

### Resettable pliers for both internal and external circlips, 2928

The 2928 series of three re-settable pliers, covers the range of existing, conventional circlip pliers. These patented pliers are equipped with interchangeable tips (straight, 15° and 90°) which can easily be adapted for use with internal or external circlips as required.

5 sets of tips are supplied with the -160 & -200 and 6 sets with the -250.

The 2928 pliers are used for internal circlips from 8 to 100 mm diameter and for external circlips from 3 to 100 mm. The 2928-160 for instance covers a range of applications previously requiring up to ten conventional pliers. The resettable pliers have a regulation stop mechanism (automatic on the 2928-250 model) which makes use easier and prevents the circlips from being damaged due to excessive force being applied.
