Overview

The JetNet 3008f is a new generation of the 8-port compact Fast Ethernet switch equipped with 2.0Gbps Packet Switch engine as particular packet forwarding and filtering mechanism to fulfill industrial communications on the filed sites. It provides the graceful packet forwarding ability to handle 64~1552 packet size into 2 priority queues which comply with quality of service for the best data forwarding performance.

In addition, for the best network performance both of broadcast storm filtering and flow control functions can ensure your data traffic deliver to destination without traffic congestion. To avoid interferences as well as to extend the network coverage, JetNet 3008f

implements 2 100Mbps fiber ports with multi-mode 2KM or single-mode 30KM transceiver in order to achieve stable and long-distant transmissions.

To survive under hazard environments, it is equipped with 2 redundant power inputs, as the wide range input avoiding any power interruption and also operating between -25~70°C temperature range. For the purpose of easy maintenance, JetNet 3008f has one alarm-relay for port link events and power events via alarm to assist engineers with notifications on the filed sites. With the JetNet 3008f, users enjoy the superiority and the reliable performance on the filed site applications.

Redundant Power Inputs & True Reliability

The JetNet 3008f has dual DC24V inputs, and can also operate on 12V~48V. Dual power inputs and built-in reverse power polarity protection are designed as the redundant power system to ensure power

continuity. With the 1.5KV Hi-Pot isolation protection, CE/FCC regulatory approvals, and 5-year global warranty, the JetNet is the reliable choice for hazardous applications.

Plug-and-Play Switch & High-Speed Transmission

JetNet 3008f require no user setup and immediately start operating as soon as you power them up. Excellent data transmission performance is

provided for you. No traffic will be delayed with the transmission rate up to 2.0Gbps.
