## 0.56" Seven-Segment Numeric LED Displays

LTS-6000  
LTD-6000 Series  
LTC-561/571  
LTC-5623/5723

### Features

- 0.56 inch (14.2mm) digit height
- Choices of six bright colors-AIGaAs red/bright red/green/yellow/red orange/high efficiency red.
- Low power requirement.
- Excellent characters appearance.
- Categorized for luminous intensity.
- I.C. compatible.
- Easy mounting on P.C. board or socket.

### Description

The LTS-6000, LTD-6000, LTC-561/571 LTC-5623/5723 series are 0.56 inch (14.2mm) height single, dual, triple and quadruple digit displays. Bright red displays have black face and red segments. AIGaAs red, green and yellow displays have gray face and white segments. Red orange displays have orange face and orange segments. High efficiency red displays have red face and red segments.

The AIGaAs red seven segment displays are designed for applications requiring low power consumption. They are tested and selected for their excellent low current characteristics to ensure that the segments are matched at low current. Drive current as low as 1 mA per segment is available.

The AIGaAs red series devices utilize LED chips which are made from AIGaAs on a non-transparent GaAs substrate. The bright red and green series devices utilize LED chips which are made from GaP on a transparent GaP substrate. The yellow and red orange series devices utilize LED chips which are made from GaAsP on a transparent GaP substrate.
