

Two types are available. Moulded Plastic with textured finish or diecast black anodised aluminium. Both versions have a bright "highlight" ring. The aluminium version offers plain ring or diamond machined facet ring.

These rings are designed to have speakers bolted directly to the tapered holes on the back face. When fitted in front of cabinet mounted speakers, due allowance for protrusion or centre boss must be made. Check on sample first. They are not designed for clamping down, flange mounted speakers.

Size	Description	Part No.	Size	Description	Part No.
3"	Plastic	FC6874	10"	Aluminium $\diamond$ Facet	FC68756
8"	Plastic	FC68751	12"	Plastic	FC68757
8"	Aluminium Plain	FC68752	12"	Aluminium Plain	FC68758
8"	Aluminium $\diamond$ Facet	FC68753	12"	Aluminium $\diamond$ Facet	FC68759
