SPECIFICATIONS

- Density: 2GB
- Part Status: Sampling
- Package: eUSB
- Voltage: 5V
- Op Temp: 0C to +70C
- Interface: USB 2.0
- RoHS: Yes

DESCRIPTION

Micron's embedded USBs provide USB 2.0-compatible memory storage in a small form factor. These mass storage devices use only SLC NAND Flash, and all densities use two x8 NAND channels to the controller. Coupled with ECC and wear leveling, the embedded USB provides a highly reliable storage solution.

Sampling: Engineering samples are available, but this part is not yet in production.
