The multi-network cable tester quickly tests by scanning the wires continuity, miswiring and polarization in network cables. Tests Ethernet 10Base-2(BNC), 10Base-T(UPT/STP0/356A/TIA-568A/TIA-568B/Token Ring). By using the remote terminator, you can test the cable before or after the cable's installation. The multi-network cable test allows you to test the ground of shielded twisted pair cable. Includes owner's manual and carrying case; requires one 9V battery (not included).
