

Utilizing the latest Field Stop and Trench Gate technologies, these IGBT's have ultra low  $V_{CE(ON)}$  and are ideal for low frequency applications that require absolute minimum conduction loss. Easy paralleling is a result of very tight parameter distribution and a slightly positive  $V_{CE(ON)}$  temperature coefficient. Low gate charge simplifies gate drive design and minimizes losses.

- 1200V Field Stop
- Trench Gate: Low  $V_{CE(on)}$
- Easy Paralleling

**Applications: Welding, Inductive Heating, Solar Inverters, SMPS, Motor drives, UPS**
