LIMITED LIFE

All 190 series DMMs come with protective boot and silicone rubber (CAT IV 600V) test leads.

Features

- **Large 50,000 count display** increases resolution and improves accuracy (1.7" x 2.75", 43mm x 70mm)
- **Triple Display** shows more than one reading simultaneously
- **51 Segment Analog Bar Graph** to catch fast AC fluctuations
- **Back Light** (LED Type) allows viewing in any light condition
- **Auto Range** automatically selects the best range for the measurement
- **Separate battery and fuse compartment** for easy replacement
- **True RMS** needed to accurately measure nonsinusoidal AC voltage and current waveforms found on controls and circuits
- **Increased safety** with Silicone rubber 1,000V CAT III, 600V CAT IV, 10A test leads (CE & cUL listed)
- **Capacitance** measures the value of capacitors

- **Auto Power Off** DMM will automatically power down after approximately 15 minutes of inactivity to extend battery life. Disable Auto Power Off: Hold down the REC button and turn the meter on.
- **Diode Test** displays approximate forward bias voltage
- **Continuity and buzzer** to check for opens and shorts

ADDITIONAL FEATURES AVAILABLE ON 192 & 194 ONLY

- **Time Stamp Logging** logs up to 100 readings (min/max/avg) with a time stamp
- **Pulse Width** measures the duration of a pulse
- **Duty Cycle** displays the total "on" time of a component
- **Inductance** measures the value of inductors and coils
- **Conductance** measures the ability of a material to conduct electricity
- **Temperature** for use in HVAC, electrical, and electronic applications

190 Series Features & Specifications

Features (for all models)

Basic DC accuracy:	0.05%
Compare:	Compares stored value with measured value for matching components
Data Hold:	Enables the reading on the display to be frozen. The two hold system holds the previous reading when a new one is received
Relative:	Display a measured value as a percentage of a stored value. Useful for component testing
Record:	Record Minimum, Maximum, and average reading.
Auto Range:	Automatically selects the best range for measurement
Continuity & Buzzer:	Check for opens and shorts
RS232:	Optically isolated software optional
Safety:	Designed to meet cULus 3111 and IEC1010
LCD:	Large 50,000 count display
Triple Display:	Shows more than one reading simultaneously
Bar Graph:	51 Segments Analog Bar Graph to catch fast AC fluctuations
Back Light:	Always viewing in any light condition
True RMS:	Needed to accurately measure nonsinusoidal AC voltage and current waveforms found on controls and circuits
Test Leads:	Silicone rubber 1,000 CAT III, 600V CAT IV, 10A
Auto Power Off:	DMM will automatically power down after approximately 15 minutes of inactivity to extend battery life. Disable Auto Power Off: Hold down the REC button and turn the meter on
Diode Test:	Displays approximate forward bias voltage
