Professional Weather Station

A fully functional weather forecaster that measures:

- Temperature
- Barometric pressure
- Wind speed and direction
- Wind chill
- Humidity
- Rainfall
- Dew point temperature

It can then plot a bar graph showing the current and historical data for barometric pressure and rainfall for up to a period of 24 hours.

The weather station can then be connected to your PC via a USB connection and the latest weather data can be collected from the base station.

The unit itself also features a radio-controlled clock with alarm. It can also be set up to alert you to certain weather conditions when a certain criteria are met.

Features:

- All-in one remote sensor
- Easy to setup (mast mounting)
- Full function weather station
- Weather forecast
- Indoor / outdoor temperature and humidity
- Outdoor wind speed and direction
- Barometric pressure and rainfall reading with bar-graph
- Heat index, wind chill and dew-point temperature with maximum and minimum memory
- Optional UV measurement
- PC download
