**DESCRIPTION**

The LTS-3406JS is a 0.8 inch (20.32 mm) height digit display. The device utilizes AllnGaP yellow LED chips which are made from AllnGaP on a non-transparent GaAs substrate, and have light gray face and white segment color.

This low current seven-segment display is designed to perform under low power consumption. It is tested and selected for its excellent low current characteristics. It can be driven in low current condition and the segments are matched. This driving current as low as 1mA per segment is applicable.
