

5" Heavy Duty Cutters and Pliers

A range of 5" (126mm) professional cutters and pliers, manufactured from hardened and tempered steel which is 5mm thick and has been chemically treated for increased durability and strength. All the cutters and pliers have been finely ground and polished and are ideal for precision and more heavy duty applications. The cutters and pliers all have powerful, steel pressed jointed jaws, manufactured from 5mm thick steel. The soft textured grips increase the pressure which can be applied. The large, integral spring action improves user comfort, even over prolonged periods.

11-35901: Heavy duty 5" angled cutters with sharp, polished and hardened precision cutting blades; the cutters also have a safety clip to hold components etc. once cut.

11-35901: Heavy duty 5" angled side cutters with sharp, polished and hardened precision cutting blades.

11-35903: Heavy duty 5" long nose pliers which have serrated jaws measuring 35mm in length.
