 257°F (-55°C to 125°C)
<b>Output Voltage</b>	0-5 VDC (4 wire), 1-6 VDC (3 wire)
<b>Ripple and Noise</b>	Less than 10 mV rms
<b>Linearity</b>	0.25% full range
<b>Stability</b>	0.125% full scale
<b>Temperature – Coefficient of Scale Factor</b>	0.025%/°F (0.05%/°C) max
<b>Shock Survival</b>	250 g for 11 msec
<b>Vibration Tolerance</b>	10 g up to 2 kHz
<b>Housing Material</b>	AISI 400 Series Stainless Steel
<b>Cable</b>	4 Conductor, 28 AWG, stranded copper with braided shield and polyurethane jacket, 1 meter
<b>EMC</b>	CE Certified (The DC-EC series, when correctly installed, comply with the EMC Directive 89/336/EEC generic standards for residential commercial, light industrial and industrial environments.)
<b>Output Impedance</b>	Less than 1 ohm

### DC-SE 3-wire hookup: 1 to 6V out

### DC-SE 4-wire hookup: 0 to 5V out

## Captive Core Option

### new captive core option

The DC-EC features a captive core design that greatly simplifies installation. The design utilizes a core rod and bearing assembly that is captured and guided within the LVDT providing low friction travel throughout the stroke length. The assembly incorporates two Delrin bearings on the core rod traveling through the stainless steel boreliner. A bronze bearing on the front end utilizes a self-aligning feature to accommodate lateral LVDT movement during operation, the core rod and bearing assembly is field replaceable.

### ordering info

Specify the DC-SE Model followed by the desired option number(s) ordered together.

Ordering Example:

**Model Number 250 DC-SE-200** is a DC-SE Series LVDT with a 0.250" range with the captive core option (200).
