## PHOTOCOUPLER PS2501-1,-4,PS2501L-1,-4

## HIGH ISOLATION VOLTAGE <br> SINGLE TRANSISTOR TYPE <br> MULTI PHOTOCOUPLER SERIES

-NEPOC Series-

## DESCRIPTION

The PS2501-1, -4 and PS2501L-1, -4 are optically coupled isolators containing a GaAs light emitting diode and an NPN silicon phototransistor.

The PS2501-1, -4 are in a plastic DIP (Dual In-line Package) and the PS2501L-1, -4 are lead bending type (Gullwing) for surface mount.

## FEATURES

- High isolation voltage (BV = 5000 Vr.m.s.)
- High collector to emitter voltage ( V сЕо $=80 \mathrm{~V}$ )
- High-speed switching ( $\mathrm{tr}=3 \mu \mathrm{~S}$ TYP., $\mathrm{t}=5 \mu \mathrm{~S}$ TYP.)
- Ordering number of tape product: PS2501L-1-F3: 2000 pcs/reel
- Safety standards
- UL approved: No. E72422

## APPLICATIONS

- Power supply
- Telephone/FAX.
- FA/OA equipment
- Programmable logic controller

## NOTES ON HANDLING

## 1. Recommended soldering conditions

(1) Infrared reflow soldering

- Peak reflow temperature
- Time of peak reflow temperature
- Time of temperature higher than $220^{\circ} \mathrm{C}$
- Time to preheat temperature from 120 to $180^{\circ} \mathrm{C}$
- Number of reflows
$260^{\circ} \mathrm{C}$ or below (package surface temperature)
10 seconds or less
60 seconds or less
$120 \pm 30$ s
Three
Rosin flux containing small amount of chlorine (The flux with a maximum chlorine content of $0.2 \mathrm{Wt} \%$ is recommended.)

Recommended Temperature Profile of Infrared Reflow

Time (s)

## (2) Wave soldering

- Temperature
$260^{\circ} \mathrm{C}$ or below (molten solder temperature)
- Time

10 seconds or less

- Preheating conditions
$120^{\circ} \mathrm{C}$ or below (package surface temperature)
- Number of times

One (Allowed to be dipped in solder including plastic mold portion.)

- Flux

Rosin flux containing small amount of chlorine (The flux with a maximum chlorine content of $0.2 \mathrm{Wt} \%$ is recommended.)

## (3) Soldering by soldering iron

- Peak temperature (lead part temperature) $350^{\circ} \mathrm{C}$ or below
- Time (each pins) 3 seconds or less
- Flux Rosin flux containing small amount of chlorine (The flux with a maximum chlorine content of $0.2 \mathrm{Wt} \%$ is recommended.)
(a) Soldering of leads should be made at the point 1.5 to 2.0 mm from the root of the lead.
(b) Please be sure that the temperature of the package would not be heated over $100^{\circ} \mathrm{C}$.

## (4) Cautions

- Fluxes

Avoid removing the residual flux with freon-based and chlorine-based cleaning solvent.

## 2. Cautions regarding noise

Be aware that when voltage is applied suddenly between the photocoupler's input and output or between collector-emitters at startup, the output transistor may enter the on state, even if the voltage is within the absolute maximum ratings.

## 3. Measurement conditions of current transfer ratios (CTR), which differ according to photocoupler

Check the setting values before use, since the forward current conditions at CTR measurement differ according to product.

When using products other than at the specified forward current, the characteristics curves may differ from the standard curves due to CTR value variations or the like. This tendency may sometimes be obvious, especially below $\mathrm{IF}=1 \mathrm{~mA}$.

Therefore, check the characteristics under the actual operating conditions and thoroughly take variations or the like into consideration before use.

## USAGE CAUTIONS

1. Protect against static electricity when handling.
2. Avoid storage at a high temperature and high humidity.

- The information in this document is current as of February, 2010. The information is subject to change without notice. For actual design-in, refer to the latest publications of NEC Electronics data sheets, etc., for the most up-to-date specifications of NEC Electronics products. Not all products and/or types are available in every country. Please check with an NEC Electronics sales representative for availability and additional information.
- No part of this document may be copied or reproduced in any form or by any means without the prior written consent of NEC Electronics. NEC Electronics assumes no responsibility for any errors that may appear in this document.
- NEC Electronics does not assume any liability for infringement of patents, copyrights or other intellectual property rights of third parties by or arising from the use of NEC Electronics products listed in this document or any other liability arising from the use of such products. No license, express, implied or otherwise, is granted under any patents, copyrights or other intellectual property rights of NEC Electronics or others.
- Descriptions of circuits, software and other related information in this document are provided for illustrative purposes in semiconductor product operation and application examples. The incorporation of these circuits, software and information in the design of a customer's equipment shall be done under the full responsibility of the customer. NEC Electronics assumes no responsibility for any losses incurred by customers or third parties arising from the use of these circuits, software and information.
- While NEC Electronics endeavors to enhance the quality and safety of NEC Electronics products, customers agree and acknowledge that the possibility of defects thereof cannot be eliminated entirely. In addition, NEC Electronics products are not taken measures to prevent radioactive rays in the product design. When customers use NEC Electronics products with their products, customers shall, on their own responsibility, incorporate sufficient safety measures such as redundancy, fire-containment and anti-failure features to their products in order to avoid risks of the damages to property (including public or social property) or injury (including death) to persons, as the result of defects of NEC Electronics products.
- NEC Electronics products are classified into the following three quality grades: "Standard", "Special" and "Specific".
The "Specific" quality grade applies only to NEC Electronics products developed based on a customerdesignated "quality assurance program" for a specific application. The recommended applications of an NEC Electronics product depend on its quality grade, as indicated below. Customers must check the quality grade of each NEC Electronics product before using it in a particular application.
"Standard": Computers, office equipment, communications equipment, test and measurement equipment, audio and visual equipment, home electronic appliances, machine tools, personal electronic equipment and industrial robots.
"Special": Transportation equipment (automobiles, trains, ships, etc.), traffic control systems, anti-disaster systems, anti-crime systems, safety equipment and medical equipment (not specifically designed for life support).
"Specific": Aircraft, aerospace equipment, submersible repeaters, nuclear reactor control systems, life support systems and medical equipment for life support, etc.

The quality grade of NEC Electronics products is "Standard" unless otherwise expressly specified in NEC Electronics data sheets or data books, etc. If customers wish to use NEC Electronics products in applications not intended by NEC Electronics, they must contact an NEC Electronics sales representative in advance to determine NEC Electronics' willingness to support a given application.
(Note)
(1) "NEC Electronics" as used in this statement means NEC Electronics Corporation and also includes its majority-owned subsidiaries.
(2) "NEC Electronics products" means any product developed or manufactured by or for NEC Electronics (as defined above).

| Caution | GaAs Products | This product uses gallium arsenide (GaAs). <br> GaAs vapor and powder are hazardous to human health if inhaled or ingested, so please observe <br> the following points. <br> - Follow related laws and ordinances when disposing of the product. If there are no applicable laws <br> and/or ordinances, dispose of the product as recommended below. <br> 1. Commission a disposal company able to (with a license to) collect, transport and dispose of <br> materials that contain arsenic and other such industrial waste materials. <br> 2. Exclude the product from general industrial waste and household garbage, and ensure that the <br> product is controlled (as industrial waste subject to special control) up until final disposal. |
| :--- | :--- | :--- |
|  | - Do not burn, destroy, cut, crush, or chemically dissolve the product. <br> - Do not lick the product or in any way allow it to enter the mouth. |  |
