

RLD10 Refrigerant Leak Detector

The RLD10 makes pinpointing leaks as easy as one, two! Detect leaking refrigerant using the high sensitivity mode then switch to the low sensitivity mode to pinpoint its source. If background noise makes the audible tic hard to hear, you can count on the color scaled LED indicators. With the RLD10 you'll get the latest in refrigerant detection at a great price.

- Auto zeros when turned on
- LED panel indicates refrigerant leak concentration
- Two position sensitivity selector
- Audible tick rate
- Long gooseneck probe
- One-hand operation
- Automatically detects all existing refrigerants and blends
- One year limited warranty

RLD10 • Refrigerant Leak Detector

The RLD10 makes pinpointing leaks as easy as one, two! Detect leaking refrigerant using the high sensitivity mode then switch to the low sensitivity mode to pinpoint its source. If background noise makes the audible tick hard to hear, you can count on the color scaled LED indicators.

With the RLD10 you'll get the latest in refrigerant detection at a great price.

- Auto zeros when turned on
- Color scaled LED's indicate refrigerant leak rate
- Two position sensitivity selector
- Audible tick rate
- Long gooseneck probe
- One-hand operation
- Automatically detects all existing halogen refrigerants and blends
- One year limited warranty

Specifications

Power Supply	One 9V battery
Sensor	Advanced ionization detection
Sensitivity	.5 oz. per year R134A
Indicators	Audible: Variable tick Visual: Scaled LED array
Warm-up	<10 second
Response Time	<1 second
Duty Cycle	Continuous
Battery Life	Approximately eight hours
Probe Length	18-1/2"
Ambient operating conditions	32 to 102°F (0 to 40°C), 0 to 80% RH (noncondensing)

Replacement Parts:

Sensor Tip GuardRLDTG
SensorRLDSENS
ManualRLD10-MAN

Optional Accessories:

Deluxe Heavy Vinyl Carrying CaseAC315
Deluxe Hard Carry CaseAC506
