

FEATURES:

- Fits Fluke, H-P, Tektronix, Wavetek and Amprobe DMM's with sheathed style safety jacks.
- Probe Bodies, Spade Lugs, Medium Alligators and Minigrabber/Minipincer Test Leads attach directly to the flexible test leads for test versatility.
- Flexible test leads feature high strand count silicone wire for extreme flexibility and high temperature resistance. Banana plugs are double crimped to the wire and the plugs are molded directly to the wire for added pull strength.
- IC Tip and Extended Fine Tip Adapters fit directly over the probe tip. Extended Fine Tip allows testing of hard to reach test points. Tip is insulated to the point, preventing shorting of adjacent components.
- Medium Alligator is insulated for added safety and features a jaw opening of up to 0.30" (8 mm).
- Minigrabber/Minipincer test leads (hook & pincer style) are designed with a slim .36" (9,14 mm) body width for easier access to test terminals. Contacts are gold plated beryllium copper to ensure signal integrity. The grabber hook attaches to component leads up to .060" (1,5 mm) O.D. and the pincer has a tip opening of up to .09" (2,3 mm).
- Insulated spade lugs are compatible with screw sizes from #10 to 1/4" (M4 to M6).
- Tri-fold pouch of durable nylon conveniently stores the test accessories.
