

Product Type Miniature Rocker Switches

Product Series
R-Series: Curvette

Description

The R-Series Curvette single pole rocker switches are aesthetically pleasing miniature snap-in switches. Due to the patented mounting ear design, they are compatible with a wide range of standard panel cutouts. These switches are available in a range of momentary and maintained single throw or double throw circuits, terminations, and legend options. They are offered in a variety of rocker colors and styles, including our unique curved two-color molded Visi-Rocker® for low cost "ON" indication. They have a rated life of 50M cycles @ rated load.

R-Series

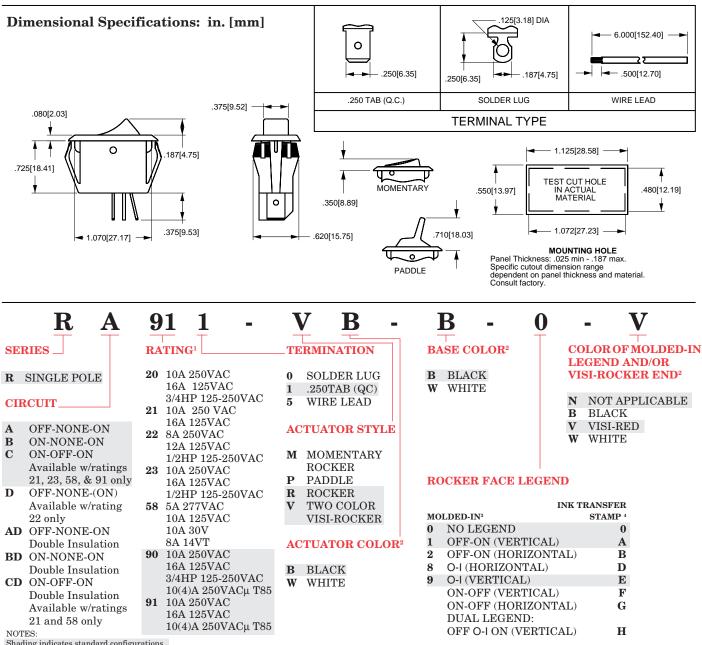

The R-Series Curvette single pole miniature snap-in rocker switches are available with momentary, rocker, paddle & Visi-Rocker type actuators. These aesthetically pleasing switches are compatible with a range of standard panel cutouts. Electrical ratings, with international approvals, are available up to 16 amps.

Specifications

- Certifications*: UL, CSA, VDE, TUV, SEMKO, DEMKO, NEMKO, FIMKO, SEVand BEAB
- Dielectric Strength: 1,000 V (minimum)
- Insulation Resistance: 100 Megohms (minimum)
- Base Material: Nylon
- Actuator Material: Polyester or Nylon

* Due to ongoing technological advances, consult factory for certification specifics.

Shading indicates standard configurations.

Panel Cut-Out Recommendations: For sheet metal panels, switch must enter panel in same direction as the punch. (Burr on bottom.) Test cut hole in actual material

Rating 22 must use circuit D only and momentary rocker.

2 Matte finish is standard. Custom colors are available. Consult factory

Molded-in Legend available only with Visi-Rocker option. 3

4 White is standard with dark actuators; black is standard with light actuators.
