

## Silicon Pressure Sensors

Uncompensated/Compensated  
and Compensated Calibrated

*XPC, XPCL,  
XPX, XPXL Series*

### FEATURES

- Low Cost, Small Size
- Temperature Compensated
- Zero and Span Calibrated
- Millivolt Output
- Differential, Gage and Absolute Pressure
- Constant Voltage Excitation
- High Impedance - Low Current

### TYPICAL APPLICATIONS

- Medical Applications
- Applications Requiring Small Size
- Applications Requiring Vacuum and Positive
- Pressure Reference, or Both

### GENERAL DESCRIPTION

The XPC/XPCL and XPX/XPXL Series sensors integrate silicon micromachined sensing technology, temperature compensation, and calibration in a complete family of low cost packages. This series offers the most cost-effective solution for design requirements.

These piezoresistive pressure sensors use micromachined silicon chips mounted on a ceramic and protected with a plastic cap. Several tube arrangements with nylon housings are available for various pressure applications.

On devices of 5 psi and above, the topside of the chip is protected against humidity by a Silgel coating. While the sensors are designed for use with noncorrosive, nonionic pressure media, they accommodate many gases that are used in medical applications.

### Media Compatibility

Clean, dry gases only

**P1 Port:** Media must be compatible with epoxy based adhesive and silicon gel.

**P2 Port:** Media must be compatible with nylon housing, epoxy based adhesive and silicon.

## WARRANTY/REMEDY

Honeywell warrants goods of its manufacture as being free of defective materials and faulty workmanship. Contact your local sales office for warranty information. If warranted goods are returned to Honeywell during the period of coverage, Honeywell will repair or replace without charge those items it finds defective. **The foregoing is Buyer's sole remedy and is in lieu of all other warranties, expressed or implied, including those of merchantability and fitness for a particular purpose.**
