

Monitoring Relays 1-Phase AC/DC Over Voltage - AC Over Current Types DUA01, PUA01

CARLO GAVAZZI

DUA01

PUA01

- AC/DC over voltage monitoring relay
- Selection of measuring range by DIP-switches
- Measuring ranges: 2 to 20 VAC/DC, 5 to 50 VAC/DC, 20 to 200 VAC/DC, 50 to 500 VAC/DC, 0.4 to 4 V_p AC
- Adjustable voltage limit on relative scale
- Adjustable hysteresis
- Programmable latching at set level
- Output: 8 A SPDT relay normally de-energized
- For mounting on DIN-rail in accordance with DIN/EN 50 022 (DUA01) or plug-in module (PUA01)
- 22.5 mm Euronorm housing (DUA01) or 36 mm plug-in module (PUA01)
- LED indication for relay and power supply ON
- Galvanically separated power supply

Product Description

DUA01 and PUA01 are precise AC/DC over voltage monitoring relays. They can also be used as 1-phase or 3-phase over current monitoring relays when connected with MI or MP current transformers.

Owing to the built-in latch function, the ON-position of the relay output can be maintained. The red LED indicates the alarm status.

General Specifications

Reaction time Alarm ON delay	< 100 ms (voltage rising from -20% to +20% set value)
Alarm OFF delay	< 300 ms (voltage decreasing from +20% to -20% set value)
Accuracy Temperature drift Repeatability	(15 min warm-up time) ± 1000 ppm/°C ± 0.5% on full-scale
Indication for Power supply ON Output relay ON	LED, green LED, red
Environment Degree of protection Pollution degree Operating temperature Storage temperature	(EN 60529) IP 20 3 (DUA01), 2 (PUA01) -20 to 60°C, R.H. < 95% -30 to 80°C, R.H. < 95%
Housing Dimensions	DUA01 PUA01 22.5 x 80 x 99.5 mm 36 x 80 x 94 mm
Weight	Approx. 150 g
Screw terminals Tightening torque	Max. 0.5 Nm acc. to IEC 60947
Approvals	UL, CSA (except 748)
CE Marking	Yes
EMC Immunity Emission	Electromagnetic Compatibility According to EN 61000-6-2 According to EN 61000-6-3

Mode of Operation

DUA01 and PUA01 monitor both AC and DC over voltage. When connected with MI or MP current transformer (using the 0.4 - 4 V_p range) they can monitor 1-phase or 3-phase AC currents up to 500 A.

Example 1

(connection between terminals Z1, Y1 or 8, 9 - latch function enabled)

The relay operates and latches in operating position when the measured value exceeds the set level. Provided that the voltage has dropped min. 4% below the set point (see hysteresis), the relay releases when the interconnection between terminals Z1, Y1 or 8, 9 is interrupted or the power supply is interrupted as well.

Example 2 (MI CT)

(no connection between terminals Z1, Y1 or 8, 9)

The relay operates when the current flowing through the CT exceeds the set level. It releases when the current drops min. 4% below the set level (see hysteresis) or when power supply is interrupted.

Example 3 (MP CT)

(no connection between terminals Z1, Y1 or 8, 9 - latch function disabled)

The relay operates when the maximum current flowing through the CT exceeds the set level. It releases when the maximum current drops min. 4% below the set level (see hysteresis) or when power supply is interrupted.

Range - Level Setting

Adjust the measuring range setting the DIP switches 1 to 4 as shown below.

To access the DIP switches open the grey plastic cover using a screwdriver as shown below.

DIP Switch	ON	OFF	OFF	OFF	Measuring range
1	ON	OFF	OFF	OFF	0.4 to 4 V _p
2	OFF	OFF	OFF	OFF	2 to 20 VAC/DC
3	OFF	OFF	OFF	OFF	5 to 50 VAC/DC
4	ON	OFF	ON	OFF	20 to 200 VAC/DC
	ON	OFF	OFF	ON	50 to 500 VAC/DC

Centre knob:

Setting of voltage on relative scale: from 10 to 110% of the full-scale value.

Hysteresis:

Approx. 4% of set value, it can be extended by inserting a resistor between terminals Z1, Y1 or 8, 9.

Approx. resistor values:

10%:	180 kΩ
25%:	47 kΩ
50%:	22 kΩ
75%:	15 kΩ
Latch:	< 500 Ω
