# MULTI-BEAM XL and MULTI-BEAM XLE Power Distribution Connector Systems

#### **Board-Mount Connectors**

Electronics

#### **Product Facts**

₹ Тусо

- Single-piece molded housings
- Custom configurable modular design
- AC and DC power in the same connector — Meets UL safety requirements
- Current Interrupt ratings per UL 1977 — for "Hot-Plug" applications
- Compact size suitable for distributed DC power applications
- Molded-in guide pins provide generous blindmateability
- Up to 3 levels of contact sequencing:
  - 1st Pwr/Gnd
  - 2nd Pwr & Signals
  - 3rd Trigger Signals
- Low Mating and Un-mating force
- Solder or press-fit termination to PCB
- Meets SSI power connector requirements for DPS, MPS and HPS applications
- 30 micro-inch [0.76 micro-meters] gold post-plated contacts for high reliability
- All MULTI-BEAM XL and MULTI-BEAM XLE products in this section are RoHS compliant

The MULTI-BEAM XL and MULTI-BEAM XLE modules are a blind-mateable boardto-board power distribution connector system. With a variety of available power contacts and a modular design, customers are able to customize this connector to their exact needs. In addition to selecting the number of power and signal contacts, customers are also able to choose the mating sequence of contacts they need for their specific application.

MULTI-BEAM XL connectors feature dual-beam and four-beam power contacts,

rated at 35A. The new MULTI-BEAM connector features a true hot-plug designed three-beam contact, rated at 43A.

The product is also available in versions complying with the Server Systems Infrastructure (SSI) Standard. MULTI-BEAM XL and MULTI-BEAM XLE products offer high reliability and high current density in a package designed specifically for modular hot-swappable power distribution systems. They are ideal for blind-mating in modular and rack mounted systems. The high performance design and heavy gold plated contacts meet requirements across many applications including power distribution for compact (1U) computer servers through high-end servers, fault-tolerant computers, networking equipment, telecommunication switches, medical instrumentation, and industrial control equipment.

The compact design also meets the I/O standard of modern modular and hot-swappable redundant (N+1) power supplies and uninterruptible power supplies.

# MULTI-BEAM XL and MULTI-BEAM XLE Power Distribution Connector Systems (Continued)

**MULTI-BEAM XLE Connector** 

Features new 3-beam power contact

MULTI-BEAM XL connector)

Two hot-pluggable power contacts to choose from:

than MULTI-BEAM XL power contact)

Vented housing allows for better air flow

50A High power contact (35% increase compared to

Slimmer housing design allows 40% more current in the

20A Low power contact (occupies 50% less PCB space

Over 40% lower mating force than original MULTI-BEAM XL

### **MULTI-BEAM XL Connector**

- Expandable length to accommodate up to 36 power contacts
- Contact spacings are expandable to accommodate higher voltages and/or higher current requirements
- 4-beam or dual beam power contacts available
- Base metal made from high conductivity copper alloy (over 98% copper) offers superior performance compared to alternative materials

# **Evolution of MULTI-BEAM Power Contacts**

#### Dual-Beam Contact

- Original design
- .017" thick stock

#### 4-Beam Contact

- .017" thick stock
- **35A** current rating
- Features eight independent beams
- Parallel current paths yield a lower contact resistance
- Tuned beam design provides lower mating forces and higher durability life cycles

same space

connector

3-Beam Contact

- Offered on new MULTI-BEAM XLE connector
  - .020" Thick Stock
- 50A Current Rating
- Improved design offers lowest mating force available in MULTI-BEAM product line
- True hot-plug design preserves the separable contact interface to provide long term reliability after hot-mate and un-mate cycles

**Power Contacts** 

**Signal Contacts** 

#### **Contact Wipe**

Contact Type	Description	Sequence	Minimum Wipe
Power (or GND) Contact	Make First Break Last (MFBL)	1	0.200″ [5.08 mm]
Power Contact	Standard	2	0.150" [3.81 mm]
Signal Contact	Contact Standard		0.150" [3.81 mm]
Signal (trigger) Contact	Make Last Break First (MLBF)	3	0.100″ [2.54 mm]

The MLBF power contact and the Standard Signal contact are sequenced to mate at the same time ... sequence #2.

#### **Product Configurations and Part Numbers**

The connector configuration is described by reading Left-to-Right on the Plug mating interface and Right-to-Left on the Receptacle mating interface. Custom configurations can be produced due to the modular design of the product.

**Configuration Description:** ACP indicates AC Power, P indicates DC Power, HDP indicates High Density Power, LP indicates Low Power (MULTI-BEAM XLE connector only), S indicates Signal. The corresponding contact spacing and voltage ratings are shown below.

00" [5.08 mm] spacing .11	5" [3.81 mm] spacing	0.100" [2.54 mm] grid
nection to same voltage*	200 Volts*	60 Volts*
	200" [5.08 mm] spacing .11 nection to same voltage*	

\* With circuit board designed to UL 1950, IEC 609

# "NEW" MULTI-BEAM XLE Connectors

# NEW

#### **Product Facts**

- Two NEW hot-pluggable power contacts to choose from:
  - 50 Amp high power contact
  - 20 Amp low power contact
- Over 35% lower mating force than original MULTI-BEAM XL connectors
- Over 40% more current in the same over all PCB space
- Low-wear contact design passes Telcordia environmental exposure requirements
- New design allows more angular mis-alignment

Tyco Electronics' new MULTI-BEAM XLE connectors are the latest addition to the MULTI-BEAM XL power connector product family. MULTI-BEAM XLE connectors feature a new 3-beam contact, made from a thicker/higher conductivity material than the original single beam or 4-beam designs.

The new 3-beam design allows for a greater angular mis-alignment between mating connectors and offers a lower mating force. In addition, MULTIBEAM XLE connectors offer a slimmer housing design that reduces the overall PCB footprint and has the option of using a low power contact — the industry proven Universal Power Module (UPM) contact.

The new contacts and housing design allows more power in the same footprint — over 35% more current in the same space. MULTI-BEAM XLE connectors are as modular as the original MULTI-BEAM XL connectors in that they can be designed to fit specific customer needs.

#### Applications

- Modular Hot-Swappable Power Supplies
- 1U / 2U Servers
- High-end Computer & Telecommunications

#### Equipment

- Power Distribution Circuit Boards
- Power Distribution Cable Assemblies

# **MULTI-BEAM XL Current Pass-Thru Power Distribution Connector System**

I BITTUTT

#### **Product Facts**

- Combines PCB and cable mounted contacts
- Ideal for separating AC input from DC input
- Eliminates FASTON tab interface at the back of the connector housing
- Requires less space than two housing designs
- Terminates 12 AWG and 10 AWG wire
- Mates with Tyco Electronics vertical and right-angle PCB plugs
- High strength housing materials
- RoHS Compliant

**Technical Documents Product Specification** 108-1973 and 108-2157

**Application Specification** 114-13038

The Cable Pass-Thru MULTI-BEAM XL receptacles securely terminate up to a 10 AWG wire directly into MULTI-BEAM XL PCB mounted receptacles. The design includes a "terminal position assurance" (TPA) feature that confirms the manually inserted wires are fully seated. The product offers a unique way of using the MULTI-BEAM XL PCB receptacles as a sort of "docking" connector. A single docking connector is far easier to mate to and to design around in a blindmate application, than multiple power and signal connectors. By separating

some circuits to be cable terminated and some to be PCB terminated it allows both high voltage (AC) and low voltage (DC) power to pass through the same connector.

This separation of the AC and DC power eliminates the concerns of high voltage power running through circuit boards better suited to carry only low voltage circuitry. Additional applications may include designs where the power is better routed directly to a different PCB, through cables, yet passes through a single docking connector for ease in system design.

The Cable Pass-Thru connector is offered in both right-angle or vertical PCBmount orientations and is supplied with either pressfit or solder pc tails. The connector is mate-able to either PCB mounted or cable mounted MULTI-BEAM XL or MULTI-BEAM XLE plugs.

All MULTI-BEAM XL cable connectors are supplied pre-assembled by Tyco Electronics.

# Cable Receptacle Assemblies

# **Product Facts**

- Single one-piece housing design
- Terminal Position Assurance (TPA) Secondary Locks on contacts help prevent contact back-out
- Pre-assembled made-toorder cable assemblies
- Installation to panel provides float in X, Y and Z directions
- Insulation crimp on all contacts
- 30 microinch (.76 micrometers) gold plated contacts for high reliability
- Touch-safe design passes UL1977 and IEC 60950 finger probe test
- AC and DC power in the same connector meets UL & IEC safety requirements
- All MULTI-BEAM XL products in this section are RoHS compliant

MULTI-BEAM XL Cable Assemblies allow designers freedom to connect power supplies and power distribution subassemblies in a wide variety of applications. Expanding beyond board-to-board applications the cable assemblies are available for both cable-to-board or panel-mount applications and can terminate 8-16 AWG and 22-26 AWG wires all in one connector, without using adapter circuit boards. In addition, the power contacts are designed to be able to accept two-wire terminations which can further reduce harness complexity by reducing or eliminating mid-wire splices.

The use of high temperature glass filled housing materials, redundant contact retention and high conductivity contact materials allows the use of this connector in very high current density applications. The features work together to result in a highly durable and compact power connector, which offers industry leading minimum millivolt drop through the connection. The connector was designed to pass the UL 1977 and IEC 60950 finger probe test which makes the connector touch-safe. The insulation crimp adds further safety by keeping the insulation from being pulled away from the termination point. These features eliminate the need for a secondary cable clamp which often can be size prohibitive.

The cable connectors are designed to mate to the de-facto standard Tyco Electronics MULTI-BEAM XL right-angle or vertical PCB plugs. The combination of PCB and cable connections, both with mixed power and signal arrangements provides a universal power distribution connector systems.

The cable assemblies are all RoHS compliant, designed to specific customer requirements and manufactured in Tyco Electronics' cable assembly manufacturing facilities.

# MULTI-BEAM XL Power Distribution Connector System Cable Plug Assemblies

# Cable Plug Assemblies Product Facts

- High strength housing materials
- Hot-Pluggable
- Installation provides float in X, Y and Z directions
- Sequenced mating
- RoHS complaint

**Board-to-Board Products** 

- Modular mold design provides configuration flexibility
- Integral cable clamp supports contacts and provides strain relief in minimum amount of space
- 30 microinch (0.76 micrometers) gold plated contacts for high reliability
- Sold only as part of a pre-assembled cable assembly

The newest addition to the MULTI-BEAM XL cable assemblies are the cable mounted plugs. Produced with modular molds, the connectors can be made in a wide variety of sizes. The PCB mounted MULTI-BEAM XL plugs are typically rigidly mounted to hot-swappable power supplies and the systems they connect with. The "float blind-mate drawer connector" design of the MULTI-BEAM XL cable connectors helps eliminate the concern of an inadequately aligned chassis. The connector can accept mating parts misaligned by as much as 3 mm  $(\pm 1.5 \text{ mm})$ , and still mate without applying stress

to solder or complaint pin terminations. The MULTI-BEAM cable plugs can terminate 8-14 AWG and 22-26 AWG wires all in one connector, without using adapter circuit boards. The use of high temperature glass filled housing materials, redundant contact retention and high conductivity contact materials allows the use of this connector in very high density applications.

The cable assemblies are all RoHS compliant designed to specific customer requirements and manufactured in Tyco Electronics' internal cable assembly manufacturing facilities. Technical Documents Product Specification 108-2157-1 Application Specification 114-13164

# MULTI-BEAM XL and MULTI-BEAM XLE Connectors Custom Configuration Worksheet

29

Downloaded from Elcodis.com electronic components distributor

# **MINIPAK High-Density Board-to-Board Power Connectors**

#### **Product Facts**

₹ Тусо

High current per linear inch

Electronics

- Various configurations to meet requirements using less board space
- Built-in alignment feature
- Shrouded insulator design
- Meets safety regulatory requirements
- All MINIPAK products in this section are RoHS compliant

#### **Typical Applications**

- Telecom and computer applications
- Routers
- Servers, mini and supercomputers
- Removable battery packs
- Uninterruptible power systems (UPS)
- Hot-swap N+1 power distribution

MINIPAK connectors are a family of board-to-board power connectors designed to deliver more current using less board real estate.

#### **Product Varieties**

This product family includes **MINIPAK high-density power connectors**, which are custom configurable and offer a combination of alignment guides, signal contacts, and DualBlade power contacts to meet different requirements. Following the PICMG µTCA.0 Standard, the **MINIPAK HD** 

connector is also available in this product line and is ideal for hot-plug telecommunications applications. With a two-row configuration, the MINIPAK HDE connector, designed to serve in both PCB-to-PCB and backplane power systems, occupies minimal PCB edge space. For applications needing a low profile solution, Tyco Electronics offers MINIPAK HDL, a blindmateable board-to-board connector, which stands only 8 mm off the edge of the printed circuit board.

#### Wide Selection of Configurations

MINIPAK connectors are available in numerous configurations. Which MINIPAK connector is most suited to your application will depend on requirements such as AC input current and voltage, DC output currents and voltages, board-mount style, and available board space. Tyco Electronics will work with you to help determine the best solution to your application and can custom tool MINIPAK configurations if needed.

# MINIPAK High-Density Board-to-Board Power Connectors (Continued)

# **MINIPAK High-Density Power Connectors**

- 32 Amps per contact, fully loaded
- Features an innovative Dual Blade contact that allows splitting 4.5 mm pitch contacts into multiple voltage rails
- Various alignment guides, signal contacts, and power contacts available to use on 4.5 mm, 6.0 mm, and 7.5 mm pitches

# **MINIPAK HDL Connectors**

- High density blind-mateable connector
- Low profile-stands just 8.0 mm off the PCB
- Solder and press-fit tails available
- Current rating of 16A
- Low contact resistance with mating forces less than 0.3lbs per contact

#### **MINIPAK HD Connectors**

- Designed to the PICMG MicroTCA.0 Standard
- Combines 24 power contacts and 72 high density signal contacts
- Rugged contact design helps provide long-term reliability
- Hot-plug design controls arc during hot mate/unmate cycles
- 3 mating levels

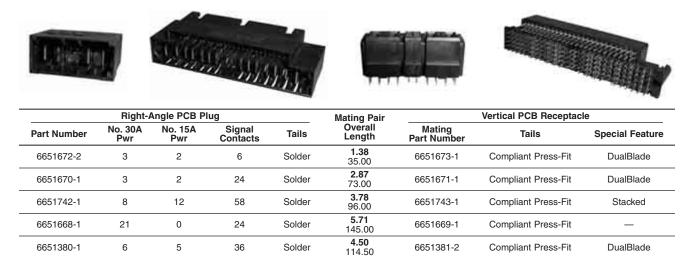

#### **MINIPAK HDE Connectors**

- Very high current density
- Two row configuration saves PCB space
- Two levels of contact sequencing available for mate-firstbreak-last operation
- Uses a hot-plug contact approved by UL for current interrupt applications

# "NEW" MINIPAK HDL Connectors

# NEW

#### **Product Facts**

- High-density, low profile, power/signal, blind-mate connector
- Developed to meet next generation 1U application by reducing airflow impedance
- Design is customizable
- Serves both solder reflow and press-fit applications with the same contact

#### Applications

- 1U Servers
- High End Servers
- Telecommunications Switches, requiring low profile
- Hot-pluggable power supplies

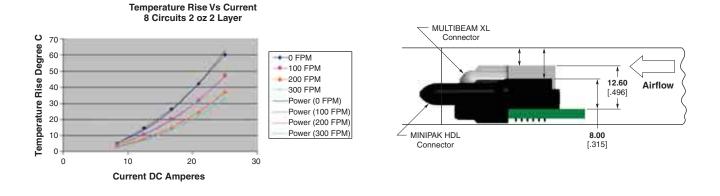

Technical Documents Product Specification 108-2325 Application Specification 114-13215

Tyco Electronics' new MINIPAK HDL connector combines a high-density power interface into a blindmateable board-to-board connector, which stands only 8 mm off the edge of the printed circuit board.

The MINIPAK HDL product consists of a right-angle plug and right-angle receptacle, which utilizes an eye of the needle tail that can be used in both solder and press-fit applications. The contact offers a current rating of 16 amps, low contact resistance, and mating forces less than 0.3 pounds per contact.

The connector is designed and manufactured to be mass-customizable, allowing the customer to select a wide array of configurations and layouts. MINIPAK HDL connectors also contain three levels of mating sequences. This product is designed specifically for modular hot-swappable power distribution systems. The MINIPAK HDL connector offers 20% more current density in a smaller package than other products currently offered in the market.

# **MINIPAK HD Connectors**

**Product Facts** 

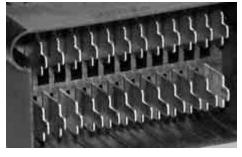

- Designed to the PICMG MicroTCA.0 Standard
- 30 microinches gold plating over nickel
- RoHS compliant
- 24 high current density power contacts, able to carry up to 14.5 Amps per contact when fully loaded
- Industry proven Universal Power Module (UPM) power contacts
- Hot-plug contact design controls arc during hot mate/unmate cycles
- 3 mating levels

Tyco Electronics supplies the Power Entry Module (PEM) connector specified in the PICMG MicroTCA Standard. The PICMG MicroTCA.0 Standard is one of the latest standards addressing future telecommunications needs. The MINIPAK HD connector combines 24 power contacts and 72 high density signal contacts. The power contacts are the industry proven contacts utilized in the Universal Power Module (UPM) and are capable of carrying 14.5 Amps per contact when fully energized. Rugged contact design ensures long-term reliability and sacrificed contact tip, controls arcing during hot mate/unmate cycles. The MINIPAK HD also features 3 levels of mating and selective gold plating on contacts.

Contact Blades Product Facts

- Designed for Hot Swap applications
- Extended sacrificial contact tip absorbs arc
- Main contacts stay free of contaminants

# **MINIPAK HDE Connectors**

#### **Product Facts**

- Compatible with 2 mm equipment practices per IEC 61076-4-101
- One-piece molded housing — fewer parts to assemble to PCB
- Very high current density 18 Amps per contact on each contact in an 8-position (2 x 4) connector
- 4 PCB tails distributes the current with just 4.5 amps per plated through hole
- Hot-pluggable contact design reduces contact degradation associated with live PCB insertions / extractions
- Two-levels of contact sequencing for mate-firstbreak-last operation

**Technical Documents** Product Specification 108-2289 **Instruction Sheet** 408-10157

The new MINIPAK HDE connector is the latest high current power module designed to serve in both backplane power distribution and general PCB-to-PCB applications. It was designed to complement the most popular high-speed backplane connectors offered by Tyco Electronics, including HM-Zd, Z-PACK TinMan and MULTIGIG RT connectors.

The two-row configuration offers a benefit to the PCB designer. The power can be fed from either the top or bottom row, with the return path routed through the other remaining row. Alternatively, the same voltage rail can be routed to

both the top and bottom rows and the return path can be routed to both the top and bottom rows of

The two row configuration offers the additional benefit of occupying just half the linear PCB edge space of other types of board-toboard power modules.

The low mating force contact reduces the moment / stresses on the connector during mating and reduces the plating wear for longterm reliability.

The MINIPAK HDE connector has two-levels of blade lengths to provide matefirst-break-last operation for hot swap operation.

In addition, in the event the connector is used to mate or un-mate to a live load, the sacrificial contact tip absorbs the arc to keep the remaining contact mating surfaces free of damage. This "hot-plug" contact design has been approved by UL for current interrupt applications.

All MINIPAK HDE connectors are easily applied to the PCB with common "flat-rock" seating tools. The connector mates with Tyco Electronics' Universal Power Module connectors found on page 55.

# FLATPAQ Modular Board-to-Board Power Connectors — Our Most Modular Board-to-Board Power Connector

#### **Product Facts**

**Тусо** 

 32 Amp high-performance ELCON CROWN BAND power contacts

Electronics

- True hot-plug power contacts available for current interruption under load
- Versatile modular design allows customized configuration to meet your specific application requirements
- Perpendicular, parallel and co-planar styles available
- Sequenced mating of power and signal contacts
- Solder and compliant pressfit termination to the board
- Unique active guide modules double as alignment guide and power contact
- All FLATPAQ products in this section are RoHS compliant

#### **Typical Applications**

- Board-to-board power interconnections
- Hot-swap N+1 power distribution for telecommunications, servers and mini-computers
- Uninterruptible power systems (UPS)
- Removable battery packs

**FLATPAQ** connectors provide hot-pluggable AC and DC power in boardto-board applications. Customized configurations of up to 45A power contacts, signal & logic lines, and guides (both active and passive) are enabled by the assembly of various standard modules. This allows the designer to specify guidance for blindmating situations, contact mating sequence, spacing for voltage ratings, and current interruption under load (true hot-plug), to meet custom design requirements without incurring any tooling expense.

# Product Highlights Highly Configurable

FLATPAQ connectors are custom configurable using standard modules that can be arranged in any order to meet the application requirements. It is even possible to have both power blades and power sockets in the same connector side. Using off-the-shelf, modular components enables quick turnaround of sample requests, typically within one week, to allow your design to move forward on schedule.

#### High-performance ELCON Power Contacts

FLATPAQ socket modules use proven CROWN BAND technology, for low insertion and extraction forces, minimal voltage drop and reduced temperature rise. The latest generation contacts are 45A USR rated (32.5A CNR) and can handle even higher currents when mounted on boards with 5 oz copper traces or on bus bars. hot-pluggable socket contacts are rated at 35A USR, 20A CNR. Both hot-plug and regular sockets can be mixed in the same connector (as can both power blades and power sockets).

Standard power modules utilize the same contacts as the MINIPAK connectors for cost effectiveness. The original "float" mounted blade modules are still available where physically isolating the blade from the PCB solder joints is desired.

24-position straight mount Signal socket modules are now available in a cost effective 1A design.

#### **Power and Signal Sequencing**

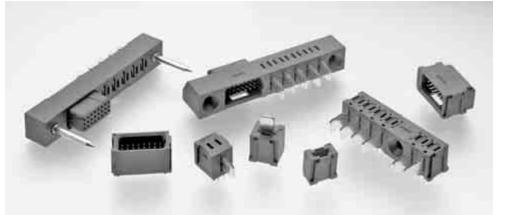

Power contacts are available in Standard, Premate and Postmate lengths to meet your power sequencing requirements. Signal contacts have Standard and Premate length options, consult Customer Service for details.

25

guides should be used in conjunction with mounting ears when placed at the end of the connector. Mounting ears should also be considered on rightangle mounted connectors.

#### Finished Connector Drawing

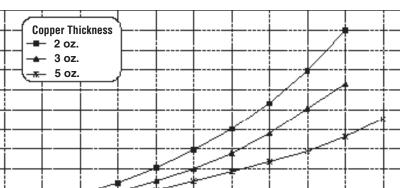

Tyco Electronics will provide a customer drawing showing all envelope dimensions and PCB mounting pattern based on the configuration indicated using the layout sheet available at www.tycoelectronics.com.

**Temperature Rise** 

See page 44 for details on completing the layout sheet. A drawing with general contact sequencing and alignment information is available; please contact Customer Service for a copy.

#### Safety Regulatory Agency Compliance

FLATPAQ connector has been evaluated by safety regulatory agencies for use in data, signal, control and power applications. Consult Customer Service for details.

# How to Specify Your Modular FLATPAQ Connector

In order to build your Modular FLATPAQ connector, it is necessary to specify all application-specific requirements such as required modules, their order, termination, and sequencing. For this purpose, a Modular FLATPAQ Connector layout form such as the one shown below is available. Just complete the form and send it to Tyco Electronics Customer Service. We will generate a Customer Drawing for you to check and approve prior to connector production. Samples are also available upon request.

 Enter your contact information, including signature and date.

**2** Indicate the connector layout by filling in the FP number of each module required in the boxes, one per box. Use one form per mated pair. The left to right order of the modules should match the mating face views of the connector. When laying out rightangle assemblies, make sure that you look at the mating face with the termination tails facing downwards.

**3** For solder terminated assemblies, indicate the tail length for each half of the connector using the checkboxes to the right of the layout grid.

#### Sample Modular FLATPAQ Connector Layout Form

#### Instructions

- 1. Indicate the connector layout by filling in the FP number of each module required in the boxes, one per box. Use one form per mated pair.
- 2. The left to right order of the modules should match the mating face views of the connector. When laying out right-angle assemblies, make sure you look at the mating face with the termination tails facing downwards
- 3. For solder terminated assemblies, indicate the tail length for each half of the connector using the checkboxes to the right of the lavout grid.
- 4. Sign, date and send the completed form to your local Tyco Electronics Sales Engineer.

# ICCON Single Pole Power Connectors

**Product Facts** 

**₹** Тусо

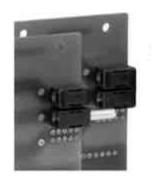

Uses high-performance Crown contact

Electronics

- 35A current rating
- True compliant press-fit and solder tails
- Pin locking feature option
- Standard DIP footprint .300 x .100 and ICCON SLIMLINE connector .100 x .100
- Insulator rated at 105°C, UL 94V-0
- Meets safety regulatory requirements
- #8 AWG wire size
- Parallel and perpendicular
- Sequencing capability
- All ICCON products in this section are RoHS compliant

#### **Typical Applications**

- Power distribution
- Board-to-board interconnection
- Board-to-busbar interconnection
- Board-to-wire interconnection
- High-density power designs
- Board stacking

ICCON connectors provide a reliable high current power interconnection with quick connect/disconnect function for space constrained motherboarddaughterboard, cableboard and board-busbar power delivery applications.

# Product Highlights High Performance Contact

ICCON connectors use ELCON CROWN BAND Contact, a multifingered spring which provides a greater surface contact area, thus ensuring small millivolt drop, minimum heat generation and very low insertion and extraction forces.

#### **Optional Locking Feature**

The optional locking feature provides minimum 5 lbs. (2.21kg) retention force to improve connection integrity, securing against accidental unmating in harsh mechanical conditions.

#### Support for Multiple Mounting Styles

ICCON connectors are available with press-fit or solder tails for mounting on both PC boards and bus bars. Tyco Electronics uses eye of the needle true compliant tails for the most reliable mounting using solderless techniques. Each ICCON connector has a 10 pin DIP footprint for convenient industry standard mounting. Through hole socket connectors can be used in "bottom entry" applications.

#### Mating with Discrete Contracts

For further versatility, ICCON connector products can mate with discrete contacts, available in a variety of termination types.

#### ICCON SLIMLINE Connectors

With a footprint close to 30% smaller than the standard ICCON connector products, the ICCON SLIMLINE connector products allow integrating more components in less board real estate, providing substantial space savings compared to connectors of this type in the same performance range.

#### Stacked ICCON

Designed for motherboardto-daughtercard power distribution systems, the Stacked ICCON combined power/guide module occupies significantly less PCB edge space than separate modules. Providing more than 200 Amps/inch, this right-angle mounted connector is ideal for applications needing high current density.

#### **Product Facts**

- Hard Metric design compatible with Z-PACK 2 mm HM, Z-PACK HM-Zd, MULTIGIG RT and Futurebus+ Connectors
- Sequenced contact options for "make-first-break-last" applications
- Compliant press-fit connections to PCB
- High Durability
   200 Cycles MULTIGIG RT, UPM Connectors
   100 Cycles — Futurebus+ Connectors
- Optional Guide Pins & Sockets for blind-mate applications
- Bellcore approved (contact Tyco Electronics for specific part numbers)
   AND SAN

 Recognized to US and Canadian requirements under the Component Recognition program of Underwriters Laboratories, File #E28476

 Produced under a Quality Management System certified to ISO 9001

A copy of the certificate is available upon request.

The Tyco Electronics Mini Power Module family of products are designed specifically to compliment the Hard Metric board-toboard backplane interconnects. These products include, MULTIGIG RT, Z-PACK 2 mm HM, Z-PACK HM-Zd, Futurebus+ and other Connectors. Available in "Standard" and "Reverse" orientations, the power modules can provide touchsafe protection (per IEC 60950) to either side of the connection (backplane or daughter card.)

Both the headers and receptacle offer compliant pin connections to the PCB. The Universal Power Module and MULTIGIG RT Connectors use the ACTION PIN Contact compliant design to provide maximum surface connection to the plated through hole. The range of products offers power contacts rated as low as 3 amps per contact (Futurebus+ Connectors) up through 20 Amps per contact (MULTIGIG RT Connectors). In addition, the newest products offer high conductivity contacts which improve the current carrying capacity by as much as 50%.

The low contact normal force, available lubricated surface coating (UPM) and high conductivity materials combine to produce a high durability cycle rating and high current density. In addition, the high temperature housing and contact materials make these power modules suitable for a wide variety of applications including modular hot-swap power supplies used in computer, telecommunications, medical, and industrial equipment.

Generous alignment features designed into the housings on the Mini Power Drawer Connector and optional guidance hardware make these Power Modules ideal for blind-mating applications.

# **Electronics**

## Mini Power Modules for PCB-to-PCB Power Distribution

## **MULTIGIG RT Power Modules**

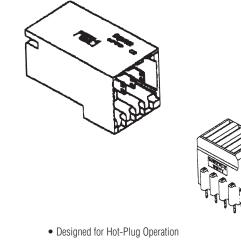

The newest of the power modules. Designed specifically for use with Tyco Electronics 2 mm Backplane Connectors. Suitable for 0.8 mm Card Spacing and made from high conductivity copper alloys, these power modules offer improved power density and high cycle life. The distribution to the PCB is through six ACTION PIN compliant tails which offer maximum surface area contact to the plated through hole. The design offers electrical protection with its sacrificial contact design and mechanical protection by recessing the power contacts. Contacts are rated for up to 20 Amps per contact, which delivers up to 120 Amps per linear inch. Three contact mating lengths are available, in 1.5 mm sequence levels.

## **Universal Power Module (UPM)**

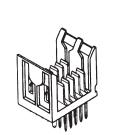

Also designed to complement Tyco Electronics 2 mm Backplane Connectors, the design meets IEC 60950 touch-safe requirements by reversing the orientation as compared to the Futurebus+ Power Modules. The touch-safe receptacle is applied to the "hot" side, which is typically the backplane side of the connection. Offered in both a Standard Power grade, rated at 10 Amps per contact and High Power grade which carries 16 Amps per contact resulting in up to 100 Amps per linear inch. Hot-plug design and low normal force provide high durability and high reliability. Three contact mating lengths are available in 1.6 mm sequence levels. Multiple contact sequence patterns are available.

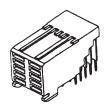

## Z-PACK 2 mm Futurebus+ Power Modules

The power modules, designed to IEC 61076-4-OX, are used along with Tyco Electronics Futurebus+ Backplane Connectors. The contacts are rated for 3 Amps and fully loaded will carry approx. 50 Amps per linear inch. Three contact mating lengths available in 0.75 mm increments.

- 6 PCB tails per contact
- Lubricated for Environmental Protection
  Designed for Hot-Plug
  4 PCB Tails per Contact

## Z1 Power Connector for AdvancedTCA Zone 1 Applications

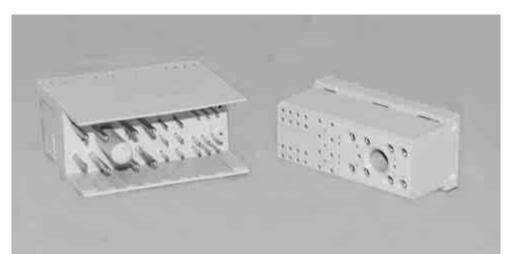

#### **Product Facts**

- Designed to PICMG 3.0 Standard
- High conductivity copper alloy on Size 16 power contacts
- .76 micro-meters

   [30 microinch] gold over
   1.27 micrometers
   [50 microinch] nickel
   plating at contact interface
- Gold-thickness controlled on inside of socket and outside of pin — at contact interface points
- RoHS compliant
- Stainless steel spring provides contact normal force — resists relaxation at elevated temperatures
- Eye of the needle compliant press-fit termination
- No special tools needed to seat connectors to PCB standard Flat-Rock seating tools
- Additional PCB retention hardware not required

Technical Documents Product Specification 108-2216 Application Specification 114-13156 Industry Standard PICMG 3.0. Rev. 2.0

#### Introduction

Tyco Electronics supplies both the power and the signal connectors specified in the Advanced Telecommunications Computer Architecture (AdvancedTCA) Standard. This standard (PICMG 3.0) is one of the latest standards addressing future telecommunications needs. The AdvancedTCA Power Connector, designated for use in Zone 1 per PICMG 3.0, combines 8 High Conductivity Size 16 pin & socket contacts along with 22 Size 22 pin & socket contacts, plus guidance into a compact interface. Both connector halves feature proven compliant press-fit contacts for easy solder-less termination to printed circuit boards.

Based on years of reliable long-term field installations the power contact design is based upon Tyco Electronics' famous Type III+ contact design. By adding the use of a high conductivity copper alloy and the low-force Eye-Of-Needle compliant pin section, the new contact delivers both ease of installation (with flat-rock seating tools) as well as industry-leading current carrying capability. The power contacts are capable of carrying 20 amps per contact and the signals are capable of carrying 2 amps per contact.

The housing design also offers improvements compared to other industry alternatives. The lead-in design for the contact cavities provides better resistance from contact stubbing. The contact retention has also been designed to eliminate the need for additional hardware sometimes used to hold the connectors to the PCB after pressing in to the PCB.

The result is a connector which is easy to install, meets all the PICMG 3.0 performance requirements and stays retained to the PCB without the additional labor required to add hardware.

## **Typical Electrical Properties**

**Current Ratings** — tested in accordance with CSA C22.2 No. 182.3-M1987 and IEC 60512-3, Test 5a requirements:

Positions 1–24, 27, 32 — 1 Amp each, per the PICMG 3.0 Specification Positions 25, 26, 28–31, and 34 — 20 Amps each, exceeds the PICMG 3.0 Specification

#### Dielectric Withstanding Voltage —

Positions 1–16 — 1000 Volts rms Positions 17–24 — 2000 Volts rms Positions 25–34 — 2000 Volts rms

## $\begin{array}{l} \mbox{Environmental Parameters} \\ \mbox{Maximum Continuous Operating} \\ \mbox{Temperature} & -105^\circ\mbox{C} \end{array}$

Durability Rating — 250 cycles, per PICMG 3.0

AdvancedTCA and PICMG are trademarks of the PICMG-PCI Industrial Computer Manufacturers Group, Inc.

60

Catalog 1773096 Revised 2-10

Dimensions are in inches and millimeters unless otherwise specified. Values in brackets are metric equivalents. Dimensions are shown for reference purposes only. Specifications subject to change. USA: 1-800-522-6752 Canada: 1-905-470-4425 Mexico: 01-800-733-8926 C. America: 52-55-1106-0803 South America: 55-11-2103-6000 Hong Kong: 852-2735-1628 Japan: 81-44-844-8013 UK: 44-(0)8002-67666

## Z1 Power Connector for AdvancedTCA Zone 1 Applications (Continued)

## **Material and Finish**

₹тусо

**Insulators** — Thermoplastic, glass reinforced, UL 94V-0

Électronics

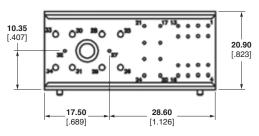

Signal Pins — Copper alloy

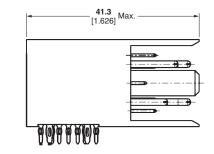

**Power Contacts** — High conductivity copper alloy, plated 0.00076 [.000030] min. gold in mating area over 0.00127 [.000050] min. nickel

**Compliant PCB Tails** — 0.0030 – 0.0043 [.000120 – .000170] tin plated, matte finish

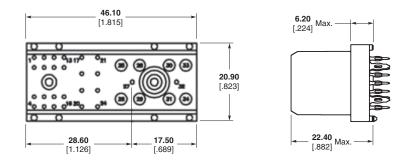

#### Notes:

- 1. Mounting hardware self tapping screw (customer supplied) can be used but not required on receptacle
- 2. Positions 1–4 not populated and reserved for future use for 308 22 position connectors.

Right-Angle Plug Part Number	Power Contacts	Signal Contacts	Tail Type
1766502-1		14	Sn Press-Fit
1766502-2	-	14	SnPb Press-Fit
1766500-1	- 8	22	Sn Press-Fit
1766500-2	- 0	22	SnPb Press-Fit
1888803-1	-	26	Sn Press-Fit
1888803-2	-	20	SnPb Press-Fit

Vertical Receptacle Part Number	Power Contacts	Signal Contacts	Tail Type
1766503-1		14	Sn Press-Fit
1766503-2		14	SnPb Press-Fit
1766501-1	8	22	Sn Press-Fit
1766501-2	0	22	SnPb Press-Fit
1888804-1		26	Sn Press-Fit
1888804-2		20	SnPb Press-Fit

#### Note: All part numbers are RoHS compliant.
