

Model 206
Network/PC Cable Tester

This cable tester is a stand-alone test device. It is designed to test popular PC data cables, printer, monitor, modem, mouse extension, game, BNC coax, RJ45, 1394, and USB cables by identifying the wire connection status: open, short, cross, miswire, and continuity of wires and pin configuration. It is a very good tool for most cable dealers, cable assembly house or system integrator to quickly check the pin configuration or troubleshooting in every work environment.

- Tests most PC data cables and network cables, such as printer, monitor, modem, mouse extension, BNC coax, RJ45, 1394, and USB cables
- Detects open, short, miswire, continuity, game, and pin configuration
- Ideal for: cable dealers, cable assembly house or system integrators
- Quick and easy to use
- LED display for easy identification
- Auto and manual modes
- Reverse test

USB A/B & 1394 Fire wire Interface
