

# CodeWarrior Development Tool Suites

**Freedom to design across Freescale's extensive silicon portfolio. Flexibility to choose the purchasing model that best fits your needs.**

CodeWarrior development tools provide the capabilities required by every engineer in the development cycle. Purchasing and accessing these tools is easy and affordable.

Freescale has a broad line of CodeWarrior development tools and offers these in suites. These suites allow ready access to any or all of the CodeWarrior products contained within each suite. This means you can license the entire portfolio of CodeWarrior tools within the suite you purchase. Each suite also contains all functionality of the products in the suites below it.

## Purchase Only the Functionality You Require

CodeWarrior suites include:

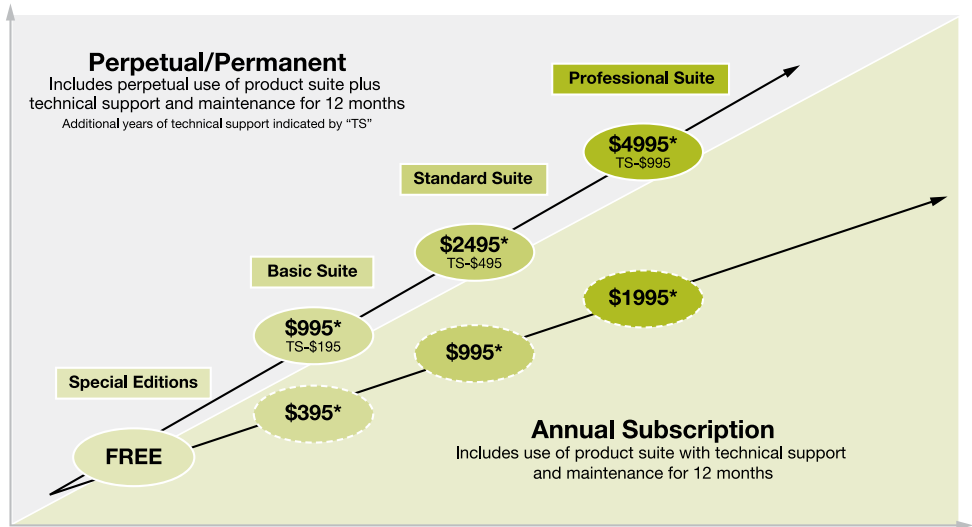

- CodeWarrior Professional Suite—Full-featured development suites
- CodeWarrior Standard Suite—Selectively featured development suites
- CodeWarrior Basic Suite—Compiler upgrades to special editions, Linux Applications Editions and Flash programmers
- CodeWarrior Special Editions—Feature limited development tools

Use your "My Freescale" Web login to download and register specific versions of CodeWarrior development tools. Floating and node locked licenses are available at the same price.

## Perpetual/Permanent Use or Annual Subscriptions

CodeWarrior development tool suites may be purchased for perpetual use or by annual subscription. Twelve months of technical support and maintenance are included in the price with either option. Continuing technical support and maintenance or renewing annual subscriptions beyond the initial period ensures you always have access to the latest versions of the CodeWarrior products at no charge.
