

## 54FCT521 8-Bit Identity Comparator

### General Description

The 54FCT521 is an expandable 8-bit comparator. It compares two words of up to eight bits each and provides a LOW output when the two words match bit for bit. The expansion input  $\bar{T}_{A=B}$  also serves as an active LOW enable input.

### Features

- Expandable to any word length
- Outputs sink capability of 32mA, source capability of 12 mA
- TTL input and output level compatible
- CMOS power consumption
- Standard microcircuit Drawing (SMD) 5962-8854301

**Note 2:** Absolute maximum ratings are those values beyond which damage to the device may occur. The databook specifications should be met, without exception, to ensure that the system design is reliable over its power supply, temperature, output/input loading variables. National does not recommend operation of FACT™ circuits outside databook specifications.
