#### LOW RATE DISCHARGE

#### HIGH RATE DISCHARGE

Product can be charged on most NiMH or NiCd chargers utilizing standard dV, dV/dt, time and temperature dynamic charge termination methods. Duracell brand NiMH chargers are recommended for best results.

Delivered capacity is dependent on the applied load, operating temperature, and cut-off voltage. Please refer to the charts and discharge data shown for example of the energy/service life that the battery will provide for various local conditions.

This data is subject to change. Performance information is typical. Contact Duracell for latest information.
