

Tgard[™] 200 Series Thermally Conductive Insulators

Innovative **Technology** for a **Connected** World

HIGH PERFORMANCE THERMAL INTERFACE PRODUCTS

The Tgard[™] 200 is a high performance interface pad. Consisting of a silicone/boron nitride composite, these fiberglass-reinforced pads are used when the lowest thermal resistance and highest dielectric strength are required

A high-tear, cut-through and puncture-resistant product, the Tgard[™] 200 is tough and strong. Burrs cause no problems for the material and the pad will not dry out, crack or fail when pressured between mating parts.

The Tgard[™] 200 is available in 0.010" (0.25 mm), 0.020" (0.51 mm) and 0.030" (0.75mm) thicknesses.

FEATURES AND BENEFITS

- High thermal Conductivity of 5.0 W/mK
- High breakdown voltage of > 6,000 volts
- Resistant to tears and punctures
- $UL^{\mathbb{R}}$ 94 V0 rated

APPLICATIONS

- Audio and video components
- Automotive control units
- General high pressure interfaces
- Motor controllers
- Power conversion equipment
- Power semiconductors
 - T0 packages, M0SFETs and IGBTs

tandard thicknesses:	0.010" (0.25mm), 0.020" (0.51mm), 0.030" (0.76mm) Please contact Laird Technologies for alternate thicknesses.			
tandard sheet sizes:	0.010": 14" x 16" (356mm x 406mm), 0.020" and 0.030": 16" x 16" (406mm x 406mm) Individual die-cut shapes can be supplied.			
ressure sensitive adhesive:	Request no adhesive with "AO" suffix. Request adhesive on one side with "A1" suffix.			

Reinforcement:

Double-sided adhesive is not available. Tgard™ 200 sheets are fiberglass reinforced.

Data for design engineer guidance only. Observed performance varies in application. Engineers are reminded to test the material in application.
