

## SunCon BMY Industrial Connectors:SunCon:Sockets and plugs

| Delivery informations                        |   |
|--|---|
| Availability                                 | available   |
| Document created at                          | 18.06.2008  |
| Product description                          |   |
| Description                                  | Y-splitter with two cable sockets and one cable plug              |
| Туре   | SunCon BMY  |
| Order No.                                    | 934 521-100   |
| Housing Color                                | black   |
| Number of contacts                           | 1   |
| Technical data                               |   |
| Pin dimensions                               | 5 mm  |
| connectable solar-conductor-section          | assembled 4 mm2   |
| Rated voltage                                | DC 1000 V   |
| Rated current                                | 30 A at 70 °C / 23 A at 85 °C                                     |
| Contact resistance                           | < 5 mOhm  |
| Material                                     |   |
| Contact material                             | Cu-composition  |
| Contact surface material                     | tin plated  |
| Housing material                             | Macromelt   |
| Environmental conditions                     |   |
| Protection class (IEC 60529)                 | IP 68   |
| Pollution severity                           | 2   |
| Temperature range                            | -40 °C to +85 °C  |
| Upper limiting temperature                   | +110 °C   |
| Inflammability class                         |   |
| Housing                                      | 94 V-0  |
| Approvals                                    |   |
| Technical Inspection Authority certification | pending   |
| Packing unit                                 |   |
| Packaging unit                               | 10 pieces   |
| Other features                               |   |
| Warning                                      | The SunCon connectors are designed for fixed cable installations. |
