

# **Quick Reference Guide**1.5 mm AMP Mini CT Connector Series

The AMP Mini CT connectors are miniature wire-to-board and wire-to-wire connectors. Like the standard AMP CT connector series, these connectors are tailored for improved harness productivity and feature a compact design with contacts on 1.5 mm pitch. Wire-side connectors can be used to produce a variety of harness styles by fully automatic high-speed assembling machines.

### **FEATURES AND BENEFITS**

- 2 kinds of termination method: IDC, crimp
- Discrete wire interconnect
- Circuits range from 2 40
- AWG 24~28
- Both T/H and SMT mounting styles are available
- Kinks for self-retention on boards
- UL 1977 File No. E28476
- CSA LR 7189-13

### **PRODUCT APPLICATIONS**

- Business equipment
- Industrial machines
- PC, Printer and Fax
- C-TV
- Audio
- Air conditioner
- Routed power & signals
- LED lighting controls
- Indoor & outdoor lighting
- LED illumination

### How to select an AMP Mini CT connector part number

The charts on this page highlight the relationship between the number of contacts (positions) to the part number. Please see the sample chart below that was designed to help you select the correct part number for your needs. For single digit position to dash numbers, attach the digit to the end base number. For double digit position to dash numbers, attach the first digit to the front of the part number, add a dash and the base part number, then follow the base part number with a dash and the second digit.

Example Base Part Number	Your Criteria	Example Position to Das	h Select	tion				End Part Number Based on Criteria
		Position	8	9	10	11	12	
353293	You require and 8 position MT housing	Dash Number	-8	-9	-10	-11	-12	353293-8
353293	You require and 12 position MT housing	Dash Number	-8	-9	-10	-11	-12	1-353293-2

### Mass Termination (MT) VS. Crimp Poke

- Time savings
- Preloaded IDC contacts
- Automation
- · Mates with same headers as crimp

### **Crimp Poke**

- Cost effective
- Flexibility (AWG)
- Manual labor
- · Mates with same headers as MT

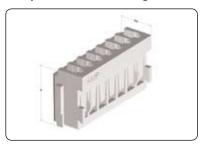

### MT AMP Mini CT Housing: 353293

Unstripped wires inserted into MT housing.

## Crimp AMP Mini CT Contact: 353907 Crimp AMP Mini CT Housing: 353908

Contact crimped onto a stripped wire to be inserted into a crimp housing.

### **Cable Side Connectors**

### 4 Panel-Mount

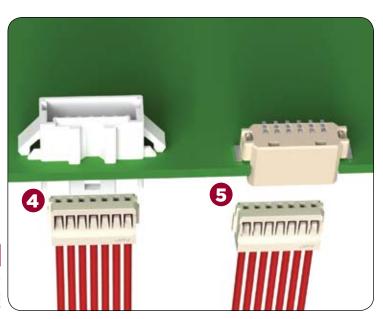

Transmits signal through a notch in a panel or a PCB and requires two housings to complete a circuit.

### 5 SMT Inverted Thru Board

Positioned thru a cutout or notch in a PCB and requires only one housing to complete a circuit. The innovative design eliminates wire dress management issues.

### Frequently asked questions

#### What wire gauge will you be using?

More flexibility with AWG when using Crimp (24-28 AWG) vs. MT (26~28 AWG).

#### Are the connectors available for IDC?

Yes, we offer an MT version that is preloaded with IDC contacts.

#### Is your process automated?

MT housings are suitable for automated processes.

#### What current, voltage and operating temperature is required?

Please see product specification information on the charts on page 3 of this document.

#### Which is a more standard header, with or without a locating boss?

The most standard headers tend to have a locating boss as it makes it easier for the customer to align the connector onto their board.

#### What special retention mechanisms are available to provide stability?

Tyco Electronic's T/H headers have a staggered tine design to provide stability.

#### What are my tooling options?

Tyco Electronics offers comprehensive tooling options including manual pistol-grips, manual mini-press, pneumatic mini-press, semi-auto DECAM and an automatic DECAM tool. For more information, please visit www.tooling.tycoelectronics.com.

#### What if my application is constrained for space with the 1.5 mm CT?

Tyco Electronics continues to develop and design interconnects that meet the needs of miniaturized applications. If your application is contrained for space, browse our HPI products at the link below.
