

Wire Strippers

Stripmaster

High quality strippers with lightweight zinc frames for corrosion resistance and durability. The knife blade incorporates a wire gripper that firmly holds the wire in place. The spring action lever reduces user fatigue and improves production rates as it is a one step operation. The stripmaster lite is ideal for production environments as its spring tension is lighter which reduces user fatigue. Specification: Stripmaster 10-22 AWG, Stripmaster lite 16-22AWG.
