## Application Notes

### Soldering Profile - SMT Receptacle

#### Recommended Temperature Profile (Reference)

- 1) The preferred technique for mounting the SMT Receptacle package is to reflow solder the device onto a PCB (Printed Circuit Board).
- 2) The maximum temperature for the lead of PCB surface does not exceed 240 .
- 3) The right reflow soldering profile is for reference and will modify under individual different conditions.

#### Hand Soldering (Reference only)

- 1) Soldering iron: The maximum temperature 240 .
- 2) Soldering period: within 5 seconds.

## Application Notes

### Extraction Tool

Part Number: 1775231-1

### Mating/Unmaking — Cable Plugs

- 1) To mate the connectors, insert the cable plug into the SMT receptacle, making sure the cable plug is as vertical as possible and the mating axis of both connectors are aligned. Do not insert on an extreme angle.
- 2) To unmate the connectors, insert the end portion of the extraction tool under the SMT receptacle connector flanges and pull off vertically in the direction of the mating axis.

### Permissible Load

Do not apply excessive load to the cable after the connectors are mated. Please refer to the permissible loads indicated in the figure to the right.
