

VLT130 Series

130W single and quad output AC/DC Power Supplies

High density and high efficiency are featured in the VLT130 AC/DC power supply. EOS brand VLT130 family of power supplies utilize our patented resonant technology in a slim line 5.0"x3.14"x1.025" package and 82% power conversion efficiency. Single and quad outputs in all popular DC output configurations are available ranging from 3.3v to 48v and single wire current share.

Packing over 8 watts per cubic inch the dual-channel VLT130 family is ideal for data networking, industrial and multimedia applications. VLT130 has auto ranging 90v to 264v input and meets EN55022-B, FCC Part 15 Level B Noise and Class 2 safety approvals. The VLT130 family is RoHs compliant and our factory is ISO 14001 environmentally approved. World-wide safety standards apply and the power supply is fitted with OVP and OCP standard features as well as 1+1 redundancy and harmonic correction.

Features :

- > 130 W fan cooled rating.
- > Smallest 130W Ac/Dc power Supply
- > Small 5.0x3.14x1.025 inch form factor.
- > Dual channel output
- > EN61000-3-2 class A harmonics.
- > EN55022 and FCC Part 15 Level B
- > Cover Kit accessory available.

Note:

- Maximum current per output. Do not exceed maximum output power rating.
- Power good and Power Fail signal on quad output models only.
- The use of the Remote Sense function required 15CFM airflow.
- Quad output Models: The output section of the VLT130-4XXX is split into 2 independently regulated channels. Channel A consists of the main output V1 and auxiliary output v4. channel B consist of the main output V3 and auxiliary output V3. The maximum output power that may be drawn per channel is 45W with convection cooling or 65W with fan cooling.
- Single output models: The output section of the VLT130-1XXX is split into 2 independently regulated channels. Channel A consist of the main output V1A. Channel B consist of the main output V1B. An internal shunt resistor of value 0 ohms connect both channels of the power supply. In an event whereby this shunt resistor is removed, the maximum output power that may be drawn per channel is 45W with convection cooling or 65W with fan cooling.
