MIT400 CAT IV Industrial Insulation Testers

- CAT IV 600 V applications
- TRMS & DC Voltage measurement
- Insulation testing up to 1000 V and 200 GΩ
- Continuity testing at 200 mA or 20 mA down to 0.01 Ω
- Pass/Fail limit alarms
- Combined Analogue and dual digital display
- PI/DAR and Timer function
- Test result storage (MIT420)
- Bluetooth[®] wireless data transfer (MIT430)

DESCRIPTION

The new Megger MIT400 series insulation and continuity testers has been designed for electrical testing by the utilities, industrial, commercial and domestic electricians. The wide range of features also makes the MIT400 series ideal for the maintenance and service/repair engineer.

They replace the well-established BM400 insulation tester range, given greater functionality with simplified operation, greater application range and increased safety.

The range

The range consists of five instruments:

- MIT400 250 V, 500 V and 1000 V
- MIT410 50 V, 100 V, 250 V, 500 V and 1000 V + PI, DAR
- **MIT420** 50 V, 100 V, 250 V, 500 V & 1000 V + PI, DAR and result storage
- **MIT430** 50 V, 100 V, 250 V, 500 V & 1000 V + Bluetooth download

MIT40X 10 V to 100 V in 1 V steps

INSULATION TESTING

- Test voltages 250 V to 1000 V or 50 V to 1000 V insulation test voltages available
- Test Lock Locks insulation test on continuously.
- **Test voltage display** The actual test voltage is displayed on the smaller digital readout, with the insulation result on the larger digital display.

- **Analogue arc** The display also features an analogue arc to replicate the response of a moving coil display.
- **PI and DAR** Polarisation Index (PI) and Dielectric Absorption Ratio (DAR) functions
- **200** G Ω Insulation testing from 20 G Ω (MIT400) to 200 G Ω (MIT420 and MIT430).
- Silicone leads High quality flexible silicone test leads are comfortable to use and prevent measurement errors on higher GΩ ranges.
- **Test inhibit** prevents testing if voltages in excess of 50 V are detected when making insulation tests.
- **Insulation buzzer** The buzzer can be set to buzz if the insulation resistance is above a preset limit, set via the Setup menu.

CONTINUITY TESTING

- **Auto-test** Auto test on circuit contact enables real two handed operation without the need to press the test button.
- **200 mA or 20 mA** Either 200 mA or 20 mA continuity test currents are available. 20 mA test current will considerably increase battery life.
- Lead null Lead resistance compensation (NULL) operates up to 9.99 Ω of resistance.
- **Buzzer** ON-OFF selected by simple push button.
- **Buzzer limit** Continuity buzzer limit alarm provides adjustment of the maximum resistance the continuity buzzer sounds. This is adjustable from 1Ω to 20Ω in 5 steps.

• $k\Omega$ range extends resistance measurement to 1 M Ω .

DISPLAY

The display offers a combination of analogue arc and a dual digital readout:

Analogue arc:

- Full display width analogue arc.
- Patented arc display shows essential charge and discharge characteristics not visible on a digital display.
- Single pointer "needle" response is similar to a moving coil meter.
- Logarithmic display for better low insulation value measurements.

Dual digital display:

- Large main digital readout for good visibility of all main measurement results
- Second digital display for additional data such as:
 - Insulation test voltage.
 - Insulation leakage current.
 - Supply frequency (when measuring volts).

Test mode eg. PI, DAR or TI (Timed mode).

MIT40X - VARIABLE INSULATION VOLTAGE TESTER.

The MIT40X provides a unique solution for awkward insulation voltage measurement applications. The MIT40X has a variable insulation test voltage from 10 V to 100 V in 1 V steps, selectable in the "Set-Up" menu. Once selected this can only be changed by re-configuring in the Setup menu.

Typical applications include:

- Commercial avionics
- Military land, marine and air communications
- Manufacturing/production line goods
- Electrostatic measurement
- Component testing
- Battery powered traction and lifting equipment

STORAGE & DOWNLOADING RESULTS

MIT420

The MIT420 is capable of saving test results for recall to the screen. A simple storage structure allows for a test number and screen results to be recalled individually.

MIT430

The MIT430 supports both test result storage and downloading.

Test results can be stored in the instrument and subsequently downloaded to a computer with the Megger download manager software.

Data transfer is by Bluetooth, with the MIT485 Bluetooth

transmitter being enabled when the Download mode is selected on the instrument.

NOTE: The receiving PC needs to have Bluetooth capability or a USB port fitted a Bluetooth receiver. Class II (10m) is acceptable.

SAFETY

Designed to be exceptionally safe to use, fast detecting circuitry prevents damage to the instruments if accidentally connected to live circuits or across phases. Specifically, all instruments:

- Meet the international requirements of IEC1010-2 and EN61557.
- Live circuit detection inhibits insulation testing on circuits above 50 V.
- Live circuit detection and test inhibit on continuity measurements.
- Default display of live circuit voltage on all ranges.
- Detection and inhibit functions even if the protection fuse has failed.
- Suitable for use on CAT IV applications and supply voltages to 600 V.

600 V CAT IV

All MIT400 instruments are designed to meet the safety requirements for use on CAT IV 600 V.

APPLICATIONS

(A) Electrical installations testing:

The MIT400 includes all the features required for electricians and engineers working in a range of industries. Available features are selected to make testing easy and fast in a range of situations. Typical industries include:

> Electrical supply companies Large and small scale electrical installation Periodic inspection and testing Cable testing

(B) Service, repair and maintenance:

The MIT410 and MIT420 add additional features required for engineers working on more demanding applications. Functions such as PI and DAR, capacitance measurement and higher insulation range increase the suitability for applications such as:

Manufacturing/production testing

Panel building

- Railway and other transportation
- Motor testing
- Cable inspection/quality control
- Street lighting maintenance
- Avionics ground testing and maintenance Military applications

Fuse

Use only a 500 mA (FF) 1000 V 32 x 6 mm ceramic fuse of high breaking capacity HBC 50 kA minimum. Glass fuses $MUST\ NOT$ be fitted.

Safety Protection

The instruments meet EN 61010-1 (1995) to 600 V phase to earth, Category IV. Refer to safety warnings supplied.

E.M.C.

In accordance with IEC 61326 including amendment No.1

Temperature effects

Temperature coefficient: <0,1% per °C up to 1 G Ω
