## CL2000 series codelock

The Codelocks keyless electronic locks represent a major step forward in entry control. Based on Piezo technology, these products offer an exceptional battery life of 500,000 operations from the 4x1.5v AA cells@2900mAh. The entry level CL2000 is a stylish design incorporating twin LED lamps within the button housing. With fast, easy programming of up to 90 different user codes via the keypad, the CL2000 is ideal for a wide range of light duty entry control applications in health, educational, commercial and residential environments. Electronic functionality provides major benefits over mechanical locks, such as programming at the keypad, multiple codes, one-time user codes, remote release, automatic fire alarm release, and incorrect code alarm. The non volatile memory retains settings when batteries are changed.

Programme commands include:  
 set new user code  
 suspend and restore individual user codes  
 suspend, restore and delete all user codes  
 set one-time user code  
 set and cancel code free mode  
 change master code

### key features

New Piezo Technology  
 Over 500,000 operations from 4x AA cells  
 PVD, weather resistant, low maintenance finish  
 Connections for remote release by reception desk button  
 Connections for release by alarm system  
 Code free entry mechanically by key or electronically from keypad  
 Allows up to 90 user codes 4, 5 or 6 digits long  
 Tamper alarm and low battery warning

Mortice Latch SS  
 Mortice Latch PB

2010-SS  
 2010-PB

## CL4000 series codelock

CL4000 is a medium duty electronic keyless lock offering all the functions of the CL2000, but with the benefit of full size lever handles which allow it to be used as the primary lock on doors where a knob operated lock would not be suitable. CL4000 is a stylish, contemporary design programmable at the keypad with a range of commands which makes it particularly suitable for medium duty use in health, educational, commercial and residential environments. Electronic functionality provides major benefits over mechanical locks, such as programming at the keypad, multiple codes, one-time user codes, remote release, automatic fire alarm release, and incorrect code alarm. The non volatile memory retains settings when batteries are changed.

Programme commands include:  
 set new user code  
 suspend and restore individual user codes  
 suspend, restore and delete all user codes  
 set one-time user code  
 set and cancel code free mode  
 change master code

### key features

## CL5000 series codelock

This is a heavy duty keyless electronic digital lock with full size lever handles, allowing use as the primary lock on most doors, particularly in high traffic situations.

The 5000 model is a stylish, contemporary design, ideal for a wide range of heavy duty entry control applications.

The Piezo actuator, used for the first time in a stand alone electronic lock provides a battery life of over 500,000 operations (approximately ten times more than a typical electronic push button lock).

Programme commands include:  
 set new user code  
 suspend and restore individual user codes  
 suspend, restore and delete all user codes  
 set one-time user code  
 set and cancel code free mode  
 change master code

### key features

## electric strikes for u-pvc doors

#### description

fail secure electric strike for U-PVC doors with long faceplate to accommodate deadbolt and adjustable keep

#### specification

operating voltage 8 - 16V AC/DC  
consumption 650mA  
holding force 300kg  
monitoring optional  
operation fail secure  
handed left & right  
dimensions 225 x 26 x 31mm  
jaw depth 6mm

unmonitored left hand  
unmonitored right hand  
with monitoring left hand  
with monitoring right hand

## ansi electric strikes for american style locks

### ES4FL

**description**  
 adjustable ansi strike with auxiliary lever ramps, for use with locksets with a throw of up to 16mm

**specification**  
 operating voltage 12V DC  
 consumption 220mA  
 holding force 300kg  
 monitoring optional  
 operation fail secure  
 handed universal  
 dimensions 175 x 32 x 40mm  
 jaw depth 13mm

unmonitored  
 with monitoring

ES4FL1 **52.97**  
 ES4FL2 **90.48**

### ES4FO

**description**  
 adjustable ansi strike, for use with locksets with a throw of up to 16mm

**specification**  
 operating voltage 12V DC  
 consumption 170mA  
 holding force 300kg  
 monitoring optional  
 operation fail safe  
 handed universal  
 dimensions 175 x 32 x 40mm  
 jaw depth 13mm

unmonitored  
 with monitoring

ES4FO1 **78.57**  
 ES4FO2 **90.48**

### ES5FO

**description**  
 fixed keep ansi strike available with short or long face plates, for use with latches with a throw of up to 16mm

**specification**  
 operating voltage 12V DC  
 consumption 170mA  
 holding force 300kg  
 monitoring no  
 operation fail safe  
 handed universal  
 dimensions (SFP) 123 x 32 x 40mm  
 dimensions (LFP) 222 x 36 x 40mm  
 jaw depth 13mm

with short face plate  
 with long face plate

## heavy duty electric strike

### ES8FL

#### description

heavy duty stainless steel electric strike for use with surface mounted rim exit devices

#### specification

operating voltage 12V AC/DC  
consumption 280mA DC  
700mA AC

holding force 900kg  
monitoring no  
operation fail secure  
handed please specify  
dimensions 229 x 44 x 53mm  
jaw depth 34mm

fail safe panic device strike 12V DC  
fail safe panic device strike 12V AC

ES8FL1 231.33  
ES8FL2 231.33

## micro ansi electric strike

### ES9M

#### description

fail secure compact ansi strike

#### specification

operating voltage 12 - 24V AC/DC  
consumption 450 - 900mA  
holding force 500kg  
monitoring optional  
operation optional  
handed universal  
dimensions 70 x 28 x 26mm  
jaw depth 12mm

12 - 24V AC/DC  
12V DC (450mA)  
12V DC fail safe (450mA)

ES9M1 177.99  
ES9M2 142.39  
ES9M3 185.41

## mini ansi electric strike

### ES10M

#### description

fail secure mini ansi electric strike

#### specification

operating voltage 12 - 24V DC  
consumption 450 - 900mA  
holding force 500kg  
monitoring optional  
operation optional  
handed universal  
dimensions 123 x 31 x 26mm  
jaw depth 11mm

12 - 24V AC/DC  
12V DC (450mA)  
12V DC (450mA) fail safe

ES10M1 198.76  
ES10M2 163.16  
ES10M3 206.17

## cabinet locks

### ESC

#### description

fail secure and fail safe cabinet locks for securing cupboards, lockers, filing cabinets etc.

#### specification

operating voltage 12V AC/DC  
consumption 340mA  
holding force 200kg  
monitoring optional  
operation fail secure (C1)  
fail safe (C3)

fail secure - unmonitored  
fail secure - monitored  
fail safe - unmonitored  
fail safe - monitored

ESC1 38.00  
ESC2 48.00  
ESC3 33.00  
ESC4 43.00

## shear magnets

### ESM1

monitored

ESM1 283.34

#### description

standard shear magnet 1136kg holding force - monitored

#### specification

holding force 1136kg  
operating voltage 12V DC  
current 180mA  
monitoring via. control board  
time delay 0 - 6 seconds  
MOV surge protection on control board  
finish satin anodised aluminium  
dimensions 165 x 21 x 31mm

### ESM2

monitored

ESM2 330.00

#### description

high security shear magnet 1360kg holding force - monitored

#### specification

holding force 1360kg  
operating voltage 12V DC  
current 340mA  
monitoring via. control board  
time delay 0 - 6 seconds  
MOV surge protection on control board  
finish black satin finish  
dimensions 190 x 25 x 31mm

### ESL1

self-aligning

ESL1 382.50

#### description

self-aligning shear lock, low current draw, no special alignment circuits, 2m cable from lock supplied, nickel finish, modern design, easy to install, fully repairable

#### specification

holding force up to 500kg  
operating voltage 12 - 24V DC  
current 1600mA @ 12V max  
monitor output voltage free contact  
pull in distance 4mm from lock  
dimensions lock: L270 x W35 x D30mm  
armature: L220 x W37 x D25mm

## solenoid bolts

### ESB1

monitored

ESB1

157.14

#### description

fail safe electric drop bolt

#### specification

operating voltage	12V DC
operation	fail safe
current	290mA
monitoring	yes
time delay	0 - 9 seconds
finish	bright chrome
dimensions	203 x 33 x 44mm

### ESB2

monitored

ESB2

292.86

#### description

fail safe electric drop bolt for glass doors

#### specification

operating voltage	12V DC
operation	fail safe
current	290mA
monitoring	yes
time delay	0 - 9 seconds
finish	bright chrome
dimensions	222 x 64 x 40mm

## stand-alone programmable readers

This range of intelligent readers offers a low cost, reliable and secure access control solution to stand-alone applications. Depending upon the application our extensive range includes readers suitable for both internal and external environments.

Features include:

- Easy Installation
- Easily Programmed
- LED Indicators
- User Definable Lock Times
- Tamper Facility

### PR-01

**reader type** vandal resistant standalone proximity reader

**operating voltage** 12V AC/DC

**operating frequency** 125kHz

**read range** 8cm

**visible signals** 1 red LED (free of potential)  
1 bi-colour LED (red/green)  
1 yellow LED

**audible signals** 1 internal buzzer

**exit button** 1 external push button option

**operating temperature** -30°C to +50°C

**operating humidity** 0 - 95% (non-condensing)

**dimensions (mm)** L105 x W85 x D40

**IP rating** IP65

**number of users** 250

**output modes** (non-volatile memory)  
programmable duration of pulse (1-99 seconds) or latch mode

vandal-resistant standalone proximity reader **PR-01** 210.06

### PR-02

**reader type** vandal resistant proximity reader for use with host systems

**operating voltage** 12V DC

**power consumption** 100mA maximum

**reads** EM4102 compatible tags (cards/key fobs)

**operating frequency** 125kHz

**read range** 8cm

**outputs** 26 bit Weigand or clock and data

**visible signals** 1 red LED (free of potential)  
1 bi-colour LED (red/green)  
1 yellow LED

**operating temperature** -30°C to +50°C

**operating humidity** 0 - 95% (non-condensing)

**dimensions (mm)** L105 x W85 x D40

**IP rating** IP65

vandal-resistant proximity reader **PR-02** 181.51

### PR-03

**reader type** Weigand 26 output solution for access control host systems

**operating voltage** 12V DC

**power consumption** standby: 60mA +/- 5%  
EM4102 compatible tags (cards/key fobs)

**read range** up to 70cm

**output modes** Weigand 26

**visible signals (LEDs)** 1 red, 1 yellow, 1 green

**audible signals** 1 internal buzzer

**operating temperature** -15°C to +60°C

**operating humidity** 0 - 95% (non-condensing)

**dimensions (mm)** L100 x W40 x D17

**IP rating** IP65

Weigand output proximity reader **PR-03** 57.20

### PR-MF

**reader type** proximity contactless Mifare

**housing** high impact ABS plastic

**format** 26 bit Weigand

**LED's** 3

**operating frequency** 13,56MHz

**read range** 8cm

**operating voltage** 8 - 15V DC

**power consumption** 70 mA

contactless mifare reader **PR-MF** 205.50

### PR-FP

**reader type** contactless Mifare & fingerprint

**housing** high impact ABS plastic

**format** 26 bit Weigand

**LED's** 3

**operating frequency** 13,56MHz

**read range** 8cm

**operating voltage** 8 - 15V DC

**power consumption** 70 mA

contactless mifare reader & fingerprint **PR-FP** 900.00

### cards & tags

KP-FOB

KP-CAR

KP-TRA

proximity keyfob EM4102 compatible  
ISO thickness EM4102 proximity card  
clamshell card EM4102 proximity card  
RF transmitter 868MHz  
(868MHz on request)

**KP-FOB** 3.15  
**KP-ISO** 2.70  
**KP-CAR** 2.40  
**KP-TRA** 30.06

### door loops

#### LOOP1

**high security door loop**  
stronger door loop for more secure applications  
carries cables from door frame to the door to supply electric strikes, etc.

**LOOP1**  
18.91

#### LOOP2

**standard door loop**  
carries cables from door frame to the door to supply electric strikes, etc.

**LOOP2**  
11.92

## stand-alone intelligent locksets

SILS - Stand-Alone Intelligent Locksets - available in a range of card technologies offering a flexible access control solution without compromising your security needs

### features include

- easy, fast & simple installation
- easy to use application software
- choice of reader technology
- satin brass, satin chrome or satin silver finishes available
- 200 events per door audit trail
- up to 255 buildings
- with up to 255 floors per building
- with up to 255 doors per floor
- no need to hard-wire the building
- cost effective access control solution

### 01

#### for hotel use

specially designed for hotel use  
 available in proximity insertion (SSL-01), Mifare - internal use (SMF-01), Mifare - external use (SMF-01EX) or magnetic stripe (SML-01) P.O.A.

### 02

#### for commercial applications

specially designed for commercial applications  
 available in proximity insertion (SSL-02), Mifare - internal use (SMF-02) or Mifare - external use (SMF-02EX) P.O.A.

## external reader

RD

#### for up to 2000 users

The SPL-RD is an RFID card reader which comes with a host controller. It has a 2000 card capacity and is suitable for controlling external doors P.O.A.

## energy saving switch

ES

The SPL-ES is an energy saving switch for use with the hotel access cards. Once the card is inserted into the unit, power to the room is enabled. Once removed power is switched off after 10 seconds P.O.A.

## cards

## software

software runs under Windows 2000 or Windows XP

## card encoder

ENC

#### for programming cards

Card encoders are available for each of the reader technologies. The unit is connected to a PC via the USB port. Cards are placed into the unit and programmed via the software

Mifare insert chip card	SMF-CARD	1.30
proximity card	SSL-CARD	2.60
magnetic stripe card	SML-CARD	1.30

for hotel use	SOFT-01	780.00
for commercial use	SOFT-02	780.00

Mifare encoder for SMFs	SMF-ENC	P.O.A
proximity encoder for SSLs	SSL-ENC	P.O.A
mag stripe encoder for SMFs	SML-ENC	P.O.A

## smart code entry lockset

Stand-alone and battery operated, this stand-alone intelligent smart code entry lockset provides the ideal solution when considering cardless/tagless applications.

media type	push button codes
power	4x AA batteries
emergency use	yes: key override feature
low battery indicator	yes
number of users	250
number of operations	30,000 per power pack
use	commercial
finishes	satin chrome, satin brass
management system	not required
holding strength	1000kg
strict user control	yes, master code protected

commercial application code entry lockset SCE-01 156.00

## telephone entry systems

TES-1

**description**  
Video entry system with 2-way voice communication. Simple installation and up to 100m range. Additional RCM (remote communication module) can be added to a second access point (i.e. second door/gate). System incorporates a camera and monitor.  
**application**  
One way entry system applications where visual identification is needed. System can be extended to allow x2 entry points.

**technical information**

## real time security digital video recorder

### description

non PC stand-alone DVR (just like a normal VCR)  
 4 channel inputs, 1 composite & VGA output  
 front panel buttons & OSD control  
 real time display & recording  
 USB 2.0, easy to back-up to PC  
 sensor & relay control  
 auto recycle recording - no need to change tapes  
 supports 2 hard drives  
 removable HDD bay  
 supports video format: NTSC & PAL

### applications include

shops, supermarkets, schools, educational institutions, museums,  
 hospitals, railway stations, petrol stations, car parks, factories,  
 warehouses, community centres, residential areas

### specification

4 composite video inputs (BNC connector)  
 1 composite & VGA output  
 Video compression: MPEG  
 Video format: NTSC and PAL  
 Resolution: 720 x 480, 360 x 240 (Quad mode)  
 Display frame rate (Quad mode): 30/25 fps (NTSC/PAL) per channel,  
 total 120/100 fps (NTSC/PAL)  
 Recording frame rate (Quad mode): 30/25 fps (NTSC/PAL) per  
 channel, total 120/100 fps (NTSC/PAL)  
 Recording modes: schedule recording (00:00-23:59 selectable)  
 Event recording: recording automatically when sensor triggered  
 Auto recycle when disk is full  
 Playback:
 

- realtime playback: immediate access playback
- video search by date/time/event

 I/O:
 

- 4 sensor inputs and 1 relay output control
- relay output controls alarm, lock, light, or other devices
- 1 USB 2.0 port

digital video recorder

## access control systems

### system

Integrates access control and alarm monitoring into an elegant building management and security system, aimed to effectively cover the competitive sector of small and medium sized access control systems market. Its modern architecture was specifically designed to take advantage of Microsoft Windows XP and works reliably under Windows 98, ME, NT4 and 2000 operating systems.

### optimum system capacity:

up to 99 system operators with individually definable privileges  
 up to 32 NC100 controllers  
 up to 64 access points  
 up to 256 inputs/256 outputs  
 up to 16 networks including direct, TCP/IP, dial-up and wireless  
 up to 2000 cards per controller

### software

Advance Client Server design with up to 10 simultaneous users  
 over TCP/IP

### main features:

up to 64 reader capacity  
 up to 2000 card holders  
 40 holiday schedules  
 16 schedules with 128 time zones  
 high security mode  
 lock/unlock modes  
 multiple cards per user  
 timed true or global anti-pass-back  
 remote sites  
 customised reports  
 time and attendance reports  
 photo ID option

SOFTWARE  
225.00

### NC-100 controllers

Powerful flash firmware technology  
 Supports 2 card readers each with keypad  
 1400 off-line transaction  
 Supports fully supervised communication via. both RS-232 and RS-485  
 Each NC-100 has 8 fully supervised programmable inputs  
 (4 state monitoring alarm)  
 Each NC-100 has 8 programmable outputs  
 (4 relays and 4-voltage output)  
 User selectable communication speed up to 56.6K baud rate  
 Door held open alarm and warning  
 2000 access levels per controller  
 Remote site dial-up capability by schedule  
 TCP/IP ready controllers  
 12V DC at 2A power supply per controller  
 Battery back-up

NC-100  
787.50

## automatic door operators

### 2005

#### key features

The 2005 is a Low Energy operator intended for light duty swing doors. This really is a truly innovative design which has many features including battery back-up in event of Power failure. The ability to select Push & Go or Low Energy operation mode. The Low Energy facility makes the 2005 Sprint particularly suitable in Hospitals, County Councils, Borough Councils, Nursing Homes and Public Buildings where Elderly and Disabled access is required.

A particular safety feature of the 2005 Sprint ensures that if it meets an obstruction on its closing cycle it will immediately re-open before automatically closing slowly whilst searching for obstruction. On the opening cycle the reverse occurs.

#### Prices upon application

#### technical information

dimensions	L450 x H80 x W90mm
maximum range	80kg
operation	continuous duty
box/housing	black ABS
opening system	motor driven
closing system	by motor
opening speed	1.5 to 3 seconds
closing speed	set at 70% of full speed for opening
power supply	230V~/50Hz
power input	0.2A max.
motor	12V
emergency power supply	yes
electric lock power supply	1.2A
anti-crush device	standard
limit-switch system	automatic with encoder
adjustments	automatic closing/speed of movement
power supply for access.	24V~/0.5A
controls	enabling of automatic closing, opening, closing, safety reverse, stop, reset can be selected with dip switch
push and go	can be selected with dip switch
low energy	can be selected with dip switch

### 2006

#### key features

The 2006 is a robust low Energy operator for swing doors. The 2006 is for doors up to 100kg, which are subjected to continuous use and is particularly suitable for use in Hospitals, County Councils, Nursing Homes and Public Buildings where elderly and disabled access is required.

With its geared motor the opening-closing speed adjustments are under constant control with an anti-crush feature for maximum safety. With motor driven opening and spring operated closing, the 2006 can be used for Fire Exit doors and is ideal for installations requiring gentle and easy movement rather than great force.

#### Prices upon application

#### technical information

dimensions	L560 x H127 x W116mm
maximum range	100kg
operation	continuous duty
box/housing	box extruded aluminium
opening system	motor driven
closing system	by spring
opening speed	3 to 5 seconds
closing speed	4 to 8 seconds (adjustable)
power supply	230V~/50Hz
power input	1A max.
motor	24V
emergency power supply	-
electric lock power supply	1.2A
anti-crush device	yes
limit-switch system	during opening
adjustments	automatic closing/speed of movement
power supply for access.	24V~/0.5A
controls	opening
push and go	yes
low energy	yes

### 2009

#### key features

Regulation of opening and closing speeds  
 Regulation of acceleration and decelerations  
 Safety sensor inhibiting distance in opening mode  
 Pushing thrust limitation  
 Wind stop force intensity  
 Push and go activation distance  
 Intensity of final thrust on closing phase to ensure electric lock is latched  
 Activation of the functions can be selected via the on board 3 way switch on the lateral side of the operator, manual key switch or via a digital selector  
 Programming the functions and parameters can be done by the on board dip switch or via the digital function selector  
 The regulation of the opening angle (maximum 95°) must be adjusted at the initial installation of the operator  
 In a power fail situation it can be opened by hand and closed by spring  
 Door stand open  
 One or two way traffic  
 Night lock  
 Synchronisation of two operators  
 Cyclic opening and closing

#### Prices upon application

The new 2009 Silent Runner Automatic Swing Door Operator is designed for continuous use and is safe, sensitive, silent and reliable.

This operator can be programmed to suit all applications: as an automatic low energy operator where elderly and disabled people use the doors frequently or a high volume automatic commercial operator on a busy airport - it also has the built in intelligence to install a full range of extra safety sensors if required.

Achieving compliance with the Disability Discrimination Act 1995 (DDA) and the European Directive the state of the art control panel makes the 2009 Silent Runner one of the safest and most sensitive automatic swing door operators on the market today.

#### technical information

dimensions	L 545 x H107 x W100mm
weight of operation	12kg
opening system	manual open by hand
closing system	by spring
drive	for one door
synchronisation	two operators
maximum opening	95°
power requirements	230V AC/50Hz;
protection	IP22
opening time adjustment	0-20 sec pause
separate Inputs	for motion detectors, presence sensors and photocells
output	DC for auxiliary sensors and electric lock
power failure	doors close by spring
push & go	automatic opening by pushing
adjustments	via control unit or digital selector
release time	0.5 sec for lock before opening of door
