## HF3 S Relay

---

High performance low cost plastic sealed high frequency relay for 50/75 Ohm system, 1 pole, polarized coil Surface Mount Technology (SMT)

Relay types:    non latching  
                  latching 1 coil  
                  latching 2 coils

ROHS compliant (Directive 2002/95/EC) all date codes.

### Features

- Y-Design
- Frequency range DC to 3 GHz
- Impedance 50  $\Omega$  / 75  $\Omega$
- Small dimensions (15 mm x 7.6 mm x 10.6 mm)
- 1 change over contact (1 form C / SPDT)
- Immersion cleanable
- Low power consumption ( $\leq 140$  mW)

### Typical applications

- Cable modems and linecards/ CATV
- TAP's
- Measurement and test equipment ATE
- Satellite / audio / video tuners
- Wireless base stations and antennas

reset condition

Contacts in reset position. Contact position might change during transportation and must be reset before use.

### Coil Operating Range

**140 mW**

**70 mW**

- $U_{nom}$  = Nominal coil voltage
- $U_{max.}$  = Upper limit of the operative range of the coil voltage (limiting voltage)
- $U_{op. min.}$  = Lower limit of the operative range of the coil voltage (reliable operate voltage)  
For latching relays  $U_{set min.}$  resp.  $U_{reset min.}$
- $U_{rel. min.}$  = Lower limit of the operative range of the coil voltage (reliable release voltage)

## HF3 S Relay

### Contact Data

Number of contacts and type	1 changeover (SPDT)
Contact material	Silver, gold-covered
Limiting continuous current at max. ambient temperature	2 A
Maximum switching current	2 A
Maximum switching voltage	220 Vdc / 250 Vac
Maximum switching capacity	60 W / 62.5 VA / 50 W (2.5 GHz)
Initial contact resistance at 10 mA / 20 mV	< 100 mΩ
Mechanical endurance	10 <sup>7</sup> operations
Max. Continuous RF-power	100 W @ 3 GHz (with appropriate cooling, only) 150 W @ 2 GHz (with appropriate cooling, only)
Peak RF-power	300 W (with appropriate cooling, only)

### Insulation

Insulation resistance at 500 VDC	> 100 MΩ
Dielectric test voltage (1 min) between coil and contacts between open contacts	1000 Vrms 600 Vrms
Surge voltage resistance according to FCC 68 (10 / 160 μs) and (2 / 10 μs) between coil and contacts between open contacts	1500 V 1000 V

### General Data

Operate time at U <sub>nom</sub> typ./max.	3 ms / 5 ms
Reset time (latching) at U <sub>nom</sub> typ. / max.	3 ms / 5 ms
Release time without diode in parallel (non-latching) typ./max.	2 ms / 4 ms
Release time with diode in parallel (non-latching) typ./max.	4 ms / 6 ms
Duration of set / reset pulse (latching) min.	20ms*
Bounce time at closing contact typ. / max.	1 ms / 3 ms
Maximum switching rate without load	50 operations/s
Ambient temperature	-55 °C ... +85 °C
Thermal resistance	< 165 K/W
Maximum permissible coil temperature	125 °C
Vibration resistance (function)	35 G 10 to 1000 Hz
Shock resistance, half sinus, 11 ms	50 G (function) 150 G (damage)
Degree of protection / Environmental protection	immersion cleanable, IP 67 / RT III
Needle flame test	application time 20 s, burning time < 15 s
Mounting position	any
Processing information	Ultrasonic cleaning is not recommended
Weight (mass)	max. 3.0 g
Terminal surface	SnCu 0.7
Moisture sensitive level (JEDEC J-STD-020B)	MSL 3
Resistance to soldering heat	265 °C/10 s

\* Duration may be shorter depending on pulse shape, voltage applied and ambiente temperature

## HF3 S Relay

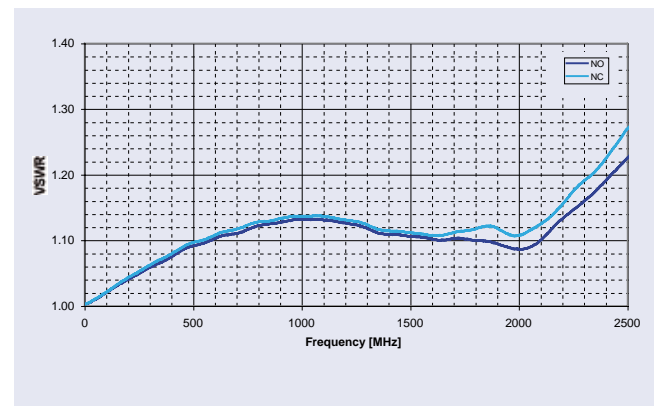

### High Frequency Data

RF characteristics	50 $\Omega$	75 $\Omega$
Isolation at 100 MHz / 900 MHz / 3 GHz	-95dB / -80dB / -55dB	-96dB / -80dB / -50dB
Insertion loss at 100 MHz / 900 MHz / 3 GHz	-0.03dB / -0.12dB / -0.30dB	-0.03dB / -0.12dB / -0.30dB
V.S.W.R. at 100 MHz / 900 MHz / 3 GHz	1.05 / 1.10 / 1.25	1.05 / 1.20 / 1.30

#### 50 $\Omega$

#### 75 $\Omega$

## HF3 S Relay

### Recommended Soldering Conditions

Soldering conditions according IEC 60058-2-58 and IPC/JEDEC J-STD-020B

Vapor Phase Soldering: Temperature/Time Profile  
(Lead and Housing Peak Temperature)

### Recommended reflow soldering profile

Infrared Soldering: Temperature/Time Profile  
(Lead and Housing Peak Temperature)

### Resistance to soldering heat - Reflow profile

Infrared Soldering: Temperature/Time Profile  
(Lead and Housing Peak Temperature)

### IM Relays

4th generation slim line – low profile polarized 2 c/o telecom signal relay with bifurcated contacts, available as non latching or latching relay with 1 coil. Nominal voltage range from 1.5 ... 24 V, coil power consumption of 50 ... 200 mW, latching relays with 1 coil 100 mW. The IM relay is available as through hole and surface mount type (J-Legs and Gull Wings) and capable to switch loads up to 60 W/62,5 VA. It is currently the only 2 A rated 4G relay on the market. Dielectric strength fulfills the Telcordia requirements according GR 1089 (2,5 kV – 2 / 10 µs) and FCC part 68 (1,5 kV – 10 / 160 µs). The IM relay is tested according CECC/IECQ and certified in accordance with IEC/EN 60950 and UL 60950. Dimensions approx. 10 x 6 mm board space and 5.65 mm height.

### P2 Relays

3rd generation polarized 2 c/o telecom relay with bifurcated contacts, available as non latching or latching relay with 1 or 2 coils. Nominal voltage range from 3 ... 24 V, coil power consumption 140 mW, latching relays with 1 coil 70 mW. The P2 Relay is available as through hole or surface mount type and capable to switch currents up to 5 A. Dielectric strength fulfills the Telcordia requirements according GR 1089 (2,5 kV – 2 / 10 µs) and FCC part 68 (1,5 kV – 10 / 160 µs). The P2 relay is tested according CECC/IECQ and certified in accordance with IEC/EN 60950 and UL 60950. Dimensions approx. 15 x 7,5 mm board space and 10 mm height.

### FX2 Relays

3rd generation polarized 2 c/o telecom relay with bifurcated contacts, available as non latching or latching relay with 1 coil. Nominal voltage range from 3 ... 48 V, coil power consumption of 80 ... 260 mW for the high sensitive version, 140... 300 mW for the standard version, latching relays with 1 coil 100 mW. The FX2 relay is available as through hole type and capable to switch loads up to 60 W/62,5 VA. Dielectric strength fulfills the Telcordia requirements according GR 1089 (2,5 kV – 2 / 10 µs) and FCC part 68 (1,5 kV – 10 / 160 µs). The FX2 relay is tested according CECC/IECQ and certified in accordance with IEC/EN 60950 and UL 60950. Dimensions approx. 15 x 7,5 mm board space and 10,7 mm height.

### FT2 / FU2 Relays

3rd generation non polarized, non latching 2 c/o telecom relay with bifurcated contacts. Nominal voltage range from 3 ... 48 V, coil power consumption 200 ... 300 mW. Most sensitive 48 V relay. Available as through hole and surface mount type. Dielectric strength fulfills the Telcordia requirements according GR 1089 (2,5 kV – 2 / 10 µs) and FCC part 68 (1,5 kV – 10 / 160 µs). The FT2/FU2 relay is tested according CECC/IECQ and certified in accordance with IEC/EN 60950 and UL 60950. Dimensions approx. 15 x 7,5 mm board space and 10 mm height.

### FP2 Relays

3rd generation polarized 2 c/o telecom relay with bifurcated contacts, available as non latching or latching relay with 1 or 2 coils. Nominal voltage range from 3 ... 48 V, coil power consumption of 80 ... 260 mW for the high sensitive version, 140... 300 mW for the standard version, latching relays with 1 coil 100 mW. The FP2 Relay is available as through hole type and capable to switch loads up to 60 W/62,5 VA. Dielectric strength fulfills FCC part 68 (1,5 kV – 10 / 160 µs). The FP2 is tested according CECC/IECQ approved. Dimensions approx. 14 x 9 mm board space and 5 mm height.

### MT2

2nd generation non polarized, non latching 2 c/o telecom and signal relay with bifurcated contacts. Nominal voltage range from 3 ... 48 V, coil power consumption 150/200/300/400 and 550 mW. Dielectric strength fulfills the requirements according FCC part 68 (1,5 kV – 10 / 160 µs). Dimensions approx. 20 x 10 mm board space and 11 mm height.

### D2n Relays

2nd generation non polarized 2 c/o relay for telecom and various other applications. Nominal voltage range from 3 ... 48 V, coil power consumption from 150 ... 500 mW. The D2n relay is capable to switch currents up to 3 A. Dielectric strength fulfills the requirements according FCC part 68 (1,5 kV – 10 / 160 µs). Dimensions approx. 20 x10 mm board space and 11 mm height.

### P1 Relays

Extremely sensitive, polarized 1 c/o relay with bifurcated contacts for a wide range of applications, available as non latching or latching relay with 1 or 2 coils. Nominal voltage range from 3 ... 24 V, coil power consumption 65 mW, latching relays with 1 coil 30 mW. The P1 relay is available as through hole or surface mount type and capable to switch currents up to 1 A. Dielectric strength fulfills the requirements according FCC part 68 (1,5 kV – 10 / 160 µs). Dimensions approx. 13 x 7,6 mm board space and 7 mm height for THT or 8 mm height for SMT version.

### W11 Relays

Low cost, non polarized 1 c/o relay for various applications. Nominal voltage range from 3 ... 24 V, coil power consumption 450 mW, sensitive versions 200 mW. The W11 relay is capable to switch currents up to 3 A. Dielectric strength 1000 Vrms. Dimensions approx. 15,6 x 10,6 mm board space and 11,5 mm height.

### Reed Relays

High sensitive, non polarized relay for telecom and various other applications, available with 1 n/o, 2 n/o or 1 c/o contacts. Nominal voltage range from 5 ... 24 V, coil power consumption 50...280 mW for 1 n/o and 125 ... 280 mW for 2 n/o or 1 c/o versions. Reedrelays are available in DIP or SIL housing and capable to switch currents up to 0,5 A. Integrated diode and/or electrostatic shield optional. Dielectric strength 1500 Vdc. Dimensions approx. 19,3 x 7 mm board space and 5 ... 7,5 mm height for DIP or 19,8 x 5 mm board space and 7,8 mm height for SIL version.

### Cradle Relays

Extremely reliable and mature relay family of 1st generation for various signal switching applications. Available as non polarized, polarized / latching and relay with AC coil. The benefit is the possibility of combining various contact sets from 1 up to 6 poles, single and bifurcated contacts, different contact materials with a coil voltage range from 1,5 Vdc to 220 Vac. Cradle relays are available as dust protected and hermetically sealed versions, with plug in or solder terminals and are capable to switch currents up to 5 A. Forcibly guided (linked) contact sets optional. Dielectric strength 500 Vrms. Dimensions from approx. 19 x 24 to 19x35 mm board space and 30 mm height.

### Other Relays

We offer a variety of different relay families for maintenance and replacement purposes. These relays are up to 60 years old now, such as Card Relay SN (V23030 series), Small General Purpose Relay (V23006 series), Small Polarized Relay (V23063 ... V23067 and V23163 ... V23167 series). Accessories like sockets, hold down springs, etc. optional.

### High Frequency Relays

HF3 / HF3S / HF6 series RF relays offering excellent RF characteristics in a small package. All HF series relays are suitable for SMD soldering processes. Available as non latching or latching versions with 1 or 2 coils and a nominal coil voltage range from 3 ... 24 V, a coil power consumption of 140 mW or 70 mW (single coil latching types).

**HF3:** Low cost RF relay suitable up to 3 GHz. Impedance 50 and 75 Ohm. 50 W hot switching and 50 W RF power carry capability. Dimensions 14.6 x 7.3 x 10.3 mm.

**HF3S:** High performance, high power RF relay suitable up to 3 GHz, 50 W hot switching and 150 W RF power carry capability. Dimensions 15 x 7.6 x 10.6 mm.

**HF6:** High performance, high power RF relay suitable up to 6 GHz, 50 W hot switching and 50 W RF power carry capability. Dimensions 15 x 7.6 x 10.6 mm.
