

Elite CR-33

Miniature DC-22GHz SPDT Switch

Failsafe

The CR-33 Switch is a broadband, SPDT, electromechanical, coaxial switch designed to switch a microwave signal from a common input to either of two outputs. The CR-33 Series has a higher operating Frequency and temperature range than the commercial CCR-33 series. The characteristic impedance is 50 Ohms. The switches are small with connector spacing compatible with SMA connectors.

The CR-33 series switch is offered with either a failsafe or latching actuator. This design is compatible with the two most common mounting hole patterns. The CR-33 series switch is interchangeable with a variety of switches.
