

Crescent®

# Number Crunchers

ASME spec tools at a fraction of the cost. You do the math.

 **COOPER** Hand Tools

# Performance of the leading competitor at a substantially lower cost.

## Designed for superior performance.

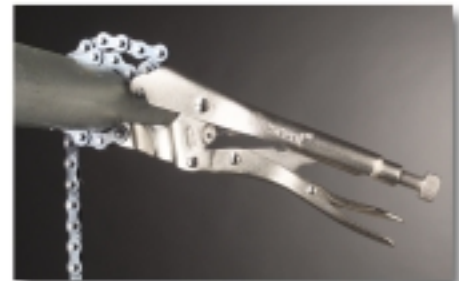

Crescent brand locking pliers are made to an exacting standard that results in improved durability and long-term performance. In fact, they not only meet the performance of the leading competitor, but also meet stringent ASME standards B107.24 and B107.36, as applicable, for product specifications, including strength and maximum jaw opening capacity. Yet, as strong as they are, Crescent locking pliers still maintain the narrow profile required for work in tight and confined spaces. A full line of locking products is available, including curved and straight jaw pliers, long nose pliers, regular tip and swivel-pad 'C' clamps, cushion grip sets, and more. See the new line of Crescent locking pliers soon wherever true professional quality construction tools are sold.

Locking C-Clamps allow quick, easy positioning of workpieces. Swivel tips minimize marring on softer materials.

Locking Welding Clamp holds workpieces firmly in position. Open design allows clear access for welding.

Locking Chain Clamp grips large or irregular-shaped objects effectively, yet minimizes crushing.

The entire line of Crescent locking pliers meets ASME standards B107.24 and B107.36, as applicable, for product specifications.

# Get a lock on performance and a grip on savings.

Now you have a choice in quality locking pliers. The new line from Crescent offers performance which meets that of the leading competitor at a substantially lower cost. But don't take our word for it. Compare Crescent head-to-head against any other locking pliers and we guarantee the only difference you'll find is on the price tag. We have the most popular sizes and styles of locking products, including sheet metal and welder's clamps, and even a set of cushion grip locking pliers. So check us out. You're going to like what you see.
