

## Features

- RoHS lead free solder and lead solder exempted products are available
- Power Factor Correction (PFC) meets EN61000-3-2
- Same size, airflow, and construction as MPU150/MDU150 with over 33% more power
- Single-wire current sense on quad model outputs V1 and V2
- Remote sense on quad model outputs V1 and V2
- Current share and N+1 redundancy (standard on all models)
- Overtemperature, overload, and overvoltage protection
- · Available with SAE mountings
- MDU200 models have 48 VDC input

## Description

The MPU200/MDU200 Series is based upon the proven architecture of the MPU150/MDU150 product line. The MPU products incorporate Power Factor Correction (PFC) with a low-profile package designed to meet 1U height constraints. In this series, 200 watts of continuous output power is provided with single or multiple output units suited for distributed power or central power applications. The series provides high current +3.3V and +5V on a single platform to support mixed-mode, high-speed digital circuitry.

Power-One's dual-converter architecture combines high reliability with exceptional regulation. All multiple-output models feature remote sense on outputs V1 and V2 to provide independent compensation of output cable losses.

Other standard features include independent current sharing on V1 and V2 quad-model outputs, thermal shutdown, and remote inhibit. Airflow of 300 linear feet per minute (LFM) is required to deliver the full power density of greater than 4.0 watts per cubic inch.

The MDU200 Series provides the same benefits as the MPU200 Series, with a nominal 48 VDC input.

**NOTES:** 1) This product is not rated for convection applications.

2) The MPU/MDU150 products require a minimum of 300 LFM of forced-air cooling under ALL load conditions. It is recommended that the airflow be applied from the input side of the power supply blowing towards the output.

3) Maximum peak-to-peak noise expressed as a percentage of output voltage, 20 MHz bandwidth.

4) Total current for V1 and V2 is not to exceed 35A.

5) Total power on V3 and V4 is not to exceed 100W.

Model numbers highlighted in yellow or shaded are not recommended for new designs.

#### Ordering Information:

| OPTIONS                             | SUFFIXES TO ADD TO PART NUMBER   |
|-------------------------------------|--|
| Metric Mounting                     | Add "M" as a suffix to the model number to order chassis with M3 x 0.7 mounting inserts. Consult factory for availability.               |
| Isolation Diode                     | Offered on single-output models. Add "D" to the part number suffix if an isolation diode is needed.<br>Consult factory for availability. |
| RoHS lead solder exemption          | No RoHS suffix character required.   |
| RoHS compliant for all 6 substances | Add "G" as the last character of the part number.  |

## Options

| DESCRIPTION     | NOTES   |
|-----------------|---|
| Metric Mounting | Add "M" as a suffix to the model number to order chassis with M3 x 0.7 mounting inserts. Consult factory for availability.            |
| Isolation Diode | Offered on single-output models. Add "D" to the part number suffix if an isolation diode is needed. Consult factory for availability. |

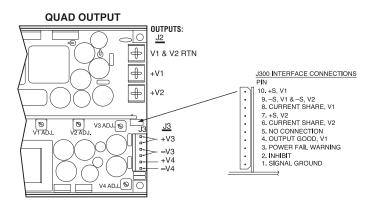

# Overall Size: 8.00" x 4.20" x 1.50" (203.2mm x 106.7mm x 38.1mm) Weight: 2.0 lb (0.89 kg)
