Highlights

Applications. The MultiModem Cell cellular modem is ideal for automated machine-to-machine applications such as remote diagnostics and remote monitoring which periodically need to send or receive data over a wireless network.

Reduces Development Time. The MultiModem Cell cellular modem can make your existing and next generation device communication-ready without requiring any hardware changes to its design. It provides faster time-to-market because it relieves the burden and expense of obtaining RF and carrier approvals. This complete, ready-to-deploy cellular modem allows you to enhance your product while you focus on developing its core features.

Voice Features. The MultiModem Cell cellular modem provides telephony and Dual Tone Multi Frequency (DTMF) functionality, as well as QCELP (13K) and echo cancellation.

Compatible Supplementary Services. The MultiModem Cell cellular modem is compatible with supplementary services such as call forwarding, call barring, multiparty, call waiting and call hold, calling line identification, closed user group and call transfer.

Management Features. The MultiModem Cell cellular modem provides advanced management features including phone book management, fixed dialing number, real time clock and alarm management.

Industrial Chassis. The MultiModem Cell cellular modem is packaged in a rugged industrial chassis with an SMA antenna connector. It can be desktop or panel mounted and features multiple LEDs providing ongoing operational status.
