Video Amplifier with 75 ohms Driver

■ GENERAL DESCRIPTION

THE NJM2538B is a video amplifier with 75ohms drivers, which includes LPF and BPF of both Y and C system.

THE NJM2538B can compose the output circuit of digital video items with a little external components, because it prepares black and white 2 level imposer, gain controller, Y/C mixer, and SDC interface. It is suitable for portable items.
