

Tgard™ 500Thermally Conductive Insulators

Innovative **Technology** for a **Connected** World

THICKER THERMAL INSULATOR PAD PREVENTS ELECTRICAL SHORTS IN AUTOMOTIVE ELECTRONICS APPLICATIONS

Tgard[™] 500 is a medium thermal performance insulator pad consisting of a ceramic filled high temperature silicone rubber coated on electrical grade fiberglass.

Tgard[™] 500 is designed for applications that require additional thickness to prevent electrical shorts from stamped aluminum heatsinks used in switching mode power supplies (SMPS) and debris from aluminum castings used in automotive motor controls.

Tgard[™] 500 is used in applications that require interface of 2.4°C/watt or higher on a TO-220 mounted @ 50 psi pressure.

FEATURES AND BENEFITS

- High breakdown voltage of >6,000 volts AC
- Thermal resistance of 0.45°C-in2/watt at 50 psi
- Thermal resistance of 0.35°C-in2/watt at 400 psi
- Thick enough to encapsulate burrs of stamped heatsinks

APPLICATIONS

- Automotive motor controls
- Switching mode power supplies
 - Stamped aluminum heatsinks
