

❖ HYGROCLIP HP28

Description

Insertion probe for humidity and temperature with a stainless steel probe and filter, 10mm diameter.

Compatible with the HygroPalm, HygroLog and HygroLab (with an adapter cable).

The HP28 is suitable for measurements in solid materials, such as powders, granules and packaging materials. It is also suited to measurement in building materials such as concrete and brick when a hole is predrilled.

The probe can also be used for measurements in ducts if required.

Technical Data

Measuring range	0...100%rh, -40...+85°C
Output	DIO only
Mechanical	280 x 10mm Ø, 2m cable
Sensor protection	Steel sinter filter

Applications

Checking of bulk materials, powders, granules, grain, metal ores, concrete, masonry.
